The workbook briefly outlines curriculum development with an emphasis on Native American curriculum materials. Written in conversational style, it contains very basic information and examples regarding: the scope, sequence, and definition of curriculum; how curriculum materials get into the educational system; and a 5-step curriculum development process (soliciting community involvement; writing learning objectives; integrating Native American content with academic skills; evaluating curriculum product; disseminating the curriculum into the educational system). A briefly stated curriculum development guide and checklist are included. The appendix contains sample field test, bench test, and evaluation forms as well as descriptions of how to organize public meetings and write performance objectives. (SB)

Identifiers-Alaska, Athabascan (Tribe), Carvings, *Cultural Contributions, Tlingit (Tribe)

Alaska is recognized as one of the major world centers of native art and expression. In the 18th century certain areas of Alaska were the most densely populated areas of the New World. Once the native people had made the necessary adaptations in clothing, housing, transportation and hunting, they were able to live without hardship. With an abundant and unfailing food supply and density of population, the far northwestern area became one of the highest centers of cultural development north of Mexico. Art was its primary manifestation, an art remarkable for its richness and variety of expression. This exhibition catalog of the National Gallery of Art presents the high artistic achievements of the Native Peoples of Alaska. Materials for the exhibition were drawn from collections from all over the world. Both major ethnic divisions of the native population, the Eskimo-Aleut and Indian, are represented. The 289-page volume contains fifteen color plates, hundreds of black and white photographs, maps showing the areas from which the artifacts have come, and essays by important scholars in the field of cultural anthropology on the culture and art of the Eskimo, Athabascan, and Tlingit. Chicano Studies and Chicanismo.
Pub Date-Nov 78
Note-18p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Activism, Change Strategies, Cultural Awareness, Cultural Background, *Culture Conflict, Ethnicity, Ethnic Studies, *Individual Development, *Mexican Americans, Self Actualization, Self Concept, *Self Determination, *Social Change, Values
Identifiers-Chicano Movement, *Chicanos, *Chicano Studies

The Chicano Movement acts as a revitalization movement for involved individuals. Revitalization occurs when an individual perceives himself as part of a broader group, becomes aware of the problems confronting the group, and decides to do something to rectify the situation. This process begins with a crisis situation which overcomes the individual's present but unsatisfactory Mexican American mentality (e.g., when the problems facing Mexican Americans become intolerable). Such mental emancipation is a necessary step toward the evolution of a Chicano mentality. As the individual experiences his emancipation, social change begins, as is evidenced by the many Chicano strategies and movements of the 1960's and early 1970's. However, many of the social conditions previously stressful to Mexican Americans (the Viet Nam war, United Farm Workers problems, lack of bilingual education) have been defused and individual involvement in the Chicano Movement has consequently declined. It is the responsibility of those involved in Chicano Studies to take an active role in the development of Chicano mentality and the perpetuation of social change by exposing the Establishment's continuing suppression of the Mexican American. Identifiers-American Indian Education, *American Indian Language Culture Ed Act 1977 MN, Dakota (Language), Winnebago (Language)

Passed by the Minnesota legislature in 1977, the innovative American Indian Language and Culture Education Act provided for the establishment of American Indian language and culture education programs designed (1) to make the curriculum more relevant to the needs, interest, and cultural heritage of American Indian pupils, (2) to provide positive reinforcement of the self-image of American Indian pupils, and (3) to develop intercultural awareness among pupils, parents and staff. Major provisions implemented were a statewide needs assessment, development of an Indian language teacher licensing process and employment guidelines, and creation of a statewide advisory task force on American Indian Language and Culture Education. Appropriations totaling $600,000 funded 11 pilot projects. Seven of these projects focused on Ojibwe, Dakota, and Winnebago cultural, language, and art development programs. Several projects provided pre-school programs to develop sensory-motor and early reading skills as well as cultural awareness. Publication of Ojibwe story books for use in grades pre-school through 6 and a Red Lake junior and senior high history book resulted from another project. A camp experience project exposed students to traditional Ojibwe life styles. Appendices contain the 1977 Act, a list of the advisory task force on American Indian Language and Culture Education, and the geographic locations of the 11 pilot projects. (NEC)

Identifiers-*Minnesota Indian Scholarship Program

The Minnesota Indian Scholarship Program has grown tremendously since 1955 when three Indian students were given financial aid to attend college. This report provides a narrative and statistical history of the program and its activities with the state legislature, high school counselors, post secondary financial aids officers, tribal and reservation scholarship personnel, Bureau of Indian Affairs, and other funding sources to facilitate the educational goals of Indian students who need assistance. It describes responsibilities of the scholarship officer, the 1977 reorganization of the Scholarship Committee, the revision of forms, plans to create a definitive set of Scholarship Committee by-laws and grant guidelines, development of a data collection system, possible extension of funds to post baccalaureate students, future expansion of office staff, and intensified efforts to promote program awareness and participation. Tables show fund sources, amounts appropriated, numbers of students funded, average grants, graduates or program completions, and colleges attended by tribal backgrounds. Appendices provide a text of the Indian Scholarship law and information for counselors and potential scholarship recipients describing application procedures. Included is a summary of the Scholarship Research effort which surveys post scholarship recipients to assess educational attainments, college majors, schools attended, employment history, and personal comments. Identifiers-Minnesota

It has been recognized for many years that the educational levels of adult American Indians are low (2/3 have not advanced beyond elementary school) and the illiteracy rates are high (1/4 are functionally illiterate). Traditional adult programs have not met the needs of adult Indians who are uncomfortable in "white" classes and who will not attend unless the classes are relevant to Indian adult needs. Since 1973, Indian Adult Basic Education (IABE) has demonstrated its effectiveness in providing educational and teaching services to Minnesota Indian adults in areas of literacy, basic skills, and general education. Over 600 adults have received G.E.D.'s and more than 1,000 have obtained driver's licenses. Both of these tangible results have helped Indians upgrade their employment opportunities, acquire promotions, enter post-secondary programs, and find new and better jobs. To assure continuation of IABE programs for seven Chippewa reservations and four Sioux communities, a proposal for fiscal year 1978 has outlined goals, objectives, procedures, curriculum, counseling, and evaluation procedures. Findings from the Meriam Report (1928) and the U.S. Senate Report on Indian Education (1969) have been compared with the Minnesota State Board of Education Indian Education Hearings (1976) and have been presented as examples of the most extensive analyses of testimonies/surveys of Indian people concerning education. Identifiers-Curanderismo, *Texas (South)

The folkways and cultural heritage of the Mexican Americans of South Texas are explored in this volume which is designed to provide the student with the opportunity for cultural enrichment, oral language development, and vocabulary expansion. The first chapter deals with Creencias'' which are common beliefs handed down from generation to generation. One of the 23 beliefs listed is To make it rain soon, hang a horned toad''. The second chapter lists customs and traditions associated with baptisms, debuts (quinceanera), weddings and funerals. Faith healing practices are discussed in the third chapter. Photographs show the procedures to be followed in curing such afflictions as ojo'' and several forms of fright (susto) or indigestion (empacho). Don Pedro Jaramillo, a famous faith healer who lived in South Texas in the late 19th century, is also discussed. The fourth chapter discusses the uses of several medicinal herbs, e.g., ajo, alcanfor, anis, canela, and romero. Chapter five lists a number of historical sites in South Texas. Proverbs and traditional riddles, written in both English and Spanish, are listed in the sixth and seventh chapters. The final chapter includes a number of the most popular tales in the Mexican American culture. Many of them are ghost stories or tales of the supernatural. Adventures of Juan Oso, who was half bear and half man, are also given. Each chapter concludes with study questions, suggested activities and a vocabulary list. (DS)

Mexican Americans in School: Implications for the Counselor-Educator.

Pub Date-78
Note-14p.
Pub Type- Opinion Papers (120) - Reports - General (140)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Ability Grouping, Bilingual Education, Caucasians, Counselor Acceptance, *Counselor Attitudes, Counselor Role, *Counselors, *Counselor Training, Educational Disadvantagement, Educational Quality, Elementary School Counselors, Elementary Secondary Education, *Equal Education, Inservice Programs, *Mexican Americans, Minority Group Children, Multicultural Education, Student Placement, Teacher Attitudes

The opportunities and role of the counselor in education are expanding, partially due to the increasing numbers of Mexican American students and their demands for equal education. While many researchers have traced the problem of poor education for Mexican American children to their cultural and family background, both teachers and counselors have contributed to the situation by setting lower expectations for Mexican American students and by using rigid ``tracking'' systems which tend to limit student achievement. One much-heralded approach to the problem is bilingual/bicultural education. Another approach is using counselors, preferably bilingual, at all educational levels and expanding the counselor role to include parent orientation, community liaison, and student placement, as well as helping the student with problems. In particular, the counselor can assist with the growing numbers of elementary aged minority students who exhibit high anxiety and low self-concept, and the ``alingual'' or ``bicultural illiterate'' student. Currently, counselors are often misused by the institutions that employ them, but they are generally well trained. Anglo counselors must be versatile, skilled, more culturally aware of their minority students, and must know which methods work best with those clients. There are implications for both inservice and institutional training programs. (SB)

Identifiers-Bureau of Indian Affairs, Crow (Tribe), National Aeronautics and Space Administration, Pueblo (People)

The technical feasibility of voice and television communication within and between tribes, between tribes and federal agencies, and between educational institutions and tribes was demonstrated by broadcasts which took place April 10, 12, and 14, 1978, with equipment located at four sites: Crow Agency, Montana; All- Indian Culture Center, New Mexico; Moffett Field, California; and Washington, D.C. Two-way interactive television with the TV signals transmitted by satellite allowed tribe members, government officials, and congressmen to see and talk with one another. The National Aeronautics and Space Administration arranged for the use of the Communications Technology Satellite and other technical equipment; the tribes otherwise planned and conducted the broadcasts which included informative presentations by representatives of government agencies, discussion between tribes and a panel of congressmen, instructional programs, and question-and-answer periods with tribes and government representatives participating. Health services, education, rural development, water rights, and the Bureau of Indian Affairs were topics of discussion. Indian groups and federal agencies must now study the possible uses, benefits, and cost effectiveness of using satellite communications to improve Indian information networks. (JH)

The past ten years have brought revolutionary advances in Indian education; further advances are needed and are possible if Indian people build upon their recent gains. Indicators of the revolution in Indian education abound, including increases in college enrollment and numbers of high school graduates, growth of Indian-centered and Indian-controlled colleges (from 1 in 1969 to 28 in 1979), and large numbers of specially funded Indian education projects. Although these advances indicate major educational gains, the gap between Indians and whites is widening as seen by comparing achievements of Indian students and majority males. In order to close this gap, Indians must consolidate their control of educational processes; this entails securing adequate funding for education, training Indian leaders and managers in all professions, building and maintaining strong community involvement in education, conducting practical and theoretical research, and improving communication within and between tribes. One step towards achieving these goals is now under serious consideration: the establishment at Bacone College of a National Indian University that would be the first four-year, baccalaureate degree-granting college to have as its primary mission the education of the American Indian student. Identifiers-Appalachia, Change, Cherokee Nation, *Great Smoky Mountains National Park, North Carolina, *Pioneers, Tennessee

More than 6,600 separate tracts of land, purchased by the citizens of Tennessee and North Carolina and given to the people of the United States in 1934, comprise the Great Smoky Mountains National Park. The history of the Great Smokies is, therefore, a story of people and their home. This volume presents historical vignettes of the groups who founded the region: the Cherokees who built a way of life in harmony with nature; the pioneers who cleared the land of trees and stones to cultivate crops; the trailblazers who constructed roads that challenged rough terrain and mountain ranges; the mountaineers who developed proud individualism and fierce clan loyalties; the loggers who brought manpower, sophisticated equipment, railroads, and fires. Among the many individuals featured are: Sequoyah (known to whites as George Gist), developer of the Cherokee alphabet; Yonahguskah, counselor chief of the Cherokees; Arnold Gryot, Swiss geographer and mapper of the Smokies; Edward Clarence Conner, settler and diarist; Horace Kephart, initiator of the movement for a national park, and Major J. Ross Eakin, first park superintendent. Detailed are distinctive regional features: rail fences, sourwood, ginseng, rifle making, spinning and weaving, mountain music, folk beliefs, handicrafts, and cemeteries. Included are historic photographs, many taken in the 1930's, from the files of the Great Smoky Mountains National Park. (NEC)

Identifiers-*American Indian Education, Fort McDowell Indian Reservation AZ, Reservation American Indians, Yavapai (Tribe)

During the four years of its operation, the Fort McDowell Indian (Reservation) Community preschool and kindergarten program has been directed toward three major areas of emphasis: (1) to provide activities and experiences that focus specific attention on meeting the special education needs of Fort McDowell youngsters; (2) to offer supportive services for parents, families and tribal elders; and (3) to strengthen the Indian community through its relationship with the child's maximum development in intellectual, social, physical, and emotional functioning. The Outreach to Parents'' component features participation in the classroom as parent aides, attendance at regular education classes, and at-home visits. Other components include family counseling, involvement of tribal elders and historians, and development of culturally relevant curriculum materials. A Yavapai language curriculum is being developed and taught. Twenty three children participated in the preschool program in 1978-79, with 18 in the pre-kindergarten class and 5 in the kindergarten. Effectiveness of the various components was measured at the end of the year with five tests, including the Caldwell Preschool Inventory, Denver Developmental Test, and Peabody Picture Vocabulary Test. Data analysis indicates that the project was effective in contributing to or modifying the behavior of the children in such skills as social, readiness, motor, language, and social relations. (DS)

Identifiers-*American Indian Education, *Navajo Nation, New Mexico (Navajo)

Educational consultants, town residents, Navajo tribal chapters and councils, the Bureau of Indian Affairs, the Navajo Division of Education, and local public school districts in Navajo, New Mexico, worked together to design an effective vocational program for an unskilled labor force sparsely settled within a large geographic area. The concept of building a program around ``vocational modules'' that would provide training for skills common to a variety of occupations became the central focus of the study and formed the basis for the research design. Feasibility conditions included: a small student population; a wide range of occupations for placement; a need for both youth and adult enrollment; preparation for jobs in the community and on and off the Reservation; community support; and the labor requirements of employers. Four major sources provided information: relevant research and studies; a community education survey of job openings and employee skill requirements and existing successful programs for Indians. Data analyzed in the context of the feasibility conditions formed the basis for conclusions and recommendations. The approaches used throughout the study and the copies of the survey instruments included in the appendices should serve as a model to assist others attempting to build vocational programs for small communities. Identifiers-American Indian Education, Public Services

Based on the procedures, materials, and resources used in A Study of the Feasibility of Vocational Modules'', this manual is one of the products of the study. Since guidelines for feasibility studies in the areas of public services that relate to human behavior are not clearly defined, it is hoped that this manual will guide, support, and lessen the efforts of other practitioners contemplating such studies. Procedures used by the Navajo Division of Education and American Institutes for Research in designing a vocational education curriculum for a community school serving Indians in Navajo, New Mexico, are generalized for more universal use. The major tasks selected as fundamental to a feasibility study are: (1) determination of goals and conditions; (2) identification of people and agencies; (3) analysis of resources available; (4) review of previous studies; (5) use of advisory committee(s); (6) collection of data; (7) analysis of data; (8) interpretation of data; (9) formulation of conclusions and recommendations; (10) statement of feasibility; and (11) time/task/responsibility chart. These tasks are fully described. Attention is given to the problems encountered; suggestions for solving the problems are provided. (NEC)

Identifiers-*American Indian Education, *Navajo Nation, New Mexico (Navajo)

To plan a curriculum for a vocationally based community school in Navajo, New Mexico, the Navajo Department of Education (with assistance from the American Institutes for Research) surveyed the nation for vocational education programs which had been developed or adapted specifically for use with American Indians or Alaska Natives. State directors of vocational education, state education research planning units, regional educational laboratories, relevant journals, and personal referrals identified 109 programs to study. Forty three of the 109 returned completed questionnaires, 34 of which were usable in compiling the catalog. All programs were in operation prior to November 1976 and were designed to teach one or more of the following skill areas: job awareness skills, job planning skills, school performance skills, job getting and maintaining skills, and specific vocational skills. Uniform data presented to describe each program include official title; skill area of emphasis; Indian enrollment, tribe, sex and ages of students; setting; materials, equipment and supplies used; number and qualifications of teachers; costs to students; length; and name and address of a program representative to contact for further information. An analysis of the contributions these programs made in developing the Navajo community school curriculum is reported in Chapter V of A Study of the Feasibility of Vocational Modules'' (the first document in this series). The American Indians of the Southwest their history and culture from ancient to modern times are the focal point of this resource manual based on an American history course developed at Gallup High School, Gallup, New Mexico. The course covers ancient culture and migrations of the Indian tribes now inhabiting New Mexico and the coming of Spanish explorers and Anglo settlers; it concludes with the Treaty of Guadalupe Hidalgo. This guide includes an outline for the two-semester course, performance objectives for students, maps, charts, sample tests and study guides, chronologies, and two detailed units of study titled Navajo Clan System and Distribution'' and Migratory Distribution''. Brief background is provided on southwestern geology and physical geography; on cultural differences and similarities among the Anasazi, Hohokan, and Mogollon-Mimbres cultures from which modern tribes descent; and on the history and culture of Pueblos, Zunis, and Apaches especially the apaches de nabahu'', the Navajos. A bibliography of 55 entries directs the reader to in-depth information on various aspects of Southwest history. (JH)

Identifiers-American Indian History, *Federal Indian Relationship, Fishing Rights, *Pacific Northwest Indians, Treaty Rights

Treaties have been upheld in the U.S. Constitution as the supreme law of the land''. U.S. courts have repeatedly recognized Indian nations as sovereign and, consequently, treaties between Indian nations and the United States have the dignity as well as the full force and effect of any other international agreement. While many treaties over the past 200 years have reflected the declining power of the Indian, the treaties with the Pacific Northwest Indians were treaties of friendship and peace. They were not signed in defeat but instead reflected the Indians' willingness to accommodate to the needs of the newcomers. Tribes of this region gave up title to nine-tenths of the present State of Washington; in return they reserved certain lands for themselves, most of which were sites at river mouths where salmon return to spawn. The U.S. generally agreed to provide medical care and other services and to protect the tribes from outside governments and hostile whites. These treaties have not lost their potency with age. This document treats areas of specific concern to the Pacific Northwest Indians. It gives a history of the kinds of treaties and their legal basis, justifies the preservation of reservations, and discusses land use practices associated with logging, dams and pollution, fish resources, the Boldt decision, fishing rights, water rights, and self determination. Descriptors-Acculturation, *Alcoholism, Cultural Awareness, Cultural Factors, *Culture Conflict, Drinking, Economic Disadvantagement, Evaluation Methods, *Males, *Mexican Americans, Models, *Program Evaluation, *Psychological Evaluation, Psychological Needs, Therapy
Identifiers-Alcoholism Treatment, Casa del Sol TX, *Chicanos, Hispanos

Alcoholism among Chicanos is principally due to structural deficiencies in the surrounding society. The frustrations and limitations brought on by the social structure constitute the principal cause of Chicano alcoholism. These include the major causative factors of poverty, racism and acculturation. In an attempt to address the problem of alcoholism among Mexican Americans, the Mexican American Unity Council implemented in 1974 Casa del Sol,'' a federally funded alcoholism project which uses the intrinsic strengths of the Mexican American culture as part of the treatment process. Therapy is based on cultural assessment, culturally individualized treatment plans and the study of Chicano culture and history. The staff of the project are both bilingual and biculturally trained. To assess the effectiveness of the program a study was conducted in 1976 on 17 of the clients between the ages of 17 to 48. A questionnaire was filled out by the inpatient counselor as the client came into the program and thirty days after he left the inpatient unit. Data analysis showed that the treatment process was significant in increasing the attendance rate at Alcoholics Anonymous meetings and employment status and number of days worked. The number of days of hospitalization, alcoholism related arrests, number of days the client drank and the amount of alcohol consumed all decreased. This type of bilingual, bicultural treatment is a viable, realistic concept. (DS)

Report on the Second Year of the Kumtuks Alternative Rehabilitation Program of Templeton Secondary School. Research Report 78-08.

Vancouver Board of School Trustees (British Columbia).
Pub Date-Sep 78
Note-27p.; Not available in paper copy due to marginal legibility of original document ; Funded in part by the Ministry of Human Resources and by the First Citizens Fund
Pub Type- Reports - Descriptive (141)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*Academic Achievement, Access to Education, Adjustment (to Environment), *Alternative Schools, American Indians, American Indian Studies, *Canada Natives, Dropout Prevention, *Dropout Programs, Educational Alternatives, English, Mathematics, Program Evaluation, Sciences, *Secondary Education, *Self Concept, Student Evaluation
Identifiers-British Columbia (Vancouver)

Kumtuks, established by the Vancouver School Board in 1976, is an alternative educational program for Native Indian adolescents who have the potential to complete Grade 12 but whose recent school histories show poor attendance, deficiencies in basic skills, low motivation, and poor self-concept. The goal of the program is to enable students to complete their education in regular secondary school; curriculum includes basic skills in English and mathematics, Native Indian Studies, science, and adaptive skills necessary for success in the school and urban community. In its second year (September 1977 to June 1978) Kumtuks enrolled 23 students, ages 12 to 16, whose average grade attainment at enrollment was Grade 7. Student progress was evaluated by the following measures: attendance, KeyMath Diagnostic Arithmetic Test, Woodcock Reading Mastery Tests, Canadian Tests of Basic Skills, and self-concept (adapted from How I See Myself Scale); student progress in a special values clarification program and staff evaluations were also considered. Student attendance rate of 96.4% compared favorably with the sponsoring school; 16 of the 23 students gained one or slightly more than one grade level beyond their entry placement; self-concept scores improved, and individual changes occurred in the values clarification program. All but one of the students plan to attend school in September 1978; 12 will return to Kumtuks. (JH)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Conference Reports, *Conservation (Environment), Environmental Education, Meetings, *Natural Resources, *Outdoor Education, *Recreation, Speeches
Identifiers-Wilderness and Individual Freedom Conference, *Wilderness Preservation

A fundamental statement of the only philosophy that can really lead to protection of wild lands emerged from the proceedings of the March, 1976 Wilderness and Individual Freedom Conference there must be more citizen participation in wilderness decisions because there is a great diversity of wilderness users and because we cannot separate what happens in the wilderness from what happens in our lives. Some 113 participants attended the three day conference that featured keynote speakers, panel discussions, small group seminar discussions, and slide presentations. Proceedings of all these events are included in this document. The script of the multi-media slide presentation on wilderness and individual freedom is given. Personal, management and broad perspectives on the historical and philosophical foundations of the American wilderness dream are summarized from a panel discussion on that subject. One keynote address deals with the rights and freedoms that must be protected for the individual citizen's use of wilderness resources and a subsequent seminar discussion lays the foundation for a charter of essential wilderness freedoms. Other panel discussions and discussion groups work with the problem of individual freedom and wilderness preservation. Proceedings on the final conference day were directed toward the major conference question of ``How can we maximize freedom and minimize impact in the wilderness resource?'' (DS)

State Appalachian Development Plans and Investment Programs for Fiscal Year 1979. Abstracts.

Spons Agency-Appalachian Regional Commission, Washington, D.C.

Pub Date-May 79
Note-81p.
Pub Type- Reports - Descriptive (141)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors-Child Development Centers, Community Services, *Depressed Areas (Geographic), Development, *Economic Development, Educational Development, Employment, Health Services, Housing, Income, Industrialization, Low Income States, Natural Resources, Needs, Population Trends, Regional Characteristics, Regional Cooperation, *Regional Programs, *Rural Development, *State Programs
Identifiers-Alabama, Appalachia, *Appalachian Regional Commission DC, Georgia, Kentucky, Maryland, Mississippi, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia

One component of the Appalachian Regional Commission's regional plan process is the annual review and approval of individual state development policies. The state summaries of proposed programs for fiscal year 1979 (for Alabama, Georgia, Kentucky, Maryland, Mississippi, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, and West Virginia) include an analysis of economic and social conditions giving population trends, employment rates, and per capita income; an assessment of the region's needs and potentials; a statement of goals, objectives, and priorities for the region; and an abstract of the investment program. Each investment program identifies and describes the projects and programs which will be eligible for funding by the Commission and their costs. Projects fall into the following categories: child development, community development and housing, education and vocational training, energy and natural resources, enterprise development, health, industrial parks, sewer and water systems, small farm demonstration, and research and development. Allocations requested from the Commission to fund the programs range from North Carolina's $9,800,000 to Pennsylvania's $26,900,000. (NEC)

Inequity of Human Services: The Rural Tennessee Dilemma.
Tennessee State Univ., Nashville.
Spons Agency-Department of Agriculture, Washington, D.C.
Pub Date-Jun 79
Note-268p.; Publication contributes to Cooperative Agricultural Research Program 516-15-29, Publication No. 49
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC11 Plus Postage.
Descriptors-Agency Role, Community Services, Cultural Factors, Decentralization, *Delivery Systems, Demography, Health Needs, *Health Services, *Human Services, Medical Services, *Needs Assessment, *Rural Areas, Rural Development, Social Agencies, *Social Services, Transportation
Identifiers-*Tennessee

Davidson, Williamson, Rutherford, and Cheatham counties of Tennessee were the setting for a study that sought to determine the types of health and social services provided to residents of rural areas and to assess the present status of the service delivery system. Interviews with both agency representatives and randomly selected household repondents examined the health and social services delivery systems in such areas as agricultural extension, alcohol and drug abuse, day care, counseling, family planning, employment services, and medical services. The study addressed specific problem areas, their possible causes, services gaps, types of services needed, and inadequately served geographic areas. The greatest needs identified were for medical services, public transportation, improved housing, day care, improved roads, and social and employment services. The single most important barrier to overcome in increasing utilization of existent services was one of cultural obstacles: the feeling that it is somehow wrong to accept free or reduced rates for services even when the need is great. Better service delivery could also be provided by (1) the development of services based in rural areas or branch offices, (2) the decentralization of service delivery, and (3) the development of special transportation programs. Existing community buildings also stand under utilized and could be used to house service facilities. (DS)

Identifiers-Oratory, Shawnee (Tribe), *Tecumseh

Tecumseh, famed for his skills as an orator, warrior, military strategist, and leader of his Shawnee people, has been called one of the great American leaders. In 1812 he assembled 3,000 warriors from 32 American Indian tribes in an effort to save the Indian lands from the onslaught of the white soldiers and settlers. It was the largest Indian army ever to fight against the whites. He was born in 1768 in Old Piqua, a prosperous Shawnee village of 4,000 people located near what is now Springfield, Ohio. By the time he was six white settlers were attacking Shawnee villages and taking over tribal lands. Tecumseh was respected as a leader among both his people and other tribes and he devoted his life to stopping the white invaders and saving the lands of his people. He believed that only by uniting into a strong Indian confederacy could his people have any chance against the whites and he traveled from Canada to the Gulf of Mexico enlisting other tribes in his cause. Between 1811-1813 his forces actively resisted the white armies of General William Henry Harrison, but in 1813 at the Battle of Thames Tecumseh was killed and the power of the Indian people in the Ohio Valley destroyed. Many legends grew up about his power and honor and Indian people remember with pride a great man who loved his people so much he died for them. This volume is one of a series of biographies of American Indian leaders; it is intended for grades 5 and up. (DS)

Identifiers-*Black Hawk, Illinois, *Sauk (Tribe)

Born in 1767, Black Hawk was the last great war leader of the Sauk Indians, who lived in the Rock River valley in Illinois. By age 25, he was a famed warrior and leader of his people who raided neighboring tribes until a period of peace and prosperity began about 1800. Various treaties of which the Sauk knew and understood very little deprived the tribe of their lands and paved the way for settlements. By 1831 the Sauk were forced off their land under the leadership of Black Hawk's lifelong rival, Keokuk, favored by the United States government. In 1832, Black Hawk led many of his people in a series of unsuccessful battles to reclaim their land. Black Hawk surrendered and was imprisoned after the Battle of the Bad Axe. The Indian leader met President Andrew Jackson before being returned to the Sauk reservation. Unhappy, Black Hawk left the settlement and in 1838 died in Iowa, named the ``Hawkeye State'' in his honor. Details of Sauk life and culture and nineteenth century American history are revealed in the biography, one of a series about American Indian leaders. The book is intended for grades 5 and up. (SB)

Identifiers-*Iowa (Hamilton County), *Spring Valley School IA

Designed to preserve the rich heritage of the rural school system which passed from the education scene in the 1930's and 1940's, this narrative, part history and part nostalgia, describes the author's own elementary education and the secure community life centered in the one room Spring Valley School in Hamilton County, Iowa, in the early decades of the century. Remembered are the octagonal clock hung over wainscoting; the dry sandwich in the lunch pail in the pre-waxpaper era; the dark recesses of the cloakroom where you searched for a lost mitten; the recitation bench to which you were called for class sessions; the double desks shared with a seat mate; the quotation or maxim given in response to roll call; the water bucket in lieu of plumbing and streamlined faucets; the open'' classroom in which older pupils were always available to help beginners; the annual visit of the county superintendent; the long noon hours of robust play on the schoolground and lengthy walks to and from school contributing to physical fitness; the bone tired weariness at day's end during a two-week cornhusking vacation''; and the school buses and improved roads allowing all weather travel and marking the demise of the one room school. The passing of the one room school includes the passing of an age whose educational philosophy emphasized book learning, goals for personal achievement, and family and community traditions. (NEC)

Identifiers-*Cultural Preservation

The guide describes fifty-four diverse federal programs and activities which are potential sources of financial and other assistance to those interested in various aspects of folklife. Potential users are folk artists; folklorists; researchers in linguistics, anthropology, and ethnology; members of ethnic or regional groups involved in presenting or preserving aspects of their cultural heritage; or American people generally. The efforts of John Wesley Powell, John Collier, Holger Cahill, the Archive of American Folk Song, the Bureau of American Ethnology, and other people and institutions are noted in a short introductory section describing 200 years of contradictory federal response to American folklife, culminating in the 1976 American Folklife Preservation Act. The programs described are organized by sponsoring federal agency, and are numbered sequentially for indexing purposes. The one-to-two page descriptions note what assistance is available, for whom it is intended, and whom to contact for more information. Examples are given of assistance previously granted under some programs. There is a briefly annotated bibliography of six publications dating from 1975 which contain detailed information of the federal government and its programs. (SB)

Identifiers-Incorporation, *Kansas (Manhattan), *University for Man KS

Based on the educational philosophy of ``anybody can teach, anybody can learn'', a free university offers ungraded, unaccredited classes to the general public, without charge, on any topic such as societal issues, arts and crafts, intellectual subjects, and practical skills. To plan a program, only a borrowed phone and office, human energy, as little as $80 per year, and from 4 weeks to as long as 8 months are needed. The result of a need to help people duplicate the success of 12 free university projects established in Kansas from 1975-1977 by the University for Man (UFM), the manual provides detailed how-to-do-it guidelines on starting, running, and developing a community education program for a small or medium sized Kansas town. Eleven chapters, each written by one of the VISTA volunteers who directed the 12 pilot projects, cover all phases of the operation. Chapters discuss how to begin the project, timetable, project brochures, use of photographs, registration, program publicity, coordinator's role, advisory boards, incorporation of project, funding, and evaluation of project. Additional assistance in program planning may be obtained from the National Free University Network (FUN), a consortium of over 200 free universities and learning centers headquartered at UFM in Manhattan, Kansas. Identifiers-*Community Holding Power, *Iowa (Lohrville)

The Lohrville Career Education Model (LCEM) is a successful program to influence the decision of rural high school students to remain in the community after graduation and to help them examine local occupational opportunities and potential. The LCEM consists of a 7-unit course in local history, rural living, rural economy, rural attitudes, personal attitudes, career opportunities, and senior citizens. The course is taught to seniors in two-week sessions in the fall and spring. Following each session seniors are placed for two weeks in the work environments of local community resource persons. Program evaluation is by pre- and post-test and final examination. According to 1978 pilot test results senior students can meet program objectives of: (1) learning local history and rural philosophy; (2) becoming aware of local career opportunities; and (3) improving their attitudes towards rural life, careers, community growth, and education. The program should be continued longitudinally. It should be taught on a limited basis at the junior level and expanded to 6-8 weeks per semester at the senior level. Appendices include attitude surveys, course syllabus, student activities and objectives for 32 career subject areas, student and resource person reports, and evaluation instruments. (SB)

Identifiers-Rural Futures Development, Southern Rural Development Center MS

In August of 1978 the Southern Rural Development Center (SRDC) published an annotated bibliography on Education Needs Projection and Rural Development; this synthesis paper follows that bibliography and is intended to relate some of the useful applications derived from the survey of the literature. Five papers are included in the synthesis. The first, Education Needs Projection and Rural Development'', is by Dr. Gerald C. Wheelock, Chairman of the SRDC Functional Network; it summarizes the network's findings as it documented the extent and specific direction of trends in collaboration between educational complexes and rural communities. The second paper, also by Wheelock, deals with the state of the art in forecasting education needs for Southern rural development. Rural Futures Development Strategy'' describes the development of a successful, planned change model that actively invites students, teachers, administrators, and citizens of the community in determining what, how, and when something might be done to improve the educational opportunities in the community. The fourth paper presents an historical overview of an industry service program of vocational education that has been operating in Mississippi for about five years. The final paper bears the title, Communication Strategies in Public Policy Decision Making: An Analysis of Processes in Major Needs Assessment Models from a Systems Point of View''. (DS)

Identifiers-*Mapping, *Pakistan

As part of the project to universalize primary education in Pakistan by the mid-1980's, 1977 participation rates of boys and girls in rural primary schools in the Federal Capitol Territory have been determined through school mapping procedures. In three of four Territorial headquarters areas about 35% of boys and between 7% and 16% of girls attend primary school. In the fourth area, 17% of boys and 28% of girls attend. For the four rural areas combined, 35% of boys and 13% of girls go to school, as *compared to attendance rates of 51% for boys and 49%* for girls in the city of Islamabad. Among all Territorial primary aged children, only 39% of boys and 23% of girls attend school. Many rural children, especially those in remote areas and girls in general, are denied educational opportunities because of lack of schools or inefficient organization and operation of existing schools. All districts in Pakistan should initiate a similar mapping study in order to describe the present situation and determine what has to be done to improve the educational opportunities for rural children. These studies should be the basis for all educational development in Pakistan. (SB)

Identifiers-Alaska (Lime Village), *Athabascan (Tribe), Denaina (Language), Oral Tradition

A cross section of Athabascan life as related by eight inhabitants of Lime Village, Alaska, is given in this document. The short narratives are printed in English and in Dena'ina. Illustrations accompany the text. The stories tell of making eagle feather robes, birchbark or mooseskin boats, a raincoat from black bear intestines, and boots from fish skins. Another story describes how to make a birch bark basket and then brew tea in it by dropping hot stones into the water. A recipe for Indian ice cream includes such ingredients as cooked salmon, moose grease, berries and sugar. Fishing methods include blackfish traps, dipnets, spears for whitefish, and nets for salmon. Wormwood soaks and hot packs are listed as native remedies for blood poisoning, with blackberry tea as a cure for stomach ache or constipation, and red currant bark tea as an aid for those with tuberculosis. The stories also tell of hunting sheep, seals, mountain squirrels, ducks, and black bear. (DS)

Identifiers-*Alaska (Buckland), *Inupiat (Language), Oral Tradition

Printed in both Inupiat and English, this 32 page booklet recounts stories of native life in Buckland, Alaska. It is printed in large type and simply written; illustrations accompany each short narrative. Several stories are told by Evans Thomas who remembers his boyhood days as he fired a shotgun for the first time, shot his first seal, broke a reindeer to the harness, and hunted a wolf. One of his stories is particularly humorous as he tells of his father's efforts in learning how to stop a new motor boat. The intermeshing of traditional and new ways of life is particularly striking; the stories deal with seal, whale, and caribou hunting, dog teams and deer sleds, yet they also tell of using guns, telescopes, motorboats, and snow-go'' machines. Semi-dormant volcanoes, bombing by the Japanese, fierce storms, isolation, high fuel costs, and bureaucratic harrassment are some of the conditions peoples of the Aleutian village of Atka, Alaska, have had to contend with in years past. In this illustrated booklet, printed in both Western Aleut and English, Lydia and Moses Dirks, lifetime residents of Atka, recount happenings from years past. The short stories tell of such events as fishing, reindeer hunting, fox trapping, the art of basket weaving, and of a storm so fierce people thought their homes would be blown away. A theme of dissatisfaction with various government policies emerges from some of the narratives. One story tells of the use of the island as an air strip during World War II and the mess that was left behind when the strip was closed. It is mentioned that some people think the U.S. Navy is trying to force the people to leave the island and examples are given of some Navy actions that seemingly lend credence to that idea. The sea otter is described as a nuisance, protected by the government, yet so abundant that otters are stripping the area of food sources commonly used by the Aleut people. This document is intended for use in bilingual education instruction. (DS)

Identifiers-*Alaska (Deering), *Inupiat (Language), Oral Tradition

Intended for use in a bilingual education program, this document is printed in both Inupiat and English. It is a collection of 32 very short tales about life in Deering, Alaska, and was developed and prepared by Marie Karmun, an Inupiat language teacher. It is printed in large type, written in simple words, and illustrated. Most of the stories are presented from a child's point of view. Two of the stories tell of a landing field that was built near the village and of an airplane whose parts first came by ship and then were assembled. Other stories describe artifacts and fossils found in the area. The children also tell of making noise outside of a newlywed couple's home with the hope they will be given candy so they'll go away. Some of the tales are concerned with the mining history of the area and mention the abandoned town of Candle, an old dredge, and a gold mine that is worked each summer. Other tales deal with roadbuilding, diamond baseball, the supply boat, the railroad, the school, and an old superstition about the devil's light on the mountain. (DS)

Villagers on the Aleutian island of Akutan must share their island with a volcano, an active, smoking one that soils clothes hanging on the clothesline and in winter blackens the snow. Winters are particularly hard on the island. Strong winds blow and as ice clogs the creek the town's electric supply is cut off in February and March. Akutan is a long village, located near a bay, and it contains 20 houses, a small village store, and a 12-student school. Twice a year a priest comes to Akutan's church. In the summer a crab processing ship comes and everyone from the village works on the ship for the three months of its stay. Akutan has no airport, but at least once a week a sea plane brings mail and freight; a mail boat also sails from Kodiak. There are no telephones on Akutan; outside communication is by radio. Hunting on the island is limited to birds: ducks, geese, and ptarmigan. At one time there were many fish around Akutan, but now very few remain. This scenario of life on Akutan is printed in both Eastern Aleut and English and is intended for use in bilingual instruction. It is printed in large type, illustrated, and written in simple words. The twenty short happenings are related by a lifelong resident of the village. They include descriptions of physical features of the area as well as aspects of the life style of its inhabitants. Identifiers-*Alaska (Saint Marys Village), *Yupik

Yup'ik Eskimo children from the fifth and sixth grades of St. Mary's Public School, St. Mary's, Alaska, wrote this collection of 28 short stories. The 55 page book is printed in both Yup'ik and English. It features large type and illustrations drawn by the children and is intended for use in a bilingual education program. Some of the stories deal with hunting moose and seal, others with fish camps and drift fishing. Children also describe their favorite forms of recreation, including ski-doo riding, steam baths, sledding, swimming, basketball, ice skating, skiing, and the lap game. Two of the tales tell of the freezing of the river, the Spring ice break-up, and the annual Spring floods. The children also describe physical features of their village, including the school, the town water supply, the supply barge, a cannery, and the mission airstrip. (DS)

Transmitted orally for generations until the Eskimo language became a written one, the eleven St. Lawrence Island legends compiled in this volume for high school students tell of feats that were accomplished through supernatural power. Meant for both entertainment and instruction, the tales convey wise council indirectly through the conversations and acts of animals. Each legend is presented in the St. Lawrence Island Yup'ik language and in English and is accompanied by black and white illustrations by J. Leslie Boffa. Titles are: Aghnaghaq Aggqutkeqkaq'' (A Girl for a Sacrifice''); Qaala''; Piqalaq''; Anglegutkullghiit Quyillgaaghet Angufqaghtekangi'' (Brothers in the Storm''); Kingugmeng Aghnaq Anglistikaq'' (A Woman Who Raised a Worm''); Kaangut Igleghallghat'' (The Flight of the Geese''); Tutakemsegaq'' (Wood Carver''); Aghnaghaghaq Tagitugmi Iflakaq'' (The Girl Who Was Lost in the Fog''); Ayvanga Kaangqwaghtaqayugek'' (Clashing Rocks''); Aaygu Ayemaqngan'' (Broken Arrow''); and Tanqiq Tuqaagaqngan'' (When the Pale Moon Went Fainting''). Identifiers-Alaska, Cultural Contributions, *Koyukon (Language) *Songbooks, Oral Tradition

Nineteen songs sung at potlach activities to honor the dead have been transcribed and compiled to foster greater understanding and appreciation among Alaskan school children of the place of songs in the life of the Central Koyukon Athabaskans who believe that singing and dancing allow emotional release from the sadness of losing a loved one. The songs, never directly naming the deceased person, tell of how much the person is missed by his family and friends and of the good deeds the person did when he was alive. The songs fall into three basic types: (1) the mask dance songs, sung with the typical Eskimo words accompanied by the beating of the hand drum; (2) the washtub songs, to which the people dance around a peeled spruce pole moving a piece of calico up and down with their hands; and (3) the stick dance songs, sung only during the proper time at the Feast for the Dead. Each song is presented with lyrics in Athabaskan and English, a brief history of the subject of the song and its composer, and appropriate illustrations by Dinah Stephenson. Also included is a biographical sketch of Madeline Solomon, native Alaskan educator who assisted in compiling the songs. (NEC)

Four short stories taken from Alaskan oral tradition are written in plain terms and presented in large print with illustrations on each page. The Little Mouse'' describes how a courageous mouse swims across a river only to discover it is just a man's footprint. In The Loon and the Muskrat'' two animals become possessive of the lake where they live, then decide to share the territory. Daisy and Tulagaq'' is the story of how a cleaver ground squirrel outwits a raven. In The Fox and the Raven'' the crafty fox flatters an ugly woman and receives a gift, but the honest raven receives nothing. The Inupiat version is also included. (SB)

Four simple ``how'' stories from Alaskan legend are presented in large type and amply illustrated. In ``How the Caribou Lost His Teeth'', Siqpik's only son is eaten by the sharp-toothed caribou, so Siqpik feeds the animal sour berries to make his teeth fall out. ``How the Loon Got His Spots'' relates how the raven paints the loon's back with soot then throws ashes on the loon's head in anger. ``The Pike and the Mudsucker'' tells why the pike has a boney body and the mudsucker has a boney tail. In ``How the Beaver Got His Tail'' the beaver and the muskrat exchange their original tails. (SB)

Taken from Alaskan oral tradition, the five how'' stories are written in simple English prose. The Four Qayaqs'' explains why the porcupine has no fat on his stomach and the beaver has none on his back. Ptarmigan and the Sandhill Crane'' tells how the two very different birds come to look alike. In Why the Dall Sheep Lives in the Mountains'', Qayaq's wiggling toes scare a man into the mountains where he becomes a sheep. Why the Caribou Has Long Legs'' relates how the Qayaq uses a stick to beat the short hind legs of his caribou wife to make her legs grow. How Three Boys Became Animals'' is the story of three brothers left alone who turn into a wolf, a fox, and a raven so they can go outside. The large print book has illustrations on each page. (SB)

Written in simple prose, the story tells how the Tsimshians near present-day Prince Rupert, Canada, first happened to meet the Whitemen. Sope and a group of Tsimshian men are hauling in their fishing canoe when they sight a sailing ship. All the men flee in fear except Sope who is tied to the canoe. The Whitemen row ashore in rowboats. When they offer Sope bars of soap as a gesture of friendship, he thinks they are saying his name. He laughs and calls back his frightened friends to meet the new arrivals. The story is presented in large print with illustrations on each page. (SB)

Identifiers-*Future Farmers of America

Leadership training and recognition of leadership skills have been a cornerstone of the Future Farmers of America (FFA) since its inception. To determine if certain personality characteristics are associated with individuals who hold leadership positions and if the level of leadership reflects particular personality traits, 147 FFA chapter and state officers from across the United States who attended leadership conferences at the National FFA Center in Alexandria, Virginia, during the summer of 1976 were sampled. The Myers-Briggs Type Indicator was utilized to assess personality traits of the FFA officers and describe the behavioral correlates associated with each dimension of personality based on Jung's Typology. Results indicated that FFA officers are more often classified as: (1) extroverted rather than introverted preferring public contact and dealings with people over paper work; (2) sensing rather than intuitive accomplishing immediate tasks with attention to detail and routine; (3) feeling rather than thinking using tact when handling people; and (4) judging rather than perceptive working well within a structured system. An FFA chapter officer differed from a state president in only the sensing-intuitive dimension; 74% of chapter officers were classified as sensing as compared with 50% of state presidents. The information gained should be considered in improvement FFA leadership training programs and advisement functions. (NEC)

Identifiers-*Pakistan, Topography

Widely differing local conditions, increased community participation in education, more lifelong education, and decentralization of schools are factors which should affect the architecture of rural primary schools in Pakistan. Also significant are the results of a 1977 survey which indicate that building quality is unrelated to school attendance and that regardless of building availability most instruction occurs outside or in rustic sheds. These factors lead to a new basis of rural school building design which accomodates exterior spaces for school activities and reduces the use of inside closed space to storage or protection from inclement weather. A standardized one-room school building, modified for local climate, thermal conditions, building materials, and construction methods can provide adequate educational space for rural boys', girls', and coeducational schools. This lockable storage/office building, a shed structure, a boundary wall, and essential furnishings can be provided for approximately 1/8 the amount currently being expended for unused school buildings. The building should be sited so as to maximize available sunlight and prevailing winds. The detailed appendices use maps, charts, and architectural illustrations to present a climatic analysis of Pakistan, materials and structural requirements of different construction methods and designs, and architectural guidelines for various climates. Identifiers-Third World

Education for rural areas must go far beyond the concept of formal schooling; it must become a system of learning arrangements in which the learner, in response to his environment, is the chief agent of his learning. There is no single model or educational approach; programs must be adapted to the varying circumstance or situations. When providing learning arrangements, change agents should consider four points: (1) a leading role will be played by local people; (2) assistance is more likely to work if it is in response to an initiative from the people; (3) external assistance should aim at strengthening institutions within the community; and (4) resources should be those of the community and external ones supplementary or enabling. Change agents must work ``with'' rather than ``for'' the people. All too often formal education prepares students for an urban environment and does not meet rural needs. Teachers must make education appropriate to their students' environment. Schools and school teachers must become more involved with education outside the classroom, including adult education, project specific education, community health education, family life education, and nutrition education, all of which contain ample opportunity to learn by doing. The most precious and under-used resource in the Third World is the human one. The great masses of people can be used to help themselves and become teachers to others as well. (DS)

Identifiers-Bureau of Indian Affairs, *Choctaw (Tribe), Mississippi

The Choctaw Career Education Program, established in 1975 to serve grades K-12 in six BIA-operated Choctaw schools, is an attempt to provide a long-term solution to the problem of limited occupational and career choices for Mississippi Choctaw students. The two-component program is supported by a Career Resource Center. The K-8 component develops self- and career awareness at the elementary grades and explores various career clusters at the junior high level. Aided by two career curriculum specialists, teachers have integrated career education into nearly every elementary and junior high class. Generally, teachers at that level have a positive view of career education and of the program. The high school component consists of career counseling for students, especially upperclassmen, several times per year. Counseling deals with self-concept, values clarification, objective decision making, and goal formulation. Despite many problems, the program is accomplishing its aims. Noticeable impact is expected in the next three to six years. However, the program cannot compensate for poor academic preparation or lack of academic skills. Therefore, Indian education should be culturally pluralistic so that Indian students can function in both cultures. School curriculum should be measurable and learning for the ``real world'' should be essential in secondary education. (SB)

Identifiers-Bureau of Indian Affairs

Indian students who have withdrawn from public schools for various reasons may receive alternative education at Bureau of Indian Affairs (BIA) Boarding Schools, but they may also face academic, environmental, and personal problems. Attending a boarding school involves a radical culture break. Students are often far from home, deprived of parental guidance, family support, and cultural reinforcement. BIA schools have historically discouraged the use of the students' native tongue. Students are plunged into a strange, faster-paced environment with confining rules and regulations. Often there is little counseling and many students feel no one cares about them. Peer pressure can be intense. The curriculum itself can be a problem in that many students are one to three years behind in academic skills even though they are of average or more intelligence. This contributes to a high dropout rate. As a result students become dependent upon this strange new system, its rewards, and its objectives. They exhibit depression, anxiety, and poor self-concept, and tend to abuse alcohol. Indian students can help alleviate the problems inherent in boarding school life by making and communicating openly with close friends at the school. Schools can help by aiding the transition to boarding school life. (SB)

Identifiers-*American Indian History, Nevada, Reservation American Indians, *Walker River Paiute (Tribe)

The Northern Paiute people of Nevada's Walker Lake area were known as the Agai Diccutta (Trout Eaters); they called themselves the Numa, or the People. For as long as anyone could recall, they had lived in the area, catching the huge trout from the lake and harvesting the pinon nuts and other foods from the surrounding desert. In the 1820's the first contacts were made with the white intruders, and when gold was discovered in California in 1848, a large wave of white immigrants struck. Food and hunting sources were destroyed; the people were attacked by the intruders and the diseases they brought with them. By 1859 two reservations were set aside, one at Pyramid Lake and the other at Walker; but, within ten years the Nevada legislature was pushing Congress to open up this land to whites. The People tried to live peacefully on the reservation, but their attempts at farming were thwarted as white farmers diverted the irrigation water supplies. The Ghost Dances of 1870 and 1890 reflected the Indians' despair as they sought to implore God and the Dead to return and dispel the intruders. Efforts by whites continued to reduce or abolish the reservation, and finally in 1906 the People lost most of their reservation lands. By 1909 government policy sought the destruction of the People's culture. This history of the Walker Lake Paiute, told from their point of view, continues to 1974 as it documents the People's struggles to regain lost lands, retain their culture, and establish the rights so long denied them. Intended to complement the text Walker River Paiutes: A Tribal History'', this student workbook, like the text, emphasizes the details of Walker River history from the People's point of view. The exercises, coordinated to the chapters of the book, are designed to measure and improve the student's understanding of the material. Some exercises reinforce basic skills: reading proficiency, vocabulary, content retention, and the ability to use maps, graphs and charts. Other exercises asks students to question their assumptions, draw conclusions from their reading, and explore other sources to expand their knowledge. Attention is devoted to learning how to recognize bias and prejudice in an account and how the author's choice of words can indicate his attitudes. The format includes questions and answers, fill-in-the-blanks, matching exercises, word puzzles, games, and lists of class projects and discussion topics. (Author/DS)

Descriptors-*Access to Education, *American Indian Education, Biculturalism, Bilingualism, Educational Disadvantagement, Educational Legislation, Educational Needs, *Educational Philosophy, *Educational Policy, Equal Education, Family School Relationship, Federal Indian Relationship, Government Role, *Participation, Planning, School Community Relationship, Self Concept, *Self Determination

Identifiers-Bureau of Indian Affairs, Cultural Contributions, *Indian Controlled Schools, Office of Indian Education Programs

The exigencies of contemporary native American education require a thorough review. Issues considered in establishing a viable conceptual framework are Indian control of education, role of the Bureau of Indian Affairs and Office of Indian Education, application of federal programs and appropriations, characteristics of the new generation of Indians, inclusion of Indian culture in the curriculum, utilization of public schools, newly recognized Indians, relationship to American education, and student needs and enrollments. Dimensions critical to developing a broader approach to Indian education are family and home, tribal culture, government, religion, economic-commercial, media, health, welfare, museums, justice-correctional, time, and educational agencies. Policies that could change the direction of education call for inclusion of all schools, Indian self determination, quality education, shared responsibility and involvement, and technical assistance. Practical applications include construction priorities, changes in the quality and quantity of information reflecting Indian education, strategies for improving school holding power, full utilization of school facilities, and educational evaluation. Conclusions indicate that schools providing educational services can no longer be isolated from Indian or American life, educational leaders must possess a new toleration and flexibility, BIA Indian Education has a new advocacy role, and Indian control of schools is becoming a reality. Identifiers-Algonquian (Language), Hunting, Micmac (Language), *Micmac (Tribe), New Brunswick, Nova Scotia, Prince Edward Island

Just as the Micmac word wejkwapniaq'' may be interpreted in several ways, the title of this compilation of fact, folklore, and history of the Micmac people can be interpreted to mean The Dawn of Nova Scotia History'' or The Coming of New and Bad Things for the Micmac''. This teacher's guide provides information on the land occupied by these native Canadians, their political structure and role and qualities of tribal chiefs, education, religion, and language. Aspects of Micmac education detailed are: implement making (bows and arrows, lances, cradles, canoes, snowshoes); medical and first aid practices; methods of fishing, hunting, and trailblazing; preparation of food, clothing, and shelter; and how to tell time by observing natural events. Language information explains how the Micmacs formed place names and lists names of manufactured objects, seasons and months of the year, animals, and spiritual words. A twenty question test, seven classroom projects, and a bibliography are included. Appendices provide maps showing where Micmac reserve bands are located in Nova Scotia, New Brunswick, Quebec, and Prince Edward Island. (NEC)

Identifiers-Acadia National Park, National Diffusion Network Programs, *Project Adventure

The workbook of field ecology is for use by high school science students participating in two and one-half day weekend trips to Acadia National Park, Maine, as part of Project Adventure, an interdisciplinary program aimed at educating the whole student through experienced-based learning in academics and a physical education program in the outdoors. Physical education activities during the weekend include hiking, rappeling, and cliff climbing. Academic activities rely heavily on observation and include the study of water, dams, fallen trees, beaver huts, rock slides, vegetation, ecological relationships, local history, seaweed, sand, animal life, ponds, and shoreline. A scavenger hunt is included which encompasses all aspects of the Park. Introductory material includes charts, maps, history of the area, and vocabulary. There is a follow-up exercise concerning student reaction to the weekend. The availability of additional information on Project Adventure is noted on the cover sheet. (SB)

Colonial Life. A Visit in Which the Students Meet History, Each Other, and the Community.

Identifiers-Adventure Education, Community Studies, Massachusetts (Salem), National Diffusion Network Programs, *Project Adventure

As part of Project Adventure, a specific unit within a 12-week Colonial History course taught at a Massachusetts high school was designed to: involve students with each other, their community, and local history; add a significant social and experiential dimension to the course; use a unique system of student evaluation and grading; and be reasonably handled by a busy teacher. Teaching the unit involved (1) contacting community resources; (2) writing detailed group assignments; (3) carefully selecting small student groups from divergent social groups; (4) managing the program in class one day per week; and (5) conducting a final all-day field trip. Student evaluation was based primarily on written and oral group reports and on individual quiz performance. Student response to a questionnaire and written opinions of their own efforts and those of others in their group were also considered. Teacher evaluation of the program and elements essential for its success are noted. The appendix contains one-page student assignments focusing on the historical aspects of local cemeteries, churches, and houses; early migration from Massachusetts; Indians of the area; and the seagoing history of Salem, Massachusetts. A cover sheet notes the availability of Project Adventure materials. (SB)

Project Adventure, an innovative educational program combining experiential learning in academics with a rigorous physical education curriculum at the high school level, was successful in its first year (1971-72). Project staff attempted to: develop and teach the physical education component; involve students and faculty in experiential dimensions of the existing science and social science curriculum; and develop student self-confidence. Six quantitative pre- and post-tests were given to the 224 participating high school sophomores (120 males, 104 females). Both boys and girls significantly improved their performance on virtually all physical education tests and generally increased their self-concept. Girls showed significant gains in self-concept. Contrary to expectations, no group significantly changed their perceptions of their physical selves. Also unexpectedly, girls in the program performed as well as boys despite the outdoor orientation and emphasis on materials usually associated with boys. At the end of the year participating students reported greater self-confidence (especially due to the physical education component), perception of less external control, and more activity both in and out of class. Recommendations included continuation of the program and periodic evaluation. The cover sheet notes availability of Project Adventure materials. (SB)

Identifiers-Adventure Education, Massachusetts, National Diffusion Network Programs, *Project Adventure, Rotter Internal External Locus of Control Scale, Tennessee Self Concept Scale

High school sophomores participating in the second year of Project Adventure, an educational program expanded to include community service, experiential learning, and a rigorous physical education program, showed improvements in physical ability and self-concept consistent with improvements shown by students in the program's first year. Quantitative evaluation of the physical education component involved administration of six pre- and post-tests to 231 tenth grade students at Hamilton-Wenham Regional High School in Massachusetts. One instrument was discarded and one revised. The other four were the same tests used the previous year. As in the first year, both sexes demonstrated improved physical ability and girls showed a significant improvement in self-concept. The favorable response of girls to the outdoor physical education program seemed to influence their self perceptions directly. Boys became more active in class discussions, as had the girls the year before. Boys' and girls' concepts of the school climate improved. Qualitative evaluation (community response, parental opinion, student comment) was also positive. Data from the third year is needed to assess the project's contribution to the school as a whole. Availability of project materials is noted on the cover sheet. (SB)

Rural Sociology: A Field of Basic and Applied Research'' was the theme of the 1977 annual meeting. Participants at the convention heard 50 reports in 14 sessions, as well as five special panels and two special sessions. Most of the papers, research reports and essays presented in the sessions are included in this document and serve as the meeting proceedings. The 44 papers are organized into twelve sections. Section One on population has three papers; Section Two, dealing with quality of life, contains four papers. The third section has two papers on occupations and in the fourth section are seven papers on aspects of education in the rural South. In Section Five are four papers regarding status attainment research; two papers on mental health are in Section Six. Section Seven contains four papers on policy research. Rural Development and Social Change'' is the title of Section Eight which contains six papers. The ninth section has three papers on evaluation of rural development programs and the tenth section has three on environment and recreation. Three papers in Section Eleven treat rural health care services. The Pot Pourri'' section has three papers bearing the titles of Attitudes Toward Local Police: A New Look at the Racial Variable''; Misinformation: A Basic Problem for Community Correction Agencies''; and Comparative Organizational Properties and Interdependence in Interorganizational Dyads''. Appendices list meeting participants and the 1977 program of the Rural Sociology Section. (DS)

Identifiers-Experiential Education, *Hawaii, Hawaii Outdoor Education Center

In cooperation with the Hawaii 2000 Outdoor Education Center, a summer ecology course for teachers on the Island of Hawaii developed and conducted an environmental school in Hawaiian outdoor education for 18 children between the ages of 9 and 13. Thirteen teachers enrolled in a California State University field course in environmental education worked with the Hawaii 2000 group in setting up the course, conducting it, and at its conclusion, in compiling a curriculum guide for Hawaiian outdoor education. The course outline and requirements, teacher preparation, directions for class projects, timetable, evaluation methods, and supply and equipment lists were all included in the guide. The resident camping experience featured projects centered around three major topic areas: sun and sky, water, and land. The sun and sky classes included construction of a solar oven and sun clock, ozalid printing, and pinhole photography. In the water segment of the course, students learned how to snorkel, aquatic safety rules, adaptation techniques of marine animals to the rocky shore, and how to collect and press algae. The land activities included hiking, first aid, sing-alongs, non-utensil outdoor cooking, sand casting, sand painting, Japanese fish printing, and tie-dying. Although projects outlined in this guide are geared toward an Hawaiian setting, use of this document could carry over to Mainland outdoor education classes as well. (DS)

Attitude Formation in Introductory Science Courses: An Application of Dissonance Theory.

Pub Date-78
Note-8p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (51st, Toronto, Canada, March 31-April 2, 1978)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Affective Tests, Behavior, *Cognitive Processes, *College Science, Educational Research, Negative Attitudes, *Perception, Science Education, Science Instruction, *Student Attitudes

This paper describes the results and implications of an investigation, based on dissonance theory, into attitude formation in introductory college science courses. The results of the study show that students who learned in ways they preferred registered a more positive attitude toward the course than did those who learned in ways they did not prefer. Course preference was not found to be related to achievement. Dissonance is experienced by students enrolled in a course in which they feel unsuccessful. Acquiring a negative attitude toward the course represents a natural move on a student's part to reduce dissonance by reducing the importance of achievement in the course. The paper adds that when students are provided with instructional experiences compatible with the manner in which they prefer to learn, dissonance is reduced, and course attitude is improved as the negative effects of achievement are somewhat counterbalanced. Identifiers-Functions (Mathematics), *National Council of Teachers of Mathematics

This yearbook is intended to be primarily a highlighting of the essential elements of those basic mathematical understandings which should be continually developed and extended throughout the entire mathematics curriculum. An attempt is also made to illustrate training in mathematical modes of thought, sometimes labeled problem solving or creative thinking. A second objective is to define and illustrate some classroom procedures and their psychological bases, which are appropriate for all levels of instruction. The third objective is to assist teachers and supervisors in extending and applying the ideas of the book in their own situations. Chapter topics include number and operations, relations and functions, proof, measurement and approximation, probability, statistics, language and symbolism, modes of thought, implications of the psychology of learning for the teaching of mathematics, and promoting the continuous growth of mathematical concepts. Identifiers-Illinois

Materials are presented which were used for a consulting/linkage skills training program. The program is divided into three phases. In phase one, various training techniques such as presentations, case studies, role-playing, and simulations are used to lead the participants through a series of knowledge-increasing and skill-enhancing activities. In phase two, trainers dealt with the topics of problem solving, conflict management/utilization, and power/influence. The skill areas focused on during the phase three training are implementation, evaluation, diffusion and dissemination. (Author/BB)

Descriptors-*Career Choice, *Career Opportunities, *Engineering, Equal Opportunities (Jobs), *Females, *Professional Occupations, Science Education, Sex Discrimination, Womens Education

Engineering as a profession for women is examined. Although 1.0% of the engineering population is presently female, undergraduate enrollment has been increasing steadily since 1970. Some universities today have women representing 10-15% of their engineering enrollment. Beginning salaries are higher for female engineers than for male engineers, but there is controversy as to what happens after the first job. Initially women have the job advantage, but once employed, the promotions come more slowly and salaries are lower on the average. (Author/MA)

Descriptors-Academic Achievement, *Educational Research, Educational Resources, *Elementary Secondary Education, *Laboratory Equipment, National Surveys, *Program Evaluation, *Science Education, Science Equipment, *Science Facilities, Teaching Methods

This report is a study conducted by the Australian Council for Educational Research to evaluate the influence of science material resources, provided under the Australian Science Facilities Program, on science education in Australia. Under the Australian Science Facilities Program some $123 million was spent, between July 1964 and June 1975, on laboratories and apparatus in both government and non-government schools. The study is based on the examination of three levels of impact of the program: (1) the impact of the program on the standard of science facilities in schools of different types; (2) the influence on the standard of resources on the quality of science teaching; and (3) the effects of better resources and different teaching methods in student achievement. In addition, an exhaustive examination of the administration of the program is reported. The report shows that while there was a general improvement in the standard of resources for science teaching over the period of the program, some schools with inadequate facilities remain. Questionnaires used in the study and a list of references are also included. (Author/HM)

Identifiers-Instructional Support Systems, *New York City Board of Education

This curriculum guide for junior high mathematics teachers was developed to meet the diverse needs of students in School District 18 in the City of New York. Three different modules and sequences are presented. The first module contains instructional objectives which are necessary for life-related activities. The second module develops basic concepts and skills and the third offers additional mathematical enrichment. Teachers evaluate the mastery of the objectives by using teacher-generated tests. The time required to complete each module should be dependent on the needs of each class and the judgements of the individual teachers. (SA)

Identifiers-*National Science Foundation

In order to develop a model mathematics preparation program for elementary teachers, faculty were drawn together from the Departments of Mathematics and Mathematics Education at The Ohio State University and representatives from the Columbus Public Schools. This two-year project involved 95 students, primarily freshman and sophomore women, who had demonstrated competency in high school mathematics. Following the completion of the program, several recommendations were presented. The project staff and consultants generally felt: (1) that study in instruction and math content should be coordinated; (2) that programs in preparing teachers to teach math should be upgraded by consulting mathematics faculties, education faculties, and public school personnel; (3) that school experience should be included in the coordinated content-methods instruction; and (4) programs in teacher training in mathematics should contain at least two mathematics courses. This work represents the development of computer tools for undergraduate students. Emphasis is on automatic control theory using hybrid and digital computation. The routine calculations of control system analysis are presented as students would use them on the University of Michigan's central digital computer and the time-shared graphic terminals such as Computek, Tektronix 4002 or 4010. Root locus frequency response and time response are given. The hybrid computation system is time-shared by five terminals, each of which independently examines a variety of problems which may be last in the framework of the general system. (Author/SA)

This teacher's guide provides Elementary Science Study (ESS) units that can be used with students in grades 1-12 in special education programs. The ESS units represent an interdisciplinary approach to learning and emphasize "hands-on" activities. Activities include Mirror Cards, Pattern Blocks, Clay Boats, Mapping, Earthworms, and Structures. Each activity provides overview, objectives, methods, time required, and ordering information. The 28 evaluation checklists, one for each activity, can be reproduced for classroom use. A distribution chart indicates the grade level and specific disability capable of using each ESS unit. (MA)

Acceleration vs. Sophistication in Mathematics: An Either/Or Case? Development Report Number 2.

Illinois Univ., Urbana. Curriculum Lab.
Pub Date-Feb 79
Note-35p.
Pub Type- Reports - Descriptive (141) - Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Cognitive Development, *Curriculum Development, Educational Research, *Gifted, Mathematics Curriculum, *Mathematics Education, *Models, Secondary Education, Secondary School Mathematics

This document discusses the importance of acceleration vs. sophistication in mathematics programs and curricula for gifted students. The discussion proceeds through three steps. First, an attempt is made to model how various kinds of gifted students interact with three dimensions of the curriculum. These dimensions are acceleration, sophistication (depth), and enrichment (breadth). Second, a description is given of the way in which one program has tried to respond to this model. This program is the mathematics program for gifted students at the University High School, the laboratory school of the University of Illinois. Finally, an attempt is made to draw a few conclusions and practical guidelines for dealing with gifted students. (HM)

The Socio-Scientific Reasoning Model: Past, Present and Future.

Pub Date-Mar 79

Note-27p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (52nd, Atlanta, Georgia, March 21-23, 1979)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*Cognitive Development, *Decision Making, Educational Philosophy, Educational Research, *Ethical Values, *Models, *Moral Values, Science Education, Values

Identifiers-Research Reports

The socio-scientific reasoning model is described. This model is the incorporation of the hypothetico-deductive mode of problem solving with the social and moral or ethical concerns of decision making. It has served as a guide in the development of a series of educational materials to help students advance to higher levels of thinking and reasoning capabilities. Application of the socio-scientific reasoning model centers on identifying those learning experiences important for assisting students to become more effective and capable decision makers and problem solvers in a highly scientific and technological world. The model should also prove to be useful in helping curriculum developers determine the types and complexity of activities appropriate for students at differing grade levels, with differing abilities, and with differing learning needs and requirements. The Socio-Scientific Reasoning Model: Instruments for Evaluation.

Pub Date-Mar 79

Note-12p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (52nd, Atlanta, Georgia, March 21-23, 1979)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Educational Research, *Environmental Education, *Ethical Values, *Measurement Instruments, Moral Values, Science Education, *Social Problems, *Student Attitudes, *Technology, Values

Identifiers-Research Reports

The Environmental Issues Test (EIT) is an instrument designed to assess moral and ethical reasoning within a scientific or technological context. It is comprised of five dilemma stories each of which highlights an environmental issue and the moral conflicts inherent in that issue. Following each dilemma story is a series of 12 issues statements, each keyed to a specific moral reasoning stage as defined by Kohlberg. Respondents are asked to assign a priority rating to each statement in terms of its relative degree of importance in making a particular decision. The evaluation of the EIT and the development of a similar test for younger students is described. (BB)

An Evaluation of Curriculum Materials Based Upon the Socio-Scientific Reasoning Model.

Pub Date-Mar 79

Note-16p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (52nd, Atlanta, Georgia, March 21-23, 1979)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Curriculum Evaluation, *Educational Research, *Environmental Education, *Models, Science Education, Secondary Education, *Social Science Research

Identifiers-Research Reports

To address the need to develop a scientifically literate citizenry, the socio-scientific reasoning model was created to guide curriculum development. Goals of this developmental approach include increasing: (1) students' skills in dealing with problems containing multiple interacting variables; (2) students' decision-making skills incorporating a wide social perspective; and (3) critical thinking skills in the evaluation of consequences and implications of decisions. Secondary school students (grades 7-12, from both public and private sectors) enrolled in courses in chemistry, earth science, biology, health, social sciences, and physics are currently participating in the field test and evaluation of these curriculum materials. Tests designed to evaluate knowledge, critical thinking, and moral/ethical reasoning have been administered to approximately 1,000 students. The experimental design for the field test is the non-equivalent comparison group design where experimental and control groups are pre-tested and post-tested. Mean scores of the experimental and control groups are compared using a t-test to determine if the experimental group achieved significant improvement in the cognitive and affective domains. Preliminary analysis of the data indicate that these curricula materials have the potential to affect development in both the cognitive and affective domains. (Author/BB)

Descriptors-*Curriculum Development, Curriculum Evaluation, Decision Making, Educational Research, *Environmental Education, Models, *Petroleum Industry, Pollution, Science Education, *Simulation, *Water Pollution Control

Identifiers-Research Reports

The curriculum model described here has been designed by incorporating the socio-scientific reasoning model with a simulation design in an attempt to have students investigate the onshore impacts of Outer Continental Shelf (OCS) gas and oil development. The socio-scientific reasoning model incorporates a logical/physical reasoning component as defined by the Kohlbergian paradigm and a decision-making strategy based on the work of Dewey. The curriculum utilizes role playing, simulations, trend analysis, dilemma discussions, scenario writing, hypothesis generation and testing, problem solving, variable manipulation, and model building. An evaluation for the curriculum is described. Incorporated are tests of social/moral reasoning skills, critical thinking skills, and logical and physical reasoning skills. (BB)

Identifiers-*Ecuador

This publication was developed by the Ecuador Nonformal Education Project, which is a joint project of the Ministry of Education in Ecuador and the Center for International Education at the University of Massachusetts. It presents ten mathematical fluency games designed to offer practice in the component skills necessary for performing arithmetic operations. This publication consists of two sections. The first section includes the rationale of the games. The second section includes the ten games. The format of all the games is the same and it includes the name of the game, name of developer, description, number of participants, subject matter, user level, materials, and process. (HM)

Descriptors-*Educational Change, *Educational Strategies, Elementary Secondary Education, *Interviews, *Mathematics Education, *Measurement, *Metric System

Identifiers-*Canada

The findings of a study of metric conversion in Canada are reported, with special attention to its impact on education. Some 40 interviews with metric education leaders in 8 provinces, coupled with an extensive review of documents and correspondence with key individuals in metric conversion throughout Canada, served as the information source for this report. Information is provided on the history and current status of the Canadian Conversion Program, including an overview of the organization and accomplishments of Metric Commission Canada. The results of the study suggest that metric conversion presents an ideal opportunity to evaluate and overhaul the entire program of measurement instruction. (MP)

Factors Related to Mathematics Anxiety in the Secondary School.

Pub Date-Apr 79

Note-15p.; Paper presented at the annual meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979); Not available in hard copy due to marginal legibility of original document

Pub Type- Speeches/Meeting Papers (150)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors--*Achievement, *Anxiety, *Attitudes, Classroom Environment, *Mathematics Education, Motivation, Secondary Education, *Secondary School Mathematics, *Sex Differences

Identifiers-*American Educational Research Association

This study indicates that eighth graders have higher mathematics anxiety than eleventh graders, and boys have higher mathematics anxiety than girls. Eighth-grade classes with high mathematics anxiety tend to have high motivation in mathematics, but tend to see mathematics as not very useful in society. Both grade levels show a positive relationship between class mathematics anxiety and both friction and favoritism in the classroom, and a negative relationship between class mathematics anxiety and both class mathematics achievement and the perceived difficulty of the class. This document, designed for students and for teachers and community leaders developing population study programs, is divided into five sections. The first section lists over 80 titles of printed documents for students, teachers, and others. A second section is devoted to bibliographies, directories, and other resource guides on population information. A third section lists materials available from organizations concerned with population issues. A fourth section lists charts, posters, and games. The fifth section describes audiovisual aids dealing with population issues. Information is given with each entry indicating the appropriate education level for the resource (from junior high school through college and adult to advanced levels). Information on availability is provided with each entry. (RE)

Identifiers-*Energy Education

The collection of materials is intended to provide for the needs of elementary school teachers who have needs for resources for energy education. The document is divided into three sections. The first section discusses human energy, energy use in home and school, and the relationship of the individual to the energy problem. A second section discusses the role of energy in the community, the consumer's role in energy production, and the existence of energy use patterns. The third section covers the production of energy, some approaches to solving energy problems, and the impact of energy decisions on the social and physical environment of the future. Each lesson includes suggested adaptations for grade level, language arts instruction, and mathematics instruction. (RE)

Slowly and Rapidly Converging Infinite Series.

Pub Date- 79
Note-5p.
Pub Type- Guides - Classroom - Teacher (052)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Calculus, *College Mathematics, Concept Formation, Higher Education, *Learning Activities, *Mathematics Instruction, Teaching Techniques
Identifiers-*Estimation (Mathematics), *Sequences (Mathematics)

A method is presented for constructing infinite series with prescribed rates of convergence. The method is presented as being an aid to improving the student's understanding of how the partial sum of an infinite series can be used to approximate the sum of the series, as well as being of interest in itself. The focus of the paper is the degree of approximation obtained by using a partial sum for the sum of the infinite series, since this concept is of great importance in using a partial sum for approximation purposes and is often left vague in conventional approaches. Descriptors-Algebra, *Cognitive Development, *Concept Formation, Elementary Secondary Education, Higher Education, Instruction, *Learning, *Mathematical Models, *Mathematics Education, Number Concepts, *Research, Teaching Methods
Identifiers-Information Analysis Products, *Mathematics Education Reports

Eleven research reports in the area of models of learning mathematics are presented in this publication of the Mathematics Education Reports series. The papers represent a mixture of theories, viewpoints, and references to other areas. Content areas addressed range from preschool to college levels. All the papers are concerned with the learning of mathematics and all are attempts to clarify and apply theory through the mechanism of models. The papers rely on observations of students and have possible implications for classroom instruction. Topics include: (1) modeling and theorizing in mathematics education; (2) experimental

models for the child's acquisition of counting and of addition and subtraction; (3) a logical-cognitive view of learning and teaching mathematical concepts; (4) instructional and theoretical implications of a mathematical model of cognitive development; (5) a learning model for some algebraic concepts; (6) abstraction, generalization, and the design of mathematical experiences for children; (7) towards a model for the teaching of mathematics as goal-directed activity; (8) preliminary steps toward a cognitive model of learning primary mathematics; (9) intraconcept analysis of rational number addition and subtraction, indirect validation studies; (10) an organizational model of abilities related to inference in mathematical contexts; and (11) logical reasoning learning hierarchies. Pub Date-78
Note-32p.; Contains occasional light and broken type
Pub Type- Reports - Evaluative (142)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Anxiety, Attitudes, *Career Opportunities, *Educational Research, Employment Potential, *Evaluation, Low Income Groups, *Mathematics Education, Postsecondary Education, *Sex Role, Summer Institutes, Workshops

An evaluative report is given on the Anxiety Management Training and Sex Role Workshops of the New Career Options for Women through Mathematics'' summer institute. The overall purpose was to help remedy the problems of low utilization of the scientific and technical academic and work potential of Arkansas women, and their resulting conditions of low job status and low-income level. The major emphasis of the institute was the development of mathematics skills. However, since anxiety was believed to be associated with the lack of self-confidence necessary to succeed academically (particularly in mathematics), Anxiety Management Training was included as an option available to participants. In addition, Sex Role Workshops were included for the purpose of raising awareness of possible attitudinal barriers to full realization of potential. (MP)

Presented are highlights of U.S. Federal research and development (R&D) funding during fiscal years 1978-80. Data are presented in terms of budget authority for 16 selected Federal budget functions. Data show that the 4 leading functions are national defense, space research and technology, health, and energy. No significant change is seen during the 1978-80 period in the share of the R&D total represented by each function. R&D programs and basic research programs distributed by function are also presented. Five charts and two tables are used to present the data included. (HM)

Note-295p.; Pages 14-17 and 26-28 missing from document prior to its being shipped to EDRS for filming; Best copy available
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC12 Plus Postage.
Descriptors-*Achievement, *Attitudes, *Educational Research, Effective Teaching, Elementary Education, *Elementary School Mathematics, Instruction, *Mathematics Education, Paraprofessional Personnel, *Tutoring

This research study investigated the effects of tutoring by trained paraprofessionals on pupil outcomes in the areas of mathematics achievement, self-concept as related to mathematics, attitude toward mathematics, and external locus of control as related to mathematics. It also sought to investigate the relationship between certain tutoring skills and pupil outcomes in those areas and to study whether the effects of mathematics tutoring were associated with the initial ability level of pupils in those areas. Five achievement tests and attitude scales, measuring 15 variables, were administered to approximately 320 fourth- and fifth-grade pupils in nine schools. Data collection, training, and experimentation extended over a period of four months. The study failed to demonstrate that mathematics achievement and attitudes could be increased as a result of tutoring or training in tutorial skills. (MP)

Descriptors-Curriculum, Elementary Secondary Education, *Guidelines, Higher Education, *Mathematics Education, *Mathematics Instruction, *Objectives, *Preservice Education, *Teacher Education

Identifiers-*National Council of Teachers of Mathematics

These guidelines were developed by the Commission on Preservice Teacher Education of the National Council of Teachers of Mathematics to help responsible people, especially those people in colleges and universities that prepare teachers of mathematics, to find ways in which local teacher-preparation programs might be improved. The guidelines provide for general direction, generally expected levels of competence, possible evidences of the existence of essential characteristics, and indications of how the guidelines themselves help in the realization of goals. For the most part, the guidelines are stated in terms of specific competencies. Topics covered include academic and professional knowledge, professional competencies and attitudes, and institutional responsibilities. (MP)

This first of three volumes summarizes the activities and results of a survey of environmental education conducted for the Office of Environmental Education, U.S. Office of Education. The document presents a discussion of critical themes for environmental education; historical perspectives of environmental education; and future themes for environmental education. Attention is given to the methodology and results of a national survey of natural-environment-based education activities. Further discussion deals with interpretation of the Environmental Education Act of 1970 including the design of a survey instrument to collect data on interactions in environmental education. Concluding discussions cover the need to develop core themes in environmental education. Schematic models of various concepts and interrelationships are presented. Appendixes present copies of survey instruments, comments on survey instruments, and a bibliography. (RE)

Guidelines for Teaching Metric Concepts.
Wisconsin State Dept. of Public Instruction, Madison.
Spons Agency-Office of Education (DHEW), Washington, D.C.
Pub Date-75
Note-13p.; Guide prepared through the Dissemination Project
Pub Type- Guides - Classroom - Teacher (052) - Guides - Non-Classroom (055)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Concept Formation, Curriculum, Educational Change, Elementary Secondary Education, *Guidelines, *Mathematics Education, *Mathematics Instruction, *Measurement, *Metric System, *Objectives

The primary purpose of these guidelines is to provide teachers and other decision-makers with a suggested framework within which sound planning for metric education can be done. Student behavioral objectives are listed by topic. Each objective is coded to indicate grade level, topic, and objective number. A chart is provided to show a kindergarten through eighth-grade perspective as far as metric objectives are concerned. Topics dealt with include length, area, capacity, volume, weight, temperature, density, force, velocity, and acceleration. (MP)

Descriptors-Bibliographies, *Curriculum, Educational Change, Elementary Secondary Education, *Mathematics Education, *Mathematics Instruction, *Measurement, *Metric System, *Objectives, Resource Materials

This report examines educational aspects of the conversion to the metric system of measurement in the United States. Statements of positions on metrication and basic mathematical skills are given from various groups. Base units, symbols, prefixes, and style of the metric system are outlined. Guidelines for teaching metric concepts are given, including organization of behavioral objectives by grades and topics and student behavioral objectives. Resources for support of metric education, such as the MeasureMetric Instructional Television Series and Metric Week, are reviewed. A bibliography of printed resources on metric education is given. A Comparative Study of Needs and Attitudes of Parents and Educators in Regard to the Metric System.

Pub Date-Apr 79

Note-180p.; Ph.D. Dissertation, Walden University; Contains occasional light and broken type

Pub Type- Reports - Research (143) - Dissertations/Theses (040)

EDRS Price - MF01/PC08 Plus Postage.

Descriptors-*Attitudes, Comparative Analysis, Doctoral Theses, *Educational Research, Elementary Education, *Elementary School Mathematics, *Mathematics Education, Measurement, *Metric System, Needs Assessment, Parents, Supervisors, *Surveys

A needs assessment survey was made to analyze the needs and attitudes of parents and educators in regard to the metric system. Questionnaires were sent to educators, K-5, and to parents of 10 randomly selected classrooms in 2 Illinois school districts; one an urban area and the other a farming community. The 549 returned questionnaires were analyzed by inferential and descriptive statistics. Parent needs and attitudes in regard to the metric system were directly related to communities and education. No such relationships were found for educators. The study showed that although parents and educators generally were negative toward the metric system, they recognized the need of children and the American worker to learn the metric system, and felt all the educational resources in the United States must contribute to the education of the entire population to change over to the metric system. Identifiers-National Science Foundation

This feasibility report reflects the increasing demand for program accountability at the graduate level. The information presented is related to decision-making by policy makers and prospective graduate students. Included are the measurement instruments which were developed to sample 24 doctoral programs in chemistry and psychology and 25 in history. The study concentrates on quantifiable measures of both qualitative and quantitative aspects of the programs. The study begins with a presentation of the program characteristics which were judged important to quality of doctoral programs. The first few chapters cover background and purpose of the study, the study procedures and program purposes. Each remaining chapter focuses on data analyses and conclusions related to ratings of departments as measures of program quality, faculty training and performance, student abilities and achievement, quality of resources and environment, program contents and procedures in each department, and alumni accomplishments and opinions. An appendix divided into seven sections presents: (1) communications with participating universities; (2) institutions which participated; (3) Deans' ratings of program characteristics; (4) copies of the various questionnaires used; (5) characteristics of programs and questionnaire respondents; (6) scales formed from individual questionnaire items; and (7) examples of feedback reports to individual programs. Selected Concrete Logical Piagetian Tasks as They Relate to Mean and Item Scores on the Math Concept Section of the Stanford Math Achievement Test, Form A.

Pub Date-Jun 78
Note-73p.; M.S. Dissertation, State University College of Arts and Science; Not available in hard copy due to marginal legibility of original document
Pub Type- Reports - Research (143) - Dissertations/Theses (040)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Achievement, *Cognitive Development, Concept Formation, *Educational Research, Elementary Education, *Elementary School Mathematics, *Masters Theses, *Mathematics Education, *Mathematics Instruction
Identifiers-*Piagetian Tasks

Fifty first- and second-grade children's understanding of logico-mathematical relations were assessed using selected Piagetian tasks to test four hypotheses. The children's abilities to conserve numbers were compared to the means of mathematics concept scores and total mathematics scores of the 1972 Stanford Achievement Test, Form A. The relationships between these Piagetian tasks and individual mathematics concept items on the SAT were assessed; and the relationship between children's stages of cognitive development and their mathematics class achievement ranking as measured by daily classwork were determined. The results were mixed with some Piagetian tasks showing a direct relationship with test scores and others showing none. (MP)

Descriptors-Effective Teaching, Elementary Secondary Education, Literature Reviews, *Mathematics Education, *Mathematics Instruction, *Research Reviews (Publications), *Science Education, *Science Instruction, Teaching Methods, *Team Teaching

This literature review contains a general description of the international experience with team teaching, the specific results of team teaching in mathematics, a brief evaluation of empirical research on team teaching, and some remarks on action research. The following conclusions are drawn: (1) team teaching is insufficient as a mere organizational method and must be linked to a comprehensive pedagogic conception in order to be successful; (2) there is no clear superiority nor inferiority of team teaching in achievement changes in any particular subject; (3) the experience of team teaching is best in interdisciplinary projects; and (4) the research on team teaching has not yet given a definite answer to the question of what teaching units can be taught in what form by what teaching team. Identifiers-*Energy Education

This workbook is intended as a guide for the homeowner in taking steps to reduce home energy costs. It allows the homeowner to identify procedures applicable to his/her home and then implement those procedures most cost-effective for the particular situation. It provides methods for estimating savings in home heating and cooling costs by taking prescribed measures. (Author/RE)

Identifiers-*National Wildlife Federation

This annual directory contains lists of organizations, agencies, and officials concerned with natural resource use and management. Five indexes are included in the first section of the directory: (1) U.S. Federal Departments, Agencies, and Offices; (2) International, National, Interstate Organizations, and Commissions; (3) State, Territorial Agencies, and Citizens' Groups; (4) Canadian Federal Government Agencies and National Citizens' Groups; and (5) Canadian Provincial Government Departments and Citizens' Groups. Following the indexes are 15 listings covering such areas as U.S. Congressional Committees, U.S. Independent Agencies, Colleges and Universities, Directories of Interest, and Audio-Visual Source Information. Where possible, administrators, departments, duties and functions, annual events, publications, addresses, and phone numbers are included with the listing. The directory concludes with a personal name index. (RE)

Identifiers-Energy Education, Solar Energy

The text is a compilation of background information which should be useful to teachers wishing to obtain some technical information on solar technology. Twenty sections are included which deal with topics ranging from discussion of the sun's composition to the legal implications of using solar energy. The text is intended to provide useful information to teachers at all levels of secondary education. Many advanced science teachers with competency in algebra may find the text useful. (Author/RE)

This document is designed to give both teachers and students the opportunity to review a variety of representative articles on solar energy. Consideration is given to the sun's role in man's past, present, and future. The present state of solar technology is examined theoretically, economically, and comparatively in light of growing need for alternatives in the situation of diminishing conventional energy supplies. Descriptors-Elementary Secondary Education, *Language Arts, Learning Activities, *Map Skills, *Mathematics Education, *Mathematics Instruction, *Measurement, *Metric System, Student Projects, Worksheets

This booklet, designed for use with varying levels of remedial mathematics students in grades 6-10, is intended to help the student become more comfortable using the metric system, reinforce the metric ideas and notions that are taught in other courses, and aid in the development of basic mathematical skills by having the student participate in measuring activities. The unit consists of two basic parts: (1) map skills exercises for individualized work; and (2) the trip-planning project, which provides an opportunity for the mathematics teacher and the language arts teacher to correlate one or more lessons. Document Not Available from EDRS.

Descriptors-Elementary Secondary Education, *Instructional Materials, Junior High School Students, Physical Sciences, *Science Activities, *Science Curriculum, Science Education, *Science Instruction, Scientific Concepts, Skill Development

Identifiers-Intermediate Science Curriculum Study

This teacher's guide is designed to meet several objectives in the area of junior high science. The three versions within this volume are based on the idea that the same science content can be oriented towards the attainment of several different kinds of objectives. Each version is devoted to a different area of emphasis. The blue version emphasizes the nature of science.'' Students are encouraged to use inferences in developing scientific knowledge. The red version emphasizes the learner's skill development. Students study the properties of matter by observing and describing their observations. The green version focuses on science and society or way in which science can be useful in solving problems in a technological society. There is only a slight variation in science content from version to version. The text can be used as alternative lessons by the teacher or as a pattern for curriculum development. (Author/SA)

Application of Stochastic Learning Theory to Elementary Arithmetic Exercises. Technical Report No. 302. Psychology and Education Series.
Stanford Univ., Calif. Inst. for Mathematical Studies in Social Science.
Report No.-SU-IMSSS-TR-302
Pub Date-4 Jun 79
Note-131p.; Not available in hard copy due to marginal legibility of original document

Pub Type- Reports - Research (143) - Collected Works - Serials (022)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*Educational Psychology, Elementary Education, *Elementary School Mathematics, *Learning Theories, Mathematical Models, Mathematics Curriculum, *Mathematics Education, *Mathematics Instruction, Prediction, *Research

The application of a linear learning model, which combines learning theory with a structural analysis of the exercises given to students, to an elementary mathematics curriculum is examined. Elementary arithmetic items taken by about 100 second-grade students on 26 weekly tests form the data base. Weekly predictions of group performance on addition items are made, based upon earlier observations. The model is tested by studying the accuracy of the predictions, by varying parameters of the model, and by comparing its predictions with those made from a regression analysis. The study indicates that the most important skill to consider in making predictions of performance on addition items is carrying. The skill of adding two digits made a much smaller contribution. Descriptors-Content Analysis, *Educational Research, Elementary Education, *Elementary School Mathematics, Inservice Education, Instructional Materials, *Mathematics Curriculum, *Mathematics Education, *Mathematics Instruction, *Taxonomy

This manual presents a taxonomy for the classification of elementary school mathematics content and provides training in the use of that taxonomy. The taxonomy is designed to classify the content of various curricular materials as well as the content of actual classroom instruction. Three factors are used to define the taxonomy: (1) general intent; (2) nature of materials; and (3) operation. There are 6 levels of general intent, 13 levels of material, and 15 different operations. The manual elaborates on each factor by specifying the definition of the levels of each factor, conventions used in conjunction with each factor to eliminate certain ambiguities that might arise, and examples for each level. Descriptors-Achievement, *Anxiety, *Attitudes, *Career Opportunities, Higher Education, Mathematics Curriculum, *Mathematics Education, Mathematics Instruction, *Research, Secondary Education, Statistics, Symposia
Identifiers-*American Educational Research Association

This symposium includes five presentations of studies of mathematics attitudes at three educational levels: junior high, postsecondary, and graduate school. The studies have implications in the fields of mathematics education, educational research, academic advisement, and career counseling. The studies identify the extent of the problem of mathematics anxiety of avoidance. Abstracts of the papers are presented. Paper topics include: (1) a study of the attitudes of junior high school students toward mathematics; (2) student's attitudes toward mathematics and their relationship to learning in required mathematics courses in selected postsecondary institutions; (3) mathematics attitudes: an intervention study; (4) math anxiety: its impact on graduate level statistics achievement; and (5) math avoidance and pursuit of fantasy careers. Descriptors-*Business Education, *Consumer Education, *Home Economics, Mathematical Applications, *Mathematics Curriculum, *Mathematics Education, Mathematics Instruction, *Research, Secondary Education
Identifiers-*British Columbia

Consumer mathematics topics taught in the subject areas of mathematics, business education, and home economics were compiled. The compilation was analyzed and revised by a panel of secondary teachers and university professors from the three subject areas. The proposed curriculum contains 32 topics arranged in rank order of importance by the panel. The prescribed texts used in two consumer courses covered 44% of the topics in the proposed curriculum. The author and panel concluded that secondary students are not acquiring basic skills and knowledge in consumer mathematics in spite of the fact that three subject areas are teaching consumer topics. Presented are guidelines for buying solar systems for the individual consumer. This is intended to help the consumer reduce many of the risks associated with the purchase of solar systems, particularly the risks of fraud and deception. Engineering terms associated with solar technology are presented and described to enable the consumer to discuss and evaluate systems on the market. The book does not attempt to describe all possible components of a solar system, but does treat main operating components. (Author/RE)

Note-116p.; Contains occasional light type
Pub Type- Reports - Descriptive (141)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors-Curriculum Development, *Curriculum Guides, Educational Assessment, Educational Objectives, Elementary School Science, *Elementary Secondary Education, *Guidelines, Kindergarten, Laboratory Safety, Resource Materials, *Science Activities, Science Curriculum, *Science Education, Secondary School Science, *Teacher Role
Identifiers-*Oregon State Department of Education

This publication, developed by the Oregon Department of Education, presents a framework for science programs designed to help teachers organize their science curriculum to be consistent with Oregon's goal-based planning for K-12 instruction. It consists of six major sections. Section one presents the framework for Oregon's goal-based science curriculum which considers state goals, district goals, program goals, and course goals. This section also discusses competencies and presents goals of individual students. Section two presents sample activities which may take place in science classrooms. The first 12 activities treat science instruction itself. They consist of four in earth science (one each for K-3, 4-6, 7-9, 10-12), four in life science, and four in physical science. The next 20 activities illustrate how other special interests (prekindergarten, reading, math, career education, handicapped) may interact with the science curriculum. Section three presents safety in science programs. Section four presents assessing science programs. Section five presents resources. Section six contains an appendix which includes sample course goals, self-assessment checklist for science teachers, and procedures for developing staff agreement. (HM)

EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Cultural Awareness, Cultural Background, *Ethnic Groups, *Ethnic Studies, Human Living, Immigrants, Interviews, Life Style, *Local History, *Oral History, Secondary Education, Social History, *Social Studies

This pamphlet contains 28 articles written by high school students based on interviews with community members from 17 ethnic groups. The interviews were conducted by the students as part of a unit on immigration within their social studies course. The interviews illustrate many aspects of ethnic studies which are based on the human rather than the academic dimension. Among the ethnic groups represented are Yugoslavs, Czechoslovakians, Poles, Serbians, French, Sicilians, Austrians, Mexicans, East Germans, Koreans, Scottish, English, Italians, and Albanians. Many of the interviewees were older adults who had immigrated to the United States early in the 20th century. Their stories describe life in their native countries, holiday customs, immigration experiences on Ellis Island, first impressions of life in the United States, their first jobs in the United States, marriages and deaths of family members, and benefits of living in the United States. Descriptors-Communication Skills, Consumer Education, Democracy, Democratic Values, Elementary Education, Ethnic Studies, Interpretive Skills, Library Skills, Listening Skills, Map Skills, *Process Education, Racial Discrimination, *Skill Development, *Social Studies, *Urban Studies

This guide was developed to aid elementary students deal with life experiences through skill development. Major skills stressed are: locating, organizing, and evaluating information; acquiring information through listening, observing, and reading; communicating orally and in writing; interpreting pictures, charts, graphs, and tables; and working with others. Arranged according to grade level and to a hierarchy of skills, each section lists major and sub-skills to be developed, behavioral goals, and sample activities. Activities at the kindergarten level include naming family members, dramatizing emotions, studying ethnic groups, studying national symbols, and preparing a family booklet.'' At grade one, students learn cardinal directions, study maps, service professions, and ethnic groups, and categorize consumers and producers. Grade two emphasizes visits by police and fire officials, team based games, and a study of urban neighborhoods. Grade three students use library references, take walking tours through new developments and blighted areas, and research the names of city leaders. At grade level four, students study West Africa, the lives of the Cherokee and Choctaw Indians, world food production, assembly line production, and credit buying. Grade five activities focus on a study of racial prejudice. Students analyze television programs and study the state and national constitutions. Grade six examines discrimination, drug abuse, crime, citizen participation in government, and the democratic process. (KC)

Descriptors-*Education, *Employment Opportunities, Employment Projections, Foreign Countries, Futures (of Society), Government Role, Job Market, *Labor Market, Manpower Needs, Policy Formation, *Relationship, Relevance (Education), Secondary Education, Social Problems, *Unemployment, Vocational Counseling, *Youth
Identifiers-Europe

The document presents the proceedings of an international symposium analyzing the relationship among youth, education, and employment, with emphasis on youth employment trends and the need to find solutions for unemployment problems. The objectives are to evaluate the existing relationship in the light of changing values and expectations of young people, and the widening gap between educational parameters of the relationship; and to exchange information on innovative experiences. The document is presented in six chapters. Chapter I summarizes a similar symposium held in England. Chapter II discusses the increase of youth unemployment and the potential and limitations of the educational system. Chapter III cites variables governing the labor market and suggests approaches which might find solutions. Chapter IV details employment problems of 16 to 19-year-olds having only compulsory education and offers some policy measures. Chapter V suggests separate schools for post-16 education and training, listing advantages to be derived. The final chapter reports on the symposium discussions and summarizes. Major conclusions are that the rising trend of youth unemployment is not just a temporary aberration and that the age of admission to the primary labor market is rising due to demographic, economic, organizational, and sociological reasons. New policies are needed in both employment and education to meet this situation. Statistical data on youth unemployment in Europe is appended. (CK)

Descriptors-Achievement Tests, Adult Characteristics, Adults, *Age Groups, Attitude Tests, *Citizenship, Data Analysis, Educational Research, Elementary School Students, Elementary Secondary Education, High School Students, Measurement Goals, *Measurement Instruments, *Social Studies, State Surveys, Student Characteristics, Tables (Data), Teacher Programs, Test Results

The document describes an instrument used to measure citizenship social studies achievement and skills for 9-, 13-, 17-, and 26 to 35-year-olds in Connecticut. Based on the National Assessment of Educational Progress (ED 049 113), objectives were to collect baseline data for future use in determining knowledge, to compare results with national achievement, to use data in curricular and instructional decisions, and to encourage use of the test in evaluation and planning. 2,390 public school children and 249 adults were tested using a multiple-choice achievement test covering eight subject and skills areas, and questionnaires ascertaining individual and school-related variables. Adequate representation was sought for regional sections, urban and rural communities, both sexes, and varied socioeconomic backgrounds. Data was analyzed according to the percentage of students answering each test item correctly, the average percentage of items answered correctly for each of the subject areas, the percentage of individuals selecting each choice on each item of the student and principal questionnaires, and a comparison with students in the nation and the northeast. Findings showed that Connecticut children's scores were about the same as national and northeast levels, children who hated school or watched more than three hours of television daily achieved less, and Connecticut adults scored higher than the children or the national level. Data tables showing results by age group, variable, and age group comparisons, are included as well as the measurement instruments. (CK)

Descriptors-*Change Strategies, Developing Nations, *Disarmament, *Energy, Energy Conservation, *Foreign Policy, Human Relations, International Relations, National Defense, Nuclear Warfare, *Peace, World Affairs, *World Problems
Identifiers-Strategic Arms Limitations Talks

The document presents six Strategy for Peace Conference reports prepared by 94 participants who are leaders in government and the professions throughout the United States. Opening remarks by C. Maxwell Stanley, conference chairman, evaluate accomplishments of the United States in 1977 with regard to foreign policy and provide a context for the reports which follow. The first report considers the U.S. and U.S.S.R. cooperation in space. The militarization of outer space, United States and Soviet interests, and the problem of the introduction of weapons into outer space are examined. The second report presents an evaluation of the U.S. Non Proliferation Policy, the Act of 1978, the U.S. Nuclear Fuel Cycle Policy, the International Fuel Cycle Evaluation (INFCE), institutional issues, and the prospects for international consensus. The third report considers the United States disarmament policy, specifically the SALT agreements and non-nuclear arms reduction. The topic of the fourth report is conversion of defense industries. Legislative approaches, the role of industry, and the future of conversion are discussed. The fifth topic, the reorganization of U.S. foreign aid, examines six options for reorganization. The final topic, energy and developing nations, considers the energy supply and demand, energy program objectives, and five approaches to deal with the energy dilemma. A list of participants is included. (KC)

Descriptors-Economic Education, Economic Factors, Employment Problems, *Employment Trends, Foreign Countries, Futures (of Society), *Government Role, Growth Patterns, Instructional Materials, Job Market, Labor Economics, *Labor Force, Labor Market, *Policy Formation, Political Issues, Secondary Education, Social Problems, Social Studies, Trend Analysis, *Unemployment
Identifiers-Canada

Devised for secondary school students, the booklet explains current employment trends, policies, and issues of Canada's labor market. The book is divided into three parts. Part I discusses the labor force in terms of supply and demand, the working age population, the labor force participation rate, total employment, unemployment, and seasonal adjustments in the unemployment rate. Part II explores the changing nature of Canada's labor market. Growth factors such as the Post World War II baby boom, the increasing number of women in the labor force, and immigration patterns are analyzed. Current demands for labor, service industries, and employment trends through a recession are also discussed. Part III considers issues and policies. One major issue concerns determining who the unemployed are. Seasonal factors, regional differences, and employment patterns of young people are noted as important elements in analyzing the unemployment rate. Issues surrounding the revised (1971) Unemployment Insurance Act and indirect and direct effects of government policies on employment are also discussed. Tabular presentations of major topics are provided in insets in each section. (KC)

Identifiers-Canada

Defining productivity as the complex of factors that determine how efficiently an economy will operate, this booklet for Canadian secondary school students analyzes the subject in five sections. What Is Productivity?'' discusses output/input relationships when producing goods and services. Why Is Productivity Important?'' discusses the role of productivity in decreasing inflation and in improving the standard of living. What Determines the Level of Productivity?'' analyzes factors such as the structure of the economy, the state of the economy, and the scale of operations (the point at which the size of an operation increases and specialization at intermediate stages of the operation becomes profitable). The quality and quantity of capital (equipment used by labor in production), the labor force, and the role of government are also discussed. Measuring Productivity'' deals with problems concerning measurement and the use of statistics. The concluding section outlines the efforts that business, labor, and the government must make to increase economic efficiency in Canada. (KC)

Identifiers-Canada

This booklet for Canadian secondary school students examines urbanization and its relationship to other factors of the economy. Five sections analyze urbanization, the pattern of urban development, community needs, the management of urban growth, and urban governance. Part I traces the growth of the Canadian population, noting that 10% of the population lived in urban communities in 1871 while 62% lived in urban communities in 1971. Tables illustrate population by province and metropolitan areas. Part II examines housing patterns, the impact of the automobile, the population explosion, and public transportation priorities. Part III discusses urban planning and taxation, and the quality of urban life. Part IV focuses on urban management and current "growth" and "No-growth" debates. Part V explains problems concerned with the changing role of urban government. Discussions of increased expectations of citizens, the realization that many governmental decisions are subject to challenge, and controversies surrounding the need for expanded community and social services are included. Descriptors-Economic Education, *Economics, *Exports, Foreign Countries, *Foreign Policy, Futures (of Society), Industry, *International Relations, Political Issues, *Productivity, Secondary Education, Social Problems, Social Studies

Identifiers-Canada

Written for secondary school Canadian students, the document examines Canada's international trade policy. It is arranged in three sections. Part I discusses the affect of Canada's trade policy on the individual citizen. Tariffs and non-tariff barriers to trade such as import licenses, preferential purchasing agreements, health and safety standards, and subsidies are explored. The section also outlines the history of the Canadian tariff in relation to the United States tariff since 1869 and notes the effects of the 1974 General Agreement on Tariffs and Trade (GATT). Tables present rates of tariffs on primary and manufactured goods, percentages of exports of goods-producing industries, and percentages of Canada's merchandise trade by country and by commodity: farm and fishery, crude materials, fabricated materials, and manufactured products. An analysis of changing demand for exports concludes the chapter. Part II examines trade patterns and Canada's comparative advantage in world trade, and focuses on factors which interfere with free trade including trade barriers, national policies, and the desire for security. Part III explains why Canada's small market cannot support a large number of producers and product lines at world competitive prices. Costs and benefits of two approaches are examined: trade liberalization and domestic measures. The reorganization of industry; the effects of free trade on employment and industrial efficiency; and economic, political, and social considerations; and possible routes to free trade are analyzed. Descriptors-*Agricultural Production, Economic Education, *Economics, *Exports, Farmers, Federal Regulation, Field Crops, Food and Drug Inspectors, Foreign Countries, *Government Role, Livestock, Marketing, Secondary Education, Social Studies

Identifiers-Canada

This document for secondary school Canadian students analyzes the role of agriculture in the national economy and in Canadian trade, describes characteristics of Canadian farms, and discusses governmental inlfuences on Canadian agriculture. The document stresses that agriculture is a large source of national wealth; about 30% of Canadian farm production is exported, with wheat and wheat flour accounting for half the exports. Characteristics of Canadian farms are discussed in terms of size, what is produced where, specialization of produce, and factors involved in fluctuating prices. Tables illustrate farm sizes from 1951 to 1976, farm cash receipts and expenditures by region, and the value of products sold. Products are classified as: dairy; poultry; livestock; fruits, vegetables, and potatoes; wheat, oats, and barley; and other crops. A discussion of governmental laws, boards, and regulations concludes the document. Involvement of government is described as a result of specialized, large-scale production, farmers' income instability, and the imbalance of market power that exists between farmers and those who deal with farmers. Government programs include: grading, inspection, and health standards; research, extension, and information; crop insurance and credit; stabilization programs; and marketing boards. (KC)

Descriptors-Economic Development, Economic Education, *Economic Factors, Economics, Ethnic Distribution, Foreign Countries, *Government Role, *Immigrants, Labor Force, *Laws, *Policy, Population Trends, Public Opinion, Secondary Education, Social Studies
Identifiers-Canada

This two-part document written for secondary school Canadian students analyzes Canadian government immigration policies. The first and major part of the booklet discusses forces such as ethnic origins, the economics of immigration, humanitarian immigration, public attitudes toward immigration, and the impact of immigration on economic growth. The section addresses the issues of quotas and prohibition of immigration in the face of native unemployment, limitations by education or job skills, and enforced geographic location of immigrants. The impact of immigration on Canada's population base, on the size, structure, and composition of the labor force, and on sectors of the national economy are also analyzed. Tables illustrate ethnic origins of the population from 1871 to 1971, immigrants from 1852-1976, estimated population growth, immigration by occupational group, humanitarian immigration (Hungarian, Czechoslovakian, Tibetan, Chilean, Vietnamese, and Cambodian refugees), and immigrant components of the Canadian population and the labor force. The second section discusses pre-World War I laws designed to encourage settlement in the west. The 1967 White Paper on Immigration and the Report of the Canadian Immigration and Population Study are also analyzed. (KC)

Descriptors-Adult Education, Area Studies, *Comparative Education, Developing Nations, Educational Change, Educational History, Educational Philosophy, *Educational Trends, Elementary Secondary Education, *Experiential Learning, Foreign Countries, Higher Education, Literacy, Political Influences, Relevance (Education), Rural Education
Identifiers-*China

Experience-based learning has been evident in the Chinese educational system since the 1930s. Following the Long March in 1934-35, the Chinese Communists introduced a nonformal, experience-based educational system in North Shensi province. This system included drama groups in the countryside to educate peasants, classes in factories, and discussion groups in the fields. At the same time, Mao Tse-Tung wrote his essay "On Practice" in which he stated that practice takes precedence over theory. In 1949 a temporary Chinese constitution included a continued emphasis on experience-based learning by stressing practical technical and agricultural education. Mass literacy campaigns in the early 1950s encouraged rural farmers to read and to create their own textbooks for farming. With the Great Leap Forward in 1958 came decentralization of education, development of local curriculum, criticism of professional teachers, and opening of work-study schools. In the early 1960s revisionists attacked the economic failures of the Great Leap Forward and consequently experience-based learning suffered a setback. But in 1966 the Great Proletarian Cultural Revolution reaffirmed the closing of universities, and students and teachers were sent to the country to learn productive labor. Some schools formed their own factories, and May 7 cadre schools combined manual labor with political study. In 1976 changes were made in the educational system to reinstate professional teachers, upgrade standards, and limit admission. Experience-based learning continues to persist in China, but not as comprehensively as it was during the Great Proletarian Cultural Revolution. (AV)

Descriptors-Creativity, Data Analysis, Elementary Secondary Education, *Factor Analysis, Intelligence, Learning Experience, Learning Motivation, *Personality Assessment, Social Adjustment, *Student Characteristics, Teacher Improvement
Identifiers-*Annehurst Curriculum Classification System

The purpose of this study was to determine whether terms used in the Annehurst Curriculum Classification System (ACCS) are appropriate and useful to describe learner characteristics. From the twelve characteristics postulated in the ACCS to describe learners, six were selected for study: experience, intelligence, motivation, emotion-personality, creativity, and sociability. In the ACCS, each of these characteristics is described by a series of paired words, such as patient-impatient and optimistic-pessimistic, one word in each pair being identified with the characteristic positively and the other negatively. Seven such pairs were selected from the ACCS for each of the six selected characteristics. The 84 words thus selected were dissociated from the ACCS characteristics and Q-sorted by 317 experienced teachers, each teacher sorting the 84 words to characterize a particular student. A factor analysis of the results produced a new set of characteristics, labelled by the researchers as capacity to learn, human relations, maturity, sense of independence, experience, and sense of control. These six terms may represent a way of characterizing students that is superior to the six terms from the ACCS, or they may only indicate that there are various equally valid ways of characterizing students. Designed for youth workers, teachers, counselors, and student organizers, 11 essays in this handbook examine issues concerned with children's rights. Children's Rights and Social Work'' proposes that social workers can speed and direct the process of change by advocating the rights of young people and by providing services to make those rights a reality. The cartoon, The Invention of Childhood,'' suggests that our conceptions of children are shaped by our culture. A Look At Children's Oppression and Some Suggestions for Change'' examines discrimination in the legal system, the family, and the schools.
Changing Childhood'' analyzes the isolation of modern middle-class children from active participation in community life. Other essays discuss the weaknesses of alternative youth service agencies, refute arguments that adults use to prevent youth from participating in the political processes, analyze the myths'' of childhood, and describe Youth Liberation of Ann Arbor, the first children's organization run by children. A guide for teachers and workshop leaders provides synopses of handbooks of the Youth Liberation Press accompanied by lesson plans. Titles include Young People and the Law,'' Growing Up Gay,'' High School Women's Liberation,'' and Student and Youth Organizing.'' A list of advocacy organizations and an annotated bibliography conclude the handbook. (Author/KC)

The document presents objectives and proceedings of a population education seminar involving representatives from 12 non Western nations. Major purposes of the seminar were to provide a forum where population experts from Asian and Oceanic nations could exchange ideas, cooperate in improving population education programs, and explore how to increase cooperation in population education on a regional basis. The document is presented in three major sections. Section I is a general report of seminar study topics. These include trends within regional educational programs in Asia and Oceania, policy influences on population education programs, methodology and curriculum used in school and community programs, and recommendations for increased regional and national cooperation. Section II focuses on reports of population education in Bangladesh, India, Indonesia, Korea, Malaysia, Nepal, Pakistan, Papua New Guinea, Philippines, Sri Lanka, and Thailand. For each country, information is presented on the population situation, status of population education, educational needs, and educational trends. Section III presents appended materials, including the seminar agenda, directory of conference participants, and conference speeches. (DB)

Descriptors-*Catalogs, *Class Activities, Community Resources, *Concept Formation, *Consumer Education, Consumer Protection, Economic Factors, *Educational Objectives, Learning Activities, Living Standards, *Merchandise Information, Merchandising, Money Management, Secondary Education

To help students understand consumer concepts, the guide suggests ways of using general merchandise catalogs and other community resources in the classroom. Specifically, the guide aims toward raising living standards by making consumer education part of daily life and preparing young people for economic choices. The document is presented in six chapters. Chapter I lists general objectives related to using catalogs in the classroom. Chapter II describes goals and activities in 14 areas values, opportunity costs, comparison shopping, advertising, product features, quality and price, returns, exchanges and service, warranties, labels and packaging, retail credit, wardrobe planning and clothing selection, home furnishing and equipment, insurance, and consumer rights and responsibilities. Chapter II suggests how to use catalog advertisements of knit sport shirts and tops, jeans, tape recorders, grooming aids, and catalog yellow pages in the classroom. Chapter IV describes other teaching techniques, including discussion questions, attitude surveys, world association, VIP profiles, individual and group projects, legislative analysis, quotations, shopping slogans, and open-end situations. Chapters V and VI suggest how community and resource materials can help students understand the role of the consumer in the community and in the economy. The appendix presents sample letters which students can use as guides in contacting outside sources. (DB)

Descriptors-*Academic Achievement, Achievement Tests, Educational Assessment, Educational Objectives, Educational Research, Elementary Secondary Education, *Guidelines, Learning, *Relationship, *Social Studies, Test Construction, *Test Results, Test Validity

The report evaluates the accuracy with which achievement tests measure social studies learning. Research is based on test items derived from the Social Studies Curriculum Guidelines (1971) and the Multiethnic Guidelines (1976), both prepared by National Council for the Social Studies (NCSS). The major objective of the project was to help test developers, social studies supervisors, and other educators improve test development and selection techniques. The document is presented in eight sections. Section I describes the 1971 and 1976 NCSS guidelines. Section II explores activities of the NCSS Committee on Testing. Section III rates the NCSS guidelines for their intent and potential for state, local, and national educational assessment. Section IV explains how the testing committee developed appropriate guideline statements and criteria for large-scale assessment. Section V identifies general implications of the guidelines for large-scale assessment. Sections VI and VII discuss developing the test review process and reporting test results. The final section offers conclusions and recommendations including that NCSS can help overcome some mis-matches between specific guidelines and published tests by sharing mutual concerns with publishers, by collaborating with publishers on appropriate roles for test makers, test users, and curriculum developers, and by encouraging more enlightened use of evaluation processes and data. Descriptors-Affective Objectives, Anthropology, Behavioral Objectives, Career Education, Cognitive Objectives, Concept Formation, *Course Objectives, Curriculum Development, Economics, *Educational Objectives, Elementary Secondary Education, Evaluation Criteria, Evaluation Methods, Geography, Intellectual Disciplines, Political Science, Psychology, *Social Sciences, *Social Studies, Sociology, *Values

The volumes present goals for use in planning and evaluating elementary and secondary school social studies curricula. The book is intended to help social studies classroom teachers identify learning goals. Organized according to major social science disciplines, the two-volume series is presented in six sections. Section I introduces the collection, identifies general objectives, and explains codes and symbols. Sections II and III focus on social science and career education program goals including a need for students to value diversity in human cultures and be able to discover the knowledge, skills, and values necessary to carry out career decisions. Section IV outlines knowledge, process, and value classifications used in the guide.

Categories include acquiring information, insuring validity, organizing and interpreting information, acting on the basis of information, coping with the environment, and increasing personal effectiveness. Section V presents a taxonomy of major social science concepts. Section VI, the bulk of the document, presents social studies course goals by social science disciplines in tabular form. For major topics within each discipline, information is presented on goals, grade level, knowledge or process classification, subject area goals, career education goals, related headings in the taxonomy presented in section V and major concepts and vocabulary. Descriptors-Data Analysis, Data Collection, *Educational Change, Longitudinal Studies, Models, *Research Design, Research Methodology, Research Needs, Research Problems, *Research Projects, *Social Change, Social Science Research

This document introduces research aimed to explore methods that could be used to make inferences about causual effects of educational change over time when data are from an educational panel. This preface, the first in a series of 14 chapters described in SO 011 760-772, discusses an educational research project designed to examine affects of educational change and outlines the structure of the project's final report. First, activities of the research project are discussed. These include: integration and explications of models, methods, and results from existing relevant sociological, economic, and statistical literatures; extensions of these models, methods, and results to handle complications for which existing approaches were inadequate; investigation of the properties of different research designs and of different estimators; and performance of empirical analyses. A description of the project's final three-part report follows the discussion of project activities. Part I addresses broad issues of research design in the study of change. Two general arguments call for collecting data on the processes as well as the occurrence of change and shifting from the common discrete-time approach to continuous-time. Part II concerns analysis of data on quantitative (metric) outcomes. Analyses of common approaches and of issues involved in applying new strategies are discussed. Part III deals with dynamic analysis of qualitative outcomes such as remaining in school and kind of curriculum selected. Advantages of collecting event history data and problems in analyzing event-histories are examined. Effectiveness of Monte Carlo experiments, results of empirical analyses on the effects of schooling and ability on job changes, and research designs that minimize biases which result from ignoring interdependent systems of qualitative outcomes are discussed. (Author/KC)

Descriptors-*Comparative Analysis, Models, *Research Design, *Research Needs, *Research Problems, *Social Change, Social Science Research, Sociology, Sociometric Techniques, *Time Perspective

This document is part of a series of chapters described in SO 011 759. Working from the premise that temporal analysis is indispensable for the study of change, the document examines major alternatives in research design of this nature. Five sections focus on the features, advantages, and limitations of temporal analysis. Four designs which concern both quantitative and qualitative outcomes are evaluated: panel, event-count, event-sequence, and event-history. Panel designs record state occupancy of a sample of units at two or more points in time; for example, voters disclose voting intentions in a sequence of surveys leading up to an election. An event-count records the number of different types of events in an interval (employed, unemployed; married, not married). An event-sequence design records the sequences of states occupied by each unit and is useful in a study of careers. An event-history design records timing of all moves in a sequence. For example, a study of collective violence recorded the dates of all such events greater than some minimal scope. Conclusions are that event-counts, event-sequences, and event-histories permit much finer model testing and should be used more often in sociological research. Also, sociologists have begun to devote more attention to modeling change processes which permit richer use of temporal data. Finally, the need to examine linked changes in quality and quantity is expressed. (Author/KC)

This technical document, part of a series of chapters described in SO 011 759, describes a basic model of panel analysis used in a study of the causes of institutional and structural change in nations. Panel analysis is defined as a record of state occupancy of a sample of units at two or more points in time; for example, voters disclose voting intentions in a sequence of surveys leading up to an election. The author first defends use of the model by comparing it with a more complex alternative. Three arguments for using the basic model are presented: that the basic model approximates the true causal structure, that the model relates levels of X and Y to changes in X and Y, and that the basic model is a reduced-form of the proper model which allows for causal effects over the study period. The next section identifies special methodological issues, outlines strategies for addressing them, and cites relevant technical literatures containing more detailed treatment. Issues include autocorrelation of disturbances (variables omitted from the study such as material infrastructure), technology, cultural organization, national history, the assumption of constant error variance, measurement errors, and functional forms of relationships. Descriptors-Administrative Personnel, Competition, Declining Enrollment, *Educational Change, Elementary Secondary Education, Enrollment Trends, *Environmental Influences, Models, Nonprofessional Personnel, *Political Influences, *Research Methodology, *School Demography, *School Personnel, School Statistics, Sociometric Techniques, Student Distribution, Teacher Distribution

The document, part of a series of chapters described in SO 011 759, describes a model that incorporates organizational politics and environmental dependence into a study of the effects of growth and decline on the number of school personnel. The first section describes the original model which assumes that as the number of students in a district changes, the number of employees should change proportionately and that the process should work the same way in growth and decline. The authors argue that the weakness of this model is that it does not indicate the political process of personnel change during periods of growth and decline. The second section discusses the two-part model. The first part deals with the effect of carrying capacity (the upper limit of the size of population that can be sustained in a particular system) on the number of personnel. Carrying capacity is determined by three variables: exogenous environmental variations (enrollments and finances), internal competitive relations (organizational politics), and history (social, political, and cultural characteristics of the local environment). The second part focuses on the responsiveness or speed of response of administrators to change in their carrying capacity. The third section discusses application of the model to California school districts, using yearly counts of enrollments and the sizes of four personnel categories: teachers, administrators, pupil service employees, and calssified non-professionals. Results indicate that the politics of growth and decline are vastly different. Competitive interactions are stronger in decline, carrying capacities for most personnel components are lower at a given level of enrollment in decline, and organizational systems respond more slowly to changes in decline. This document is part of a series of chapters described in SO 011 759. Addressing the question of effective models to measure change and the change process, the author suggests that linear structural equation systems may be viewed as steady state outcomes of continuous-change models and have rich sociological grounding. Two interpretations of the models are reviewed: negative feedback and partial adjustment. In seeking to strengthen the relationship between structural equation methods and continuous-time dynamic analysis and to provide an integrated treatment of qualitative and quantitative outcomes, the author discusses six issues. The questions of deterministic or stochastic models, linear models for rates of change, time paths of change (integral equations), linear systems, and comparisons of linear systems with some widely used alternative models are examined. This document is part of a series of chapters described in SO 011 759. Stochastic models for the sociological analysis of change and the change process in quantitative variables are presented. The author lays groundwork for the statistical treatment of simple stochastic differential equations (SDEs) and discusses some of the continuities of qualitative and quantitative analysis as they are revealed in the study of diffusion processes. Six sections comprise the document. Section I provides an overview of the study. Section II states the properties of the white noise processes and the related Brownian motion process. Section III discusses SDEs and two approaches to solving them. In Section IV, Kolmogorov's diffusion equations and results on conditional densities are given. Section V treats a substantive example, population growth in a random environment, from two perspectives and Section VI raises the problem of the behavior of Markov diffusion processes at boundaries. This document is part of a series of chapters described in SO 011 759. Addressing the problems of studying change and the change process, the report argues that sociologists should study coupled changes in qualitative and quantitative outcomes (e.g., marital status and earnings). The author presents a model for sociological studies of change in metric variables and focuses on the practical details of using stochastic differential equations (SDEs) in panel analysis. Eleven sections comprise the report. The first considers two broad approaches to empirical studies of SDEs: estimating structural parameters directly from integral equations or using discrete approximations. After arguing for the first approach, the author addresses issues such as autocorrelation of disturbances, unit-specific effects, pooled cross-section and time series estimators, fixed effect estimators, random effects estimators, Monte Carlo studies of small sample properties, and unequally spaced observations. A continuous-time perspective for dealing with problems of analyzing unequally spaced panel data is proposed. The report concludes that researchers can make use of available methods to solve many of the practical problems that arise in applying continuous-time, continuous-state models in sociological research. The document, part of a series of chapters described in SO 011 759, examines sociological research methods for the study of change. The advantages and procedures for dynamic analysis of event-history data (data giving the number, timing, and sequence of changes in a categorical dependent variable) are considered. The authors argue for grounding this analysis in a continuous-time stochastic model. This approach permits the data to be fully utilized and allows a unified treatment of the many approaches that use only part of the information of this data. The report focuses on the familiar continuous-time Markov model, summarizes its properties, reports its implications for various outcomes, describes extensions to deal with population heterogeneity and time-dependence, and outlines a maximum likelihood procedure for estimating the extended model from event-history data. The discussion is illustrated with an empirical analysis of the effects of an income maintenance experiment on change in marital status. Event history analysis is contrasted with cross-sectional, event-count, and panel analyses. The conclusion is that event-history analysis has substantial advantages over these other approaches. The document, part of a series of chapters described in SO 011 759, considers the problem of censoring in the analysis of event-histories (data on dated events, including dates of change from one qualitative state to another). Censoring refers to the lack of information on events that occur before or after the period for which data are available. Unless censorship is dealt with, researchers are likely to make erroneous inferences about the change process. The report considers several approaches to estimation when event-histories are censored. A constant rate (Poisson) model is considered because the methodological issues are more easily understood. Models in which the rate of an event depends on exogenous variables or time and in which there are multiple kinds of events are also analyzed. The report then discusses approaches to estimation based on maximum likelihood (ML), pseudo-maximum likelihood, the method of moments, and recent work by statisticians on methods that make weak parametric assumptions. The conclusion is that an important advantage of the ML approach to the censoring problem is that it is easily extended to different data structures and different models. (Author/KC)

Descriptors-*Bias, *Data Analysis, *Educational Change, Measurement Techniques, Models, *Research Methodology, *Research Problems, *Social Change, Social Science Research, Sociometric Techniques, Statistical Bias, *Validity

This document is part of a series of chapters described in SO 011 759. This chapter reports the results of Monte Carlo simulations designed to analyze problems of using maximum likelihood estimation (MLE: see SO 011 767) in research models which combine longitudinal and dynamic behavior data in studies of change. Four complications censoring of observations, small sample size, collinearity among causal variables, and model misspecification influence the quality of all ML estimates of parameters in a log-linear rate model when data consists of lengths of time between events. Separate sections of the document outline the model studied, formally present the method of maximum likelihood estimation, discuss previous findings on the quality of ML estimates of parameters of rate models, and describe the method and results of generating the Monte Carlo data. Results of the Monte Carlo experiments indicate that the quality of MLEs of a correctly specified log-linear rate model is generally good. For the correctly specified model, censoring seems to be the most serious impediment to correct inference, but can be compensated for by increasing the sample size. Findings also indicate that misspecification noticeably reduces the quality of estimates, and that sample size, censoring, and collinearity affect quality quite differently in the misspecified and correctly-specified models. Descriptors-*Data Analysis, *Educational Change, Measurement Techniques, Models, *Research Methodology, *Research Problems, *Social Change, Social Science Research, Sociometric Techniques, *Validity

This document is part of a series of chapters described in SO 011 759. The chapter advocates the analysis of event-histories (data giving the number, timing, and sequence of changes in a categorical dependent variable) with maximum likelihood estimators (MLE) applied to log-linear rate models. Results from a Monte Carlo investigation of the impact of measurement error on the performance of MLE applied to a log-linear rate model are reported. Sections of the document describe constant rate models of both a single event and a multiple event, examine complications created by errors in recording the timing of events, focus on the same complication for the multivariate rate model, and consider consequences of measurement error in the exogenous variables for this model. Results indicate that the performance of MLE in rate models is good. Also, measurement error in the waiting time and in exogenuous variables causes only minimal deterioration in estimator quality. The studies suggest that the most pronounced effects of measurement error can be avoided if the investigator does not impose arbitrary censoring points upon complete event-histories. When data on the timing of natural events are available, they should be used in entirety. (Author/KC)

This document is part of a series of chapters described in SO 011 759. The chapter examines the merits of four estimators in the causal analysis of event-histories (data giving the number, timing, and sequence of changes in a categorical dependent variable). The four procedures are ordinary least squares, Kaplan-Meier least squares, maximum likelihood (ML) and partial likelihood (PL). Eight sections comprise the report. Section I introduces the problem. Section II presents a short description of the event-history model and its appropriate use. The model is appropriate when data containing exact timing of events is available across units. For example, a political sociologist may want to test the hypothesis that the rate of collective violence in nation-states increases with the power of a state when the level of economic development is held constant. A report of Monte Carlo experiments designed to compare the four procedures follows. Topics include small sample properties, normal, lognormal, and uniform exogenous variables, random gamma disturbance, and time-dependent disturbances. Results indicate that both ML and PL procedures yield similar estimates, especially at high levels of censoring. ML estimation is slightly superior for time-independent data with or without random disturbances and PL estimation performs slightly better when the rate is time-dependent. (Author/KC)

The document, part of a series of chapters described in SO 011 759, presents an overview of theories about the labor market structure, suggests hypotheses about patterns of job shifts, and describes methods and results of testing these hypotheses. Three sections comprise the document. Section I defines basic labor market terms. Section II considers alternative explanations of the dependence of job-shift patterns on labor market structure and reviews literature concerning flexible and inflexible employment conditions. Flexible conditions occur when an employer can readily adjust an employer's wage up or down and either employer or employee can terminate the match at any time, whereas inflexible conditions assume that employers cannot readily adjust an employer's wage or terminate employment. In this section the author also proposes a new model for analyzing job shift patterns. Section III discusses a study of job shift patterns for full time jobs of civilian nonagricultural male workers in the labor force in 1968. Job rewards (wages and prestige) and personal resources (education and ability) were the basic variables. Results indicate that the proportion of job shifts accompanied by gains in prestige and wages exceeds those accompanied by losses. The finding is consistent with the argument that employment tends to be more inflexible in large firms than in small ones, assuming that most intrafirm moves originate in large firms. Also, the effect of education on upward moves is greater for interfirm moves than for intrafirm moves. Finally, the results indicate that determinants of a job shift rate depend on a person's social location and not just on his characteristics. (Author/KC)

This document is part of a series of chapters described in SO 011 759. This chapter offers guidelines for studying change in dynamically interdependent variables, even when a model that ignores interdependence is estimated. Many sociological studies concern dynamically interdependent variables; for example, in a study of female employment, a woman's employment may influence and be influenced by her marital status. The report addresses these issues: Under what circumstances do inferences based on a misspecified model (one that ignores interdependence among variables) lead to errors that are comparatively small and what kinds of research designs minimize errors and what kinds accentuate them? Separate sections examine assumptions of models, implications of bivariate and univariate models, research design, and procedures and findings for the 28 bivariate processes considered. Results indicate that biases from ignoring dynamic interrelationships tend to increase with the degree of interdependence of the variables. However, under some circumstances, biases are not large when interdependencies are ignored. If the variable being studied changes more slowly than the ignored variable, biases are relatively small. For example, research on marital stability may ignore changes in employment status, but not the reverse. Advantages of using event-history and panel analyses are also discussed. (Author/KC)

Identifiers-Ethnic Heritage Studies Program Act

The document lists approximately 280 ethnic heritage-related materials. Bibliographic citations for anthologies, plays, speeches, autobiographies, films, filmstrips, study guides, curriculum outlines, learning activities, and critical and historical studies for works published from 1950 through 1976 are annotated. The materials consider cultural conflicts, chronicle the history of cultural groups in the United States, and present the art, music, dance, literature, and religion of ethnic groups. The general bibliography categories are American Indian, Asian, Australian, Black American, Caribbean, Chinese, French, German, Greek, Irish, Italian, Japanese, Jewish, Latin American, Polish, Puerto Rican, Russian, Spanish/Portugese, General, and Professional. Entries are organized alphabetically by author according to type of material. (DB)

Identifiers-Ethic Heritage Studies Program Act

Designed to foster communication across intercultural/ethnic lines, this teaching guide focuses on ethnic foods and their influence on and contributions to America's eating habits. It is part of the Louisville Area Ethnic Heritage Project described in ED 150 043. The objective of this unit is to develop a knowledge and an appreciation of the food heritages of six ethnic groupings: Northern Europe, Southern Europe, Afro-American, Middle and Far East, Kentucky, and Latin America. The guide includes a pretest, six behavioral objectives accompanied by instructional strategies and facilitating materials, and six worksheets asking questions about Afro-American, Japanese, British, Chinese, French, German, Italian, Latin American, and Scandinavian foods. Also included are recipes, the key to the pretest, a posttest, a checklist of foods sampled and the student's feelings about those foods, and a bibliography of resources and materials. The unit can serve as a supplement to home economics courses with a suggested time period of two or three weeks. (Author/CK)

Identifiers-Asia (East), Ethnic Heritage Studies Program Act

This teaching guide focuses on four forms of arts and crafts popular in China, Korea, and Japan, and explores the effects, if any, on American culture. It is part of the Louisville Area Ethnic Heritage Studies Project described in ED 150 043. The objective of this unit is to help students understand and appreciate East Asian calligraphy, haiku, ikebana, and shadow theater. Suggested time period is one or two weeks. The guide includes a pretest, four behavioral objectives accompanied by instructional strategies and facilitating materials, and three worksheets illustrating haiku, ikebana, and calligraphy. A posttest asking for definitions of the crafts, examples of use in Louisville, and student feelings about East Asian art is included, plus a bibliography of resources and materials. (Author/CK)

Identifiers-Ethnic Heritage Studies Program Act

This teaching guide emphasizes the similarity of themes in black African and black American literature and the contribution black writers have made to American literature. It is part of the Louisville Area Ethnic Heritage Studies Project described in ED 150 043. The project materials are designed to foster communication across intercultural/ethnic lines. The objectives of this unit are to recognize common themes in black African and black American literature and to appreciate several literary selections by black American authors as representative of their contribution. Planned as a supplement for an English course, suggested time to allocate for the unit is at least two weeks. The guide includes a pretest, a posttest, and four behavioral objectives accompanied by instructional strategies and facilitating materials. These encourage defining terms, reading, discussion, and writing compositions and reports, among other activities. A bibliography of resources is appended. (Author/CK)

Identifiers-Ethnic Heritage Studies Program Act

This survey is designed to measure student attitudes both before and after an ethnic study unit is taught. It is part of the Louisville Area Ethnic Heritage Studies Project described in ED 150 043. The project materials are designed to foster communication across intercultural/ethnic lines. The test is comprised of 79 statements, such as A free society is one in which people with different backgrounds and beliefs can still work together for a common goal.'' Students have four choices they indicate whether they strongly disagree, disagree, agree, or strongly agree with the statements made, making their choice twice, once for the way it is,'' and once for the way it ought to be.'' Other statements include People should accept each other's ways of thinking and behaving,'' Often schools look upon ethnic studies as a way to please the community,'' I am often torn between what my family wishes me to do and what my peers wish me to do,'' I don't care what people say, I've found that there is some truth to every stereotype,'' It shouldn't make any difference whether your doctor is a man or a woman,'' and I can usually tell what a person is like by the way he/she is dressed.'' Identifiers-Ethnic Heritage Studies Program Act

A variety of individual and group activities which require students to examine their ethnic background and their personal values related to cultural pluralism are included in this teaching guide. The unit is part of the Louisville Area Ethnic Heritage Studies Project described in ED 150 043. The project materials are designed to foster communication across intercultural/ethnic lines. The objectives for this unit are to ensure that students understand the positive aspects of our pluralistic society; recognize diversity of culture, ethnicity, and custom as a strength; examine real problems and real people of various cultures; and participate in experiences that will help build positive attitudes and acceptance of their own and other cultural groups. Suggested time allotment is one to two weeks. The guide includes a pretest, posttest, and five behavioral objectives accompanied by instructional activities, facilitating materials, and comments to the teacher. There are eight study guides in the appendices: Why Cultural Pluralism?,'' a glossary of terms, Inner Values Related to Culture,'' Group Processes,'' two diagrams for discussion leaders, Conducting a Class Meeting,'' and Contemporary American Problems Study Guide.'' A bibliography of resource material is included. (Author/CK)

Identifiers-Ethnic Heritage Studies Program Act

This teaching guide presents a personal approach to America's past by having students prepare their own family's social geneological history. It is part of the Louisville Area Ethnic Heritage Studies Project described in ED 150 043. The project materials are designed to foster communication across intercultural/ethnic lines. The objective for this unit is to develop an understanding of the ways in which an individual's life is affected by his family background. Planned as a supplement for social studies courses, suggested time allotment is one to two weeks. The guide is comprised of a pretest, four behavioral objectives accompanied by instructional strategies, and a listing of facilitating materials. Also included are 10 worksheets for the student: a family history chart; family group sheet; tips and suggested questions for interviewing; a list of geneological sources of information, suggestions on how to organize a report, and tips on how to write and analyze an obituary. A posttest and bibliography of resources conclude the unit. (Author/CK)

Identifiers-Ethnic Heritage Studies Program Act

Providing information and activities designed to dispel sex role socialization, myths, and stereotypes as bases for prejudiced views, this teaching guide focuses on the American woman's image and diverse roles in our society. It is part of the Louisville Area Ethnic Heritage Studies Project described in ED 150 043. The project materials are designed to foster communication across intercultural/ethnic lines. Major objectives for this unit are to help students become aware of their attitudes toward the image and roles of American women, and to recognize women as individuals. Planned as a supplement to social studies, home economics, and English courses, suggested time allotment is one to three weeks. The guide includes a student attitudinal survey meant to be used as both pretest and posttest, and eight behavioral objectives accompanied by instructional strategies and listing facilitating materials. These are designed to ferret out and discuss student and media attitudes about both males and females, encourage reading, discussion, and opinion formation based on objective analysis. Two worksheets are included to aid the student in analyzing women on television, and women in employment. A bibliography of resources and materials conclude the unit. (Author/CK)

This teaching guide focuses on several prominent German-Americans and their contributions to American life, and provides some insights into German culture. It is part of the Louisville Area Ethnic Heritage Studies Project described in ED 150 043. The project materials are designed to foster communication across intercultural/ethnic lines. The objectives for this unit are to acquaint students with German-Americans such as Albert Einstein, Dwight Eisenhower, Lilli Lehmann, John Steinbeck, "Babe" Ruth, and Karen Horney, to help students recognize contributions to and effects on American life of these prominent people; and to provide background information on German culture. Suggested time allotment is one to two weeks. The guide includes a pretest, posttest, and five behavioral objectives accompanied by instructional strategies and facilitating materials, including group discussion, independent research, and role playing. A worksheet, designed to aid the student in doing independent research, lists the prominent persons. A bibliography of resources concludes the unit. (Author/CK)

Identifiers-Ethnic Heritage Studies Program Act

This teaching guide focuses on the dreams and realities of one family's immigration and assimilation into the American society. It is part of the Louisville Area Ethnic Heritage Studies Project described in ED 150 043. The materials are designed to foster communication across intercultural/ethnic lines. The objective of this unit is to help students understand and appreciate the immigrant experience, stressing such concepts as assimilation, conformity, prejudice, discrimination, poverty, and peer group. Planned as a supplement for social studies or English, it is suggested that one week be spent on the unit. The guide includes a pretest and seven behavioral objectives accompanied by instructional strategies and listing facilitating materials. The film The Immigrant Experience: The Long, Long Journey'' is used for class discussion, analysis, essay writing, and role playing. A worksheet suggesting ideas for a role-playing skit illustrating assimilation problems, a posttest, and bibliography of resources conclude the unit. (Author/CK)

Identifiers-Anthropology Curriculum Project

Part of the Anthropology Curriculum Project, this document presents lesson plans and a pupil activity book introducing some basic anthropological concepts to students in grades K-1. The objective is to aid teachers in helping young children acquire an understanding of the concepts anthropologists use to observe, describe, and report social phenomena. The teacher's manual consists of 34 lessons covering important anthropological concepts and study methods, plus aspects of American, Kazak, and Arunta cultures, such as shelter, artifacts, family roles, community life, and religion. Each lesson states the learning objective; lists needed materials, key words, and prerequisites; details suggestions for teaching procedures; and summarizes the lesson, sometimes suggesting reinforcing activities. The lessons are planned to last 15-20 minutes daily for four days a week, requiring approximately nine weeks to complete. The student activity book contains 47 pictures with captions illustrating the daily lessons. The objective is to encourage the child to search for the concept illustrated and to express it in his own words. It also includes two maps, one page with large-print words describing anthropological methods, and five review activity pages. (CK)

Identifiers-Anthropology Curriculum Project

Part of the Anthropology Curriculum Project, this teaching guide presents lesson plans introducing basic anthropological concepts to students in the first grade. The objective is to aid teachers in helping young children acquire an understanding of the concepts anthropologists use to observe, describe, and report social phenomena. This guide consists of lessons planned to take one hour per day for approximately 20 school days covering important anthropological concepts and study methods. Lessons are designed to help students compare aspects of American, Kazak, and Arunta cultures such as housing; material culture (tools, clothing, transportation modes); earning a living; family and community organization; and religion. Each section begins with a word list of anthropological terms (such as ethnography, matriarchical, endogamy, adobe), ranging from 24 to 103 words. It continues by listing educational objectives, and concludes with suggested review questions. The final chapter suggests 12 learning activities, including creating a scrapbook of magazine pictures about American culture; making a mural, model, or diorama; and inviting parents to a program. A bibliography geared to the first grade is included. A 17-page glossary, designed to help the teacher by defining the words in the word list, concludes the guide. (CK)

Identifiers-Anthropology Curriculum Project

This student guide illustrates the Arunta, the Kazak, and the American cultural systems. It is part of the Anthropology Curriculum Project and is designed to be used in conjunction with curriculum guides for grades 1 and 4 (SO 011 790-795). This booklet consists of three sections exploring universal anthropological concepts through both pictures and captions. Section I illustrates the aboriginal Arunta tribe, beginning with a map of Australia showing where they live. The line drawings continue by picturing their shelter, mode of transportation, tools, kinds of food, family life, child acculturation methods, family and community organization, and religion. Section II treats the Russian sheep herding Kazak tribe using the same cultural indicators shelter, economics, social organization, and religion in the same order to facilitate comparisons. Section III pictures the same indicators for the American way of living, but the text is more extensive because of the higher complexity and variety of industrial society, and because it compares the different ways the three cultures fulfill the same basic needs. (CK)

Identifiers-Anthropology Curriculum Project

This guide presents background material to acquaint elementary social studies teachers with the cultural systems of the Arunta and Kazak tribes and the more technologically sophisticated American way of life. It is part of the Anthropology Curriculum Project and is designed to be used in conjunction with curriculum guides for grades 1 and 4 (SO 011 790-795). This booklet is organized into three sections which describe each system in terms of cultural universals including housing, clothing, tools, transportation, communication, ways of earning a living, social organization in the home and community, and religion. It defines each universal, describes its functions, and examines the factors governing choices made by each culture. Section I describes the American way of life, its technological sophistication and variety, its money-based economy, nuclear family structure, and need for elected community leaders. Section II examines the Australian aboriginal Arunta tribe, focusing on its very simple economic systems and social organization. Section III explores the sheep herding Kazaks, a southern Russian tribe whose culture is more sophisticated than the Arunta but much less so than the American. The text emphasizes anthropological concepts and terms throughout, delineating their meanings and uses, and calling attention to their importance by underlining them. A bibliography concludes each section of text. (CK)

Identifiers-Anthropology Curriculum Project

This teaching aid outlines basic anthropological concepts described in the various units of the Anthropology Curriculum Project. The outline of important concepts to be learned is intended to be used by the teacher in conjunction with the other instructional materials in each unit. The introduction defines anthropology, its branches and purposes. Other topics covered are evolution, fossil man, race, culture, old world prehistory, new world prehistory, technology, economics, kinship, political and non-kin groups, religion, and life cycle. The outline is arranged in 13 short sections, each dealing with a topic covered by one or more of the related units. Each topic, defined and discussed in short sentences, includes from three to 13 subtopics. (CK)

Identifiers-Anthropology Curriculum Project

The social studies unit includes a teaching guide, teacher background material, student text, study guide, and composite pretest/posttest. Subject matter focuses on archaeological methods, history of man in America, and the Hopi Indians in the past and present. The unit is part of the Anthropology Curriculum Project and is designed to be used in the second grade one hour daily for 20-30 days. The unit objective is to provide students with a background for the understanding of man and his culture. Subject material is divided into three sections: a discussion of archaeologists and their methods, the origins and development of the American during the prehistoric period, and the Hopi Indians as an example of the continuation of the Southwest formative way of life into the 20th century. The teacher's guide suggests lesson plans for the unit, listing vocabulary, objectives and content, activities, review questions, educational media, and definitions. The teacher background materials examine the three subjects in detail and include charts, maps, and bibliographies. Drawings, maps, and charts illustrate the large print pupil text. The pupil's study guide introduces each subject, lists key words and ideas, suggests activities, encourages independent thinking by asking questions not answered in the text, and offers review questions. A vocabulary list and study exercises conclude the guide. The composite form for the pretest and posttest consists of 30 multiple-choice picture questions. (CK)

Identifiers-Anthropology Curriculum Project

This social studies unit includes teacher background material, a student text, study guide, and composite pretest/posttest explaining and discussing cultural concepts. It is part of the Anthropology Curriculum Project and is designed to be used in grade 4. The unit objective is to provide students with a background for understanding man and his culture. Subject material is divided into five sections: an explanation of anthropological terms and components, cultural universals and variation, enculturation, and cultural dynamics. The teacher background materials discuss the subjects in detail, emphasizing enculturation, cultural variation, and cultural dynamics. The 54-page pupil text clarifies these subjects by using examples from the Arunta, Kazak, and American way of life. The pupil's study guide introduces each subject, lists key words and ideas, suggests activities, encourages independent thinking by asking questions not answered in the text, and offers review questions. A 14-page glossary defining words underlined in the text concludes the guide. The composite pretest/posttest consists of 50 multiple-choice questions, plus 10 optional questions on cultural dynamics. Identifiers-Anthropology Curriculum Project

This social studies unit includes a teaching guide, student text, study guide, teacher background material, and composite pretest/posttest covering archaeological methods, evolution, fossils and man, and development of culture during the prehistoric periods in the Old World. It is part of the Anthropology Curriculum Project and is designed for grade 5. The unit objective is to provide students with a background for understanding man and his culture. Subject material is divided into four sections: a discussion of archaeologists and their methods, evolution and subsequent scientific theories, the development of fossil man, and technological advances made during prehistoric periods. The teacher's guide suggests lesson plans for the unit, listing vocabulary, objectives and content, activities, review questions, educational media, and definitions. Drawings, maps, and charts illustrate the pupil text. The pupil's study guide introduces each subject, lists key words and ideas, suggests activities, encourages independent thinking by asking questions not answered in the text, and offers review questions. A glossary and 181 completion exercise sentences conclude the section. The teacher background materials examine the subjects in detail, including charts, maps, and bibliographies. A composite form for the pretest/posttest consists of fifty multiple-choice questions. (CK)

Identifiers-Anthropology Curriculum Project

Part of the Anthropology Curriculum Project, the document introduces basic archaeological methods. It is intended for use by students in 5th grade social studies courses. The document contains a programmed text, a pronunciation guide for archaeological terms, and a multiple-choice test. The bulk of the document, the programmed text, proceeds according to a question/answer format. Students are directed to fill in blanks, complete language puzzles, match correct responses, define terms, and circle correct answers. They are then directed to proceed through the text to find correct responses to the questions. The pronunciation guide lists and divides into syllables over 25 vocabulary terms from the programmed text. The archaeological methods test presents 50 multiple-choice questions based on the text. An answer key is provided. Also available to accompany the unit is a tape to aid students in acquiring the new vocabulary. (DB)

Identifiers-Anthropology Curriculum Project

The 30-minute color 16mm sound film, available from the International Film Bureau, introduces students to the science of archaeology. Originally intended by developers of the Anthropology Curriculum Project as part of an elementary school unit on culture, the film can also be used in high school and university level anthropology and history courses and in museum education programs. Focusing on archaeological methods, the film shows how archaeologists working in the southeastern United States locate and excavate a site and examine their findings. Information is presented on preliminary research, surveying and mapping, digging, removing and cleaning objects, cataloging, preserving, and dating artifacts by stratigraphy and Carbon 14 methods. Final scenes show artifacts of the Etowah Indians uncovered by archaeologists in Georgia and explain how archaeologists record and publish findings for the benefit of other scientists interested in similar areas or methods. This document on the life cycle contains the 7th grade teacher background material, student activities component, and a unit test. The major objective of the unit is to encourage students to think critically about their own past and future through examination of how people in various cultures live. The teacher background component is presented in three sections. Section I introduces the concept of life cycle, presents an overview of anthropology, and describes comparative and holistic approaches to investigating cultures. Section II focuses on influences on the course of life cycle events, including heredity, nutrition, prenatal environment, disease, emotional factors, and cultural factors. Section III presents case studies of the Tiv (African tribal people), Balkan peasants, Chinese, and the American Middle class Information is presented on cultural background, life cycle stages, and on contrasting life cycle characteristics among groups. The student textbook and activities component is presented in seven chapters. Chapter I introduce anthropological terms and concepts; explore how and why students should study the life cycle and outlines major life cycle stages; offer an overview of American, Chinese, Tiv, and Balkan cultures; and compare, contrast, and summarize infancy, childhood, and adulthood in the four cultures. An appendix presents review questions, activities, resource material, and vocabulary. The test component includes 50 multiple-choice questions based on material presented in the teacher and student texts. (DB)

Identifiers-Anthropology Curriculum Project

Part of the Anthropology Curriculum Project, the document introduces social studies classroom teachers and junior high school students to the study of language and emphasizes the importance of language as a part of culture. The document contains a teacher background component and a student text. The teacher background material is presented in five chapters. Chapter I introduces the concept of communication, reviews the communicational relationship between sender and receiver, and defines communication terms. Chapters II and III discuss linguistics and grammar, focusing on the sounds and meanings of speech and meanings of linguistic vocabulary. Chapter IV explains how the study of the history

of language helps anthropologists understand culture. The final chapter explores the relationship between culture and communication. The student text focuses on five topics, each of which is represented by a chapter ''All Men Have Language,'' ''How Language Affects Our Lives,'' ''The Nature of Language,'' ''How Scientists Study Language,'' and ''Languages are Always Changing.'' For each topic, information is presented on activities, vocabulary definitions, discussion of key concepts, tabular representation of concepts, and background information. Activities involve students in role playing, class discussion, defining terms, interpreting sounds, making tape recordings, library research, and deciphering simple linguistic codes. (DB)

Identifiers-Anthropology Curriculum Project

The regional and historical overview of race, caste, and prejudice is one of the units in the Anthropology Curriculum Project series. The major objective of the unit is to focus attention on discriminatory practices which grow out of physical differences and cultural attitudes. The document consists of teacher background materials and a student handbook. The teacher text is presented in three chapters. Chapter I defines race and explores the relationship between race and prejudice. Chapter II discusses social class and caste. Topics discussed include social status in open and closed societies, social stratification in different cultures (Japan, India, Europe, and the United States), and the effect of class on life chances. Chapter III relates prejudice to ethnocentrism and presents case studies of prejudice against religious, ethnic, and racial groups including blacks in the United States, Mormons, Jews, Chinese in Indonesia and Malaysia, Indians in Africa, and the Ibo in Nigeria. The student handbook is organized into four main categories activities, recall questions, discussion questions, and a glossary with a suggested reading guide for the text. Activities involve students in interviewing community members, role playing, analyzing newspaper and magazine articles, analyzing hate literature, investigating prejudice in employment and housing, and working with peers of another ethnic group. Part of the Anthropology Curriculum Project, the bibliography lists reprints on archaeology. Intended for use by social studies teachers, college instructors, and students, the document aims to stimulate research related to anthropology and education, to suggest course readings, and to contribute to the visibility of anthropology as a school subject. The bibliography is presented in three parts. Part I lists reprints of journal articles, popular magazine articles, conference articles, excerpts from site reports, and excerpts from books alphabetically by author. Subject areas of the reprints include the history of archaeology, archaeological theory and methods, art, language, area studies, and information from related disciplines such as geology, geography, and physical anthropology. For each citation, information is presented on date of publication, title, title and date of journals in which the article has been reprinted, and pages within each journal where the reprint can be located. Part II provides an index to the reprints by world area and subject. Part III lists the anthologies and other sources used in the bibliography. Each citation includes a list of the reprinted articles and excerpts. (DB)

Major arguments and background of the worldwide land reform debate are reviewed. In developing nations in Africa, Asia, and Latin America, the control of farmland remains a principal key to wealth, status, and power. Rural landless peasants at the bottom of the socioeconomic ladder, estimated by the World Bank at more than 600 million people, are unable to meet basic needs such as food, fuel, shelter, education, health care, and family planning. Review of international agricultural output data indicates that the economic case for land reform often rivals the social case for redistributive policies. Not only do grossly skewed land ownership and oppressive tenancy conditions have social consequences, they also result in a system which uses land and capital less efficiently than small family farms. In addition to increased crop output, the economic case for land reform also rests on self-propelled economic development, full employment, and political and economic stability. However, although United Nations officials and diplomats from developing countries realize the contribution that land reform can make to agricultural progress, land reform is generally avoided by political maneuvering. The conclusion is that if developing nations combine land redistribution with population stabilization and intelligent use of foreign capital, they will generate more equitable and efficient land use. Values in History: Changing Interpretations of the American Presidency from 1945-1965.

Pub Date-6 Jul 79
Note-12p ; Paper presented at Conference on the Teaching of History (Denton, Texas, October 27-28, 1978)
Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Federal Government, Foreign Policy, Governance, *Government (Administrative Body), Governmental Structure, Government Role, *Leadership, *Political Power, Power Structure, *Presidents, Social Change, Social Sciences, *United States History

The paper traces the period 1945-65 when scholars of the American presidency changed their emphasis from the study of individual presidents to examination of the presidency itself and the powers it encompassed. The change was prompted by events such as World War II, development of the atomic bomb, and the Cold War. Evidence that mankind was capable of self-destruction and the threat of nuclear war led scholars to examine the powers of the presidency in shaping policy and leading the public. Contrary to traditional thinking, it was observed that the Presidential Cabinet was not a unified group. Richard Fenno (The President's Cabinet,'' 1959) found that each cabinet member fends for himself with little consideration for cabinet unity. Also, cabinet members tend to develop their own lines of power which may conflict with objectives of the administration. Several studies revealed that the President does not necessarily stand at the head of his party and that his leadership is not essential to the proper functioning of the party on all levels. Rather, it appears that both parties contain wings which support either the President or the Congress. One analysis of the relationship between the President and Congress showed that Congress initiated more legislation than did the President. In terms of foreign policy, the President became a figure of international leadership following World War II. (Author/AV)

Descriptors-*Cultural Awareness, Educational Change, Educational Improvement, *Educational Needs, Educational Objectives, Elementary Secondary Education, *Global Approach, *Needs Assessment, Student Attitudes, Student Needs, *Teacher Attitudes

An inventory to identify the actions, attitudes, and goals that a school staff feels are important in helping the school population become globally oriented is presented. Teachers rate their feelings about statements relevant to global education on a scale of positive/neutral/negative. Section I includes statements on adult actions, attitudes, and goals. Some statements are: at the classroom and building level, teachers and students have the opportunity to interact with people of various cultural and global points of view; adults find it comfortable to examine their own school system or community; adults consider a variety of options before making decisions; and adults monitor the natural tendency to become defensive when others disagree with them. Other statements concern knowledge of social and political facts of countries, adult influence on student behavior, and access to materials. Section II comprises statements on student actions, attitudes, and goals. These statements include: students understand the cultures of influencing their classmates; students understand how they have been shaped by their own culture; students should understand the ways that nations of the world are interdependently linked; and students plan strategies and implement change. Other statements address student understanding of forces that can cause social, political, economic, and technological change, of group work, and of options and consequences involved in decision making. Section III provides space for teachers to add their own statements and outlines possible steps for achieving global awareness in the school community. (KC)

Sociology: Scholarly Discipline or Profession?
Pub Date-8 Sep 77
Note-18p.; Paper presented as a statement introducing meetings of the Section on Undergraduate Education of the Annual Meeting of the American Sociological Association (Chicago, Illinois, September 8, 1977)
Available from-Department of Sociology, 168 Hamilton Hall, 070 A, University of North Carolina, Chapel Hill, North Carolina 27514 ($1.00)
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Course Organization, Educational Innovation, Educational Practice, *Effective Teaching, Higher Education, *Inquiry Training, Intellectual Disciplines, Relevance (Education), *Research Methodology, *Sociology, Teaching Procedures

Because the criteria, procedures, and goals of both the discipline (research) and the profession (teaching) of sociology are similar, the teaching of sociology may be vastly improved by exploiting the discipline in which sociologists are trained. First, the extension of reliable knowledge about societal issues is a criterion of both teaching and research. Also, the process of both discipline and profession should be inquiry; good questions in the classroom and in research result in a search for multiple conditions and causes and stimulate the process of inquiry. Finally, the goals of the discipline and the profession are both the transmission and the discovery of knowledge. Thus, in order to realize the potential for superlative instruction through the application of training as researchers, a radical revision of the teaching of sociology is required. The aim of a course, like that of research, would be to pursue a question that would entail both theory and methods. The course problem would be highlighted in the syllabus and students would register for a course in which they found the question compelling. Student inquiry would deal with methods: indicators, validity, reliability, and measurement. After assembling results, students would then consider extensions and applications of their findings. Publication of these findings would represent the culmination of the course and would reveal the department's record for that semester. (Author/KC)

Anthropologists in the Looking Glass.
Pub Date-Nov 78
Note-10p.; Paper presented at Annual Meeting of the American Anthropological Association (Los Angeles, California, 1978)
Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Anthropology, Group Membership, *Group Structure, Higher Education, *Professional Associations, Social History, Social Science Research, *Social Stratification, Status, Trend Analysis
Identifiers-American Anthropoligical Association

A historical and anthropological analysis of the nature of conventions held by the American Anthropological Association (AAA) is presented. The author, who is an anthropologist, plays the role of participant observer in studying the phenomenon of meetings of the AAA. During the late 1940s and early 1950s, AAA meetings were very small and scholarly. Following World War II there was a movement away from pure scholarship toward more practical applications of anthropology, probably in order to make the AAA more relevant to research being conducted and funded by the government. Social structure within the AAA became pronounced throughout the 1960s as the association membership increased and regional societies held their own meetings. In response to fluctuations in the economy and the job market, these meetings varied in the extent to which parties were given by member universities to recruit graduate students. Age- and status-conscious behavior became apparent as older, better-known scholars sought out their colleagues at the meetings and young students could only make acquaintance with other young students who were attending. Little intellectual interaction took place because the older scholars generally attended to present papers, not to attend sessions given by others. Young students attended mainly to hear the papers, not to present them. Visible stratification supported the differences among attendees in the form of color-coded name tags to reflect member, fellow, or student status. The author concludes that the AAA is just as trapped in cultural constraints as are the societies which its members study. (AV)

Descriptors-Business, *Business Education, *Economic Education, Economics, Elementary Secondary Education, Higher Education, Nonprofit Organizations, *Organizations (Groups), Professional Associations, Resource Materials

Approximately 180 organizations are listed and described in this directory which was designed to inform educators and researchers about organizations that provide or are interested in business and/or economic education materials and information. The directory was compiled to provide an initial review of the many organizations in the field of business and economic education. Each citation contains the title of the organization; address; phone number; name of president or public relations director; a brief statement of objective; information about the organization, including staff and budget; and an overview of program activities. The directory concludes with a listing of chairs of business and free enterprise at American universities and colleges, an outline of topics which might be studied in an economics education seminar, an overview of topics which Standard Oil Company (Indiana) thinks students should study in a unit on the American market system, an explanation of corporate support of economic education, a copy of a proposal which a group interested in economic education might submit to a corporation for funding, and a list of 25 questions to be answered in planning an economic education program. Descriptors-*Degree Requirements, *Geography, Geography Instruction, *Graduate Study, Higher Education, Universities

This guide to graduate departments of geography provides a comprehensive listing of information about requirements, course offerings, financial aid, and personnel for approximately 150 colleges and universities in the United States and Canada. It is intended to assist college and university departments of geography in answering inquiries received from students concerning graduate training. Institutions are indexed alphabetically. Information presented for each entry includes degrees offered, number of degrees granted from June 1977 to June 1978, person to contact for catalogue and further information, programs and research facilities, academic plan, admission requirements, financial aid, and name, degree, and area of interest of faculty members. An alphabetical staff directory and a geographical index of institutions conclude the directory. (DB)

West Bloomfield Schools Social Studies Curriculum K-12.
West Bloomfield Schools, Mich.
Pub Date-Jul 76
Note-320p.
Pub Type- Guides - Classroom - Teacher (052)
EDRS Price - MF01/PC13 Plus Postage.
Descriptors-American Culture, *Behavioral Objectives, Career Education, City Problems, *Curriculum, Data Analysis, Ecology, Educational Objectives, Educational Resources, Elementary Secondary Education, Evaluation Methods, Futures (of Society), *Learning Activities, Minority Groups, Problem Solving, Skill Development, Socialization, Social Problems, *Social Studies

The curriculum guide outlines behavioral objectives, learning activities, evaluation methods, and resources to help K-12 classroom teachers develop and implement social studies programs. Major objectives are to extend knowledge, develop skills to make effective use of this knowledge, and to facilitate the socialization process. The first section presents an overview of the social studies program of the West Bloomfield schools. Next are charts illustrating subjects and skills by grade level in areas of problem solving, values clarification, thinking, gathering and sharing information, and interpreting data. Separate rationales are presented for elementary, junior high, and senior high school social studies curricula. The bulk of the document presents an outline of objectives, activities, teaching methods and resources for a variety of topics at each grade level. Topics include the immediate environment and health and safety (elementary grades); economics and urban studies (middle school); and American history and government (high school). Activities involve elementary school students in class discussion, viewing and analyzing films, and group art projects; junior high school students in role playing, educational games, and debating; and high school students in interpreting case studies, defining vocabulary, and analyzing historical data. Descriptors-Budgeting, Business, Class Activities, Community Study, Concept Teaching, Consumer Economics, *Economic Education, Economics, Educational Objectives, Elementary Secondary Education, *Fundamental Concepts, Higher Education, Instructional Innovation, *Interdisciplinary Approach, Investment, *Learning Activities, Marketing, Money Management, Program Development, Relationship, Resources, Simulation, Slow Learners, Social Studies, *Teacher Developed Materials, *Teaching Methods

Eighteen award winning, teacher-developed programs, projects, courses, and materials in economic education are presented in condensed versions. The case study projects are designed to be used in primary, intermediate, junior high, senior high, and college, and are organized into five chapters by grade level. Chapter I suggests ways to teach economic concepts in grades K-3 through activities using a minisociety simulation, a classroom corporation, discussion of economic roles throughout history, and building a house. Chapter II, for grades 4-6, focuses on neighborhood economics, comparison of interdependence in bees' systems with that of humans, the role of transportation in society, and the economics of running a school. Chapter III offers projects on the relationship of economic and political decisions through use of a simulation, a work experience painting classrooms, a study of market economy, and career education for junior high school students. Chapter IV, for high school, teaches practical economics to low-income students, some of them slow learners; economic concepts within a western civilization context; and consumer education. The concluding chapter, for college students, focuses on economic concepts and issues analysis through studies of the market system. An appendix at the end of each chapter provides brief overviews of additional courses and programs in economic education. For each case study, information is presented on grade level, project background, time allotment, objectives, activities, and evaluation. (CK)

Descriptors-Change Strategies, Cultural Awareness *Developing Nations, *Development, Economic Development, Global Approach, International Relations, Political Issues, Relationship, *Sciences, Scientific Enterprise, *Social Change, *Social Problems, Technological Advancement, *Technology, Values, World Problems

The collective theme of these seven essays calls for a new perspective on science and technology so that they are dedicated to the pursuit of truth and human liberties rather than to power, control, and exploitation. The authors of the essays are with various international development and research centers and projects in seven countries. John Galtung discusses technology not merely as a mode of production but as containing economic, social, cultural, and cognitive structures. Francisco R. Sagasti examines the role of science and technology in development, and presents a strategy for endogeneous development. A. Rahman suggests concrete steps for linking scientific and technological developments to a movement for social change. Ponna Wignaraja examines the dependence of development on the transfer of external capital and technology, and formulates an alternative perspective in terms of human development, participation, and self-reliance. John W. Forge discusses the problems and needs of African countries. Ashis Nandy calls for a set of values relating to a deeper understanding of the politics of technology in its cross-national and cross-cultural contexts. Ward Morehouse discusses the need to focus debate on the underlying issues of development strategies using capital-intensive, socially inappropriate, and environmentally destructive Western technologies. Identifiers-Controversial Issues

First in a series which offers educational resources and teaching techniques related to major social issues to high school social studies classroom teachers, the guide focuses on political and economic aspects of health care in the United States. The document is presented in four major chapters. Chapter I explores how economic and political science frameworks can be used to analyze policy issues. Chapter II presents an overview of health care in the United States. Topics discussed include costs, availability of services, advantages of private and public health care, policy choices, and health care insurance rates. Chapter III outlines objectives for the health care unit, including that students should be able to interpret health care cost data, assess alternative policies, and understand values involved in the controversy over a national health care policy. Chapter IV presents instructional activities which involve students in defining terms, comparing data, discussing issues in groups and in class, analyzing insurance rates, analyzing filmstrips, role playing, and answering questions based on reading assignments. For each activity, information is presented on grade level, sequence within the unit, time and material required, rationale, concepts, instructional objectives, teaching strategies, and pupil activities. Identifiers-Controversial Issues

Part of a series which offers educational resources and teaching techniques related to major social issues to high school social studies classroom teachers, the guide focuses on government regulation. The document is presented in four major chapters. Chapter I explores how economic and political science frameworks can be used to analyze policy issues. Chapter II presents an overview of the relationship between the economy and government regulation. Topics discussed include the economic rationale for regulation, control of natural monopolies, prevention of destructive competition, protection of sellers and consumers, regulatory processes, and evaluation of regulatory policy. Chapter IV presents instructional activities which involve students in identifying and describing problems involving governmental regulatory action, class discussion, participating in small group tasks, compiling master lists of alternative costs and benefits of various regulatory actions, preparing position papers, and analyzing films. For each activity, information is presented on grade level, sequence within the unit, time and material required, rationale, concepts, instructional objectives, teaching strategies, and pupil activities. Student readings, bibliographic suggestions, and illustrative material such as advertisements are included in the unit. (DB)

Descriptors-*Academic Achievement, *Cognitive Measurement, *Economic Education, *Economics, *Educational Testing, *Multiple Choice Tests, Secondary Education, Social Studies, Test Construction, Test Interpretation

Part of a series which offers educational resources and teaching techniques related to major social issues to high school social studies teachers, the booklet describes and reproduces a test measuring students' economic literacy. Part I is the test manual, which explains the objectives, value, development, and two-form structure of the test. It uses a content-cognitive schema which covers seven content categories (basic economic problems, economic systems, microeconomics, macroeconomics, world economy, economic institutions, and evaluation concepts), and two cognitive-level categorizations: one measuring student learning levels in terms of knowledge, comprehension, application, analysis, and evaluation; the other in terms of recognition-understanding, simple application, and complex application. The booklet presents five suggestions for use of the test, instructions for how to administer and score it, and details technical data such as standardization and norms, norm tables, item analysis, reliability, validity, correlation with general ability, and additional descriptive statistics. Part II consists of an explanation of the 72 questions in Form A and Form B. Each question and its four possible answers are reproduced, with the correct answer appearing in bold type. Other items include a rationale for each answer, and numbers recording the percentage of the norm with the correct answer (with and without economics background) and the discrimination coefficient. Appendices list the schools that participated in the test norming, handscoring keys, and an answer sheet. (CK)

Identifiers-Controversial Issues

Part of a series which offers educational resources and teaching techniques related to major social issues to high school social studies classroom teachers, the guide focuses on political and economic aspects of tax policy in the United States. The document is presented in three major chapters. Chapter I explores how economic and political science frameworks can be used to analyze policy issues. Chapter II presents an overview of taxation in the United States. Topics discussed include the role of taxes in United States economy, the nature of tax authority, economic bases for taxation, and criteria used in evaluating the worth of a tax. Chapter III outlines objectives for the tax policy unit, including that students should be able to define and evaluate various kinds of taxes, make informed decisions about reforms, and understand the values involved in tax policies and various tax issues. This chapter also presents instructional activities which involve students in defining terms, identifying and classifying taxes, discussing and analyzing issues in groups and in the class, working problem sheets, and role playing. For each activity, information is presented on recommended use, sequence within the unit, time and materials required, rationale, concepts, instructional objectives, teaching strategies, and pupil activities. This resource manual uses a general systems model for educational planning, instruction, and evaluation to describe a college introductory economics course. The goal of the manual is to help beginning or experienced instructors teach more effectively. The model components include needs, goals, objectives, constraints, planning and strategy, implementation, data collection, and evaluation, and are used to describe each part of the course as well as the entire course. Topics discussed are economics course content, learning theory, instructional objectives, lectures and classroom discussion techniques, essay questions and tests, multiple choice objective tests, organizing an economics course, development and evaluation of teaching skills through the use of videotapes, course and instructor evaluation, learning aids, microteaching, and interpersonal communication skills emphasizing empathy and genuineness. Three appendices include a program description of the 1973 Teacher Training Conference for Instructors of College Economics, a list of schools with training programs in teaching economics and selected sample syllabi, and description and ordering information for videotapes. The Back to Basics Curriculum as a Social Control Mechanism.

Syracuse Univ., N.Y. School of Education.

Pub Date- 79
Note-13p.
Pub Type- Information Analyses (070)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Authoritarianism, *Basic Skills, Educational Attitudes, Educational Change, *Educational Discrimination, Educational Needs, Educational Practice, Educational Problems, *Educational Trends, Elementary Secondary Education, *Family Role, Performance Based Education, *Power Structure, *Social Structure

Based on a review of literature by proponents and opponents of the back to basics movements, the authors contend that the movement will contribute to the continued existence of a stratified society in which the school reproduces existing power relationships. A summary of the literature of proponents presents varying ideas of what constitutes

basics'' in terms of curriculum, testing, standards, discipline, school structure, instructional methodology, and parental involvement. However, a broad outline may be described. The child is expected to fit into a school that views successful education as that which helps people fit into the system. The strong emphasis on subject matter is at the expense of social issues that might arouse disagreement among parents. The student accepts authority and the curricular decisions of adults. Opponents see the movement as coercive, ignoring the individuality of the student, uninformed, and culturally biased. Many opponents wish to define basics in their own terms: as flexibility in structuring the school environment, as a liberal education, and as social development. Both groups fail to recognize the crucial nature of family support and the effect on those students lacking the right'' kind of family. Effects of either approach would depend on supportiveness or opposition of the family. Thus, the poorest and most deprived will be excluded from basics'' schools by virtue of their not being the right'' kind of student from the right'' kind of family. (Author/KC)

Descriptors-*African Culture, *African History, *African Literature, Colonialism, Educational Problems, Elementary Secondary Education, Evaluation Criteria, Land Settlement, Political Power, Religion, Social Studies, *Textbook Bias, *Textbook Content

Based on an examination of 50 general social studies textbooks, the report discusses the most frequently found biases, misconceptions, omissions, inaccuracies, and misrepresentations. Criteria for judging the textbooks include: readable and suitable materials; accurate and current content; presentation of Africa as a diverse continent; open presentation of economic and political differences, and of African and global interdependence; depiction of history beginning with ancient times rather than with the arrival of the white man; inclusion of Africa's musical and artistic heritage; and use of African authors and sources. Common problems in textbooks are failure to mention African resistance to colonization and the negative effects of colonialism, misinterpretations of independence movements, the misconception that Africa is a rain forest, overemphasis on wild life, and use of the word ``tribe'' when ethnic, linguistic, or regional group would be more accurate. Failure to depict various marriage customs, lack of emphasis on representative groups, and emphasis on the exotic or ``weird'' are other problems. Also, inaccurate information, biases and misrepresentations exist about the apartheid policy in the Republic of South Africa, political instability, and African religions. Lists of textbooks reviewed, recommended general references, and references for problems discussed in the report are included. (KC)

Seif, Elliott
Good Citizenship, Humanistic Psychology, and Humanistic Education.
Pub Date- 79
Note-22p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Citizenship, Decision Making, *Educational Needs, Elementary Secondary Education, Experiential Learning, *Humanistic Education, Individual Development, Individual Needs, Individual Power, *Psychological Needs, *Self Actualization, Self Determination, Social Studies, Values

Humanistic psychology aids individuals in developing self-esteem and self-actualization and therefore is an excellent means of citizenship education. According to humanistic psychologists, the process of self-actualization involves the four stages of fulfilling physiological, safety, love, and esteem needs. Some characteristics of the self-actualized person are: a superior perception of reality; increased acceptance of self, of others, and of nature; independence of culture and environment; deep feelings of identification and sympathy for others; profound interpersonal relationships; a democratic character structure; and creativity. By paying more attention to meeting the physiological and psychological need of students, social studies educators aid in the development of good citizens. In order to meet these needs, greater emphasis should be placed on creating more democratic classroom environments; exploring feelings about self and others; giving students some responsibility in their own learning; participating through experiential learning; making connections between what is learned and one's own life; decision making, values clarification, and moral development; and understanding people. (KC)

Physical Education for Handicapped Students.
Virginia State Dept. of Education, Richmond. Div. of Special Education.
Pub Date-Sep 77
Note-68p.
Pub Type- Guides - Non-Classroom (055)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors-*Adapted Physical Education, *Athletic Equipment, *Elementary Secondary Education, Exceptional Child Education, *Handicapped Children, *Physical Facilities, *Program Development, Resource Guides, State Standards
Identifiers-*Virginia

This publication is designed as a resource guide for classroom teachers, special education teachers, and administrators in the state of Virginia in fulfilling state and national mandates for the physical education of handicapped children. Introductory discussion centers around (1) the term "handicapped" and the disabling conditions contained within that term; (2) determination of eligibility for special education; (3) development of individualized programs for each handicapped student; and (4) the requirement that students be placed in the least restrictive environment. Programming concerns examined include: (1) assessment; (2) long- and short-term goal formulation; (3) general course development; (4) teaching suggestions for specific handicapping conditions; and (5) evaluation of handicapped students' progress. A discussion of equipment needs for handicapped students examines facility needs both inside and outside the school building, basic equipment, and adaptive physical education equipment, including inexpensive homemade equipment. A bibliography of 69 publications on adapted physical education is included. (MJB)

Clark, Bettye Mathis Creswell, John L.
Participants' Versus Nonparticipants' Perception of Teacher Nonverbal Behavior.
Pub Date-78
Note-39p.
Pub Type- Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Body Language, *Interaction Process Analysis, *Nonverbal Communication, Observation, Rating Scales, Reactive Behavior, Stimulus Behavior, *Student Reaction, Student Teacher Relationship, *Teacher Behavior

It was hypothesized that the perception of the nonverbal behavior of the teacher held by the student may differ from the perception held by an outside observer. This study was designed to compare participant and nonparticipant observers' perception of teacher nonverbal behavior as having encouraging or discouraging affect qualities during a teacher-learning process. Five ninth-grade teachers volunteered to participate in the study. Seven students were randomly selected from the stimulus teacher's class, and seven former teachers were chosen as the nonparticipant observers. Video tapes of regular classroom behaviors of teachers and their interaction were made. After editing, the tapes were viewed by the students of the class (participants) and the nonparticipating observers. Questionnaires designed to reveal how the nonverbal behaviors of the teacher were interpreted by the students and observers were filled out following the viewing. The findings suggest that participants and nonparticipants do not perceive the nonverbal behavior of the teacher similarly. The findings of the study also show that it is possible to define and demonstrate the relevance of a number of nonverbal cues that each group of raters used as predictors or reasons for their assessment of the teachers' behavior. Appendix A presents the table used for rating teacher behavior and the cues responsible for ratings. Appendix B contains a presentation of the responses of the students to the questionnaire. (JD)

Johnson, Charles E. And Others

Verifying Teacher Competencies for Their Generic Qualities.

Pub Date-Mar 78

Note-19p.; Paper presented at the Annual Meeting of the American Educational Research Association (Toronto, Canada, March 27-31, 1978)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Class Management, *Classroom Techniques, *Effective Teaching, Surveys, Teacher Attitudes, *Teacher Behavior, Teaching Methods, *Teaching Skills, *Teaching Techniques

The purpose of this study was to determine the extent a set of teacher competencies thought to be generic were considered to be essential by all teachers regardless of their subject or level. A list of 52 competencies was compiled to be submitted to participants in a comprehensive survey of education professionals elementary and secondary teachers, administrators, college faculty, and education specialists. Of the 52 statements, 33 were rated by the respondents to be within a range that included the rank of highly desirable'' or essential.'' It is inferred that there are particular teacher competencies that may be considered to be generic. The suggestion is made that these competencies be used as valid assessment instruments for teacher certification purposes. (JD)

Descriptors-Accreditation (Institutions), *Administrator Evaluation, Educational Legislation, Educational Objectives, Educational Programs, *Evaluators, *Institutional Research, *Observation, *Program Evaluation, State Standards, *Teacher Education

This training system was designed for individuals called upon to evaluate teacher education programs and institutional aspects of institutions of higher education. The manual used for this training is a guide for a prospective program specialist operating in a simulated on-site review of a teacher education program conducting a self-study to determine that the program meets state accreditation requirements. The self-study materials used are fictionalized; however, the format in which the materials are presented is real. Each section of the training materials was designed to highlight an activity of a program specialist before arriving on campus and to emphasize the procedures implemented during an on-site review. The end product of these activities is a written report that documents the findings of the program specialist in relation to criteria found in formal state standards. These standards will be the basis on which the program specialist will decide the status of the institution's elementary education program. (JD)

The Effects of an Orientation to Sociolinguistics on the Perceptions of Teaching Candidates.

Pub Date-79
Note-15p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Academic Achievement, Ethnic Groups, *Expectation, Negative Attitudes, Nonstandard Dialects, Social Attitudes, *Social Dialects, *Sociolinguistics, Stereotypes, Student Characteristics, Student Teacher Relationship, *Teacher Attitudes, Teacher Education

A report is given of an investigation examining the influence of student dialect and ethnicity on teachers' expectations of academic performance. The subjects of the study were secondary level teaching candidates enrolled in a generic methods course comprised of ethnically mixed learners. A control group of the teachers was given a course in sociolinguistics. The theme of this course was that language prejudices are socially based and, while dialect forms may be different, these dialects are functional in communication. Results of this investigation indicate that dialect has a significant effect on teaching candidate expectancy of learners' academic behavior. The candidates exposed to a course in sociolinguistics exhibited less biased attitudes than their counterparts. It is suggested that such courses be incorporated in teacher education programs. (JD)

These lesson plans are designed to be used with the textbook of the same title. Each lesson plan is broken into four activity parts. The four parts and their major purposes in the scheme of the lesson are as follows: (1) introductory activity; (2) fitness development activity; (3) lesson focus activities; and (4) game activity. The material and organization in the lesson plan format is broken into four columns. The first column, Movement Experience Content,'' lists the sequences that will be taught in the lesson. The second column is labeled Organization and Teaching Hints'' and provides the teacher points for efficient organization of the class, stress points, and teaching cues. Expected Student Objectives and Outcomes'' is the third category and lists objectives that students should reach. The Notes and References'' column references all activities in the textbook for easy referral and provides evaluation criteria. (Authors/JD)

Pub Date-Dec 78
Contract-300-77-0156
Note-136p.
Pub Type- Reports - Descriptive (141)
EDRS Price - MF01/PC06 Plus Postage.
Descriptors-Decision Making, *Educational Objectives, Government Role, Program Development, *Program Evaluation, *Program Improvement, Summative Evaluation
Identifiers-*Teacher Corps

Descriptive characteristics of participants in the 1978 Teacher Corps Conference are first presented in this report. This data includes information on role in the teacher corps project, age, race, and geographic location. The report discusses participants' overall assessments of the sessions they attended daily. The major events of the conference are described, as well as how each event and its component sessions were judged by the participants and how they were selected for follow-up at the project level. The overall evaluations of the entire conference as seen in the post conference ratings of success are presented. A section is included dealing with interpretations of the evaluation data and recommendations for future national conferences. (Author/JD)

Janesick, Valerie J.

An Ethnographic Study of a Teacher's Classroom Perspective: Implications for Curriculum.

Michigan State Univ., East Lansing. Inst. for Research on Teaching.
Spons Agency-National Inst. of Education (DHEW), Washington, D.C.
Pub Date-79
Note-32p.
Available from-Institute for Research on Teaching, 252 Erickson Hall, Michigan State University, East Lansing, Michigan 48823 ($2.25)
Pub Type- Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*Class Management, Classroom Environment, *Group Dynamics, Interpersonal Relationship, *Leadership Qualities, *Role Models, Student Behavior, *Student Teacher Relationship, *Teacher Behavior, Teaching Styles

A profile of a male sixth-grade teacher is presented with the objective of demonstrating how his perception of his class determined his decision making and leadership style. The teacher was observed over a full school year. This teacher perceived his class as a cohesive, interacting group and he, as its leader, demonstrated the behaviors he wished his students to model. The result of this teacher's perspective was a class with a strong sense of unity. The classroom curriculum was group-centered and carried out by the group, with the teacher as leader. Outside intervention by the principal or other staff members and directives from parents had little or no effect on the classroom curriculum. The reported observation of this teacher lends support to the notion that teaching remains an individual enterprise dealing with present-oriented situations in the classroom. In this case, the teacher's classroom perspective was, essentially, the curriculum of the classroom. (JD)

Wall, Robert And Others

A Human Relations Course: Does It Make A Difference?

Pub Date-21 Feb 79

Note-11p.; Paper presented at the Eastern Educational Research Association Annual Meeting (Charleston, South Carolina, February 21, 1979).

Pub Type- Speeches/Meeting Papers (150) - Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Changing Attitudes, *Course Evaluation, Higher Education, *Human Relations, Interpersonal Competence, Self Concept

A college human relations course is described and evaluated, and the change and rate of change in students' attitudes toward self and others is examined. One hundred and sixty students of different backgrounds who were enrolled in five sections of a human relations course answered questions concerning self-concept and attitudes toward various ethnic, socioeconomic, and racial groups. Substantial change was found in attitude toward self, with little change evidenced in attitude course due to the evaluation is noted, as are nonstatistical information gleaned through course due to the evaluation are noted, as are nonstatistical information gleaned through the study and indications of the attractiveness of the course to students. Farrah, George A.
Focusing on Teachers' Self-Concept and Motivation.
Pub Date- 77
Note-19p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Age, *Data Analysis, *Measurement Instruments, *Motivation, *Self Concept, Sex (Characteristics), *Teacher Characteristics, *Teaching Experience
Identifiers-Instructional Level

Results of a statistical investigation relating teacher characteristics to ten dimensions of their self-concept and motivation are reported. The Self-Concept and Motivation Inventory for Teachers (SCAMINT) was used to compare the two sets of data. Specific findings for the characteristics of teacher sex, age, level of instructional duties, and teaching experience are presented, as are incidental findings relating to other settings. Implications of the study for the identification of teaching ability, administrator style, and role differentiation are noted. It is urged that more attention be paid to self-concept and motivation as focal points for promoting school change. (MJB)

Nordberg, Robert B.
The Death of Intelligence: A Theoretical Paper.
Pub Date-77
Note-34p.

Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Abstract Reasoning, *Academic Aptitude, Curriculum, *Educational Objectives, Educational Philosophy, Educational Psychology, *Educational Theories, *Intelligence, *Intelligence Differences, Intelligence Tests, Teaching Methods
Identifiers-Dewey (John)

Three distinct theories can be set forth for viewing intelligence: a super-intellect theory'' associated with the belief in innate ideas; a sensualistic theory that posits no intellectual role beyond synthesizing of sense-data; and a concept of intelligence as a power to abstract, judge, and reason. Many chronic and current educational problems can be traced to faulty conceptions of intelligence. This is especially true if the implications are examined of the abstractive view for educational purposes, instructional methods, curriculum, the choice of teachers and of students, the nature of knowledge, and other matters. Intellectual development on some scale is the proximate end of education; studies have shown that when material presented is meaningful to students, both learning and retention are more effective. This proximate goal has to a large degree been lost in contemporary society and education. (DS)

Pitzl, Gerald R.
Revitalizing Interdisciplinary Offerings.
Pub Date-15 Nov 77
Note-11p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Core Curriculum, Course Content, *Curriculum Design, *Global Approach, *Higher Education, Individual Development, *Interdisciplinary Approach

It is argued in this paper that the interdisciplinary course provides a setting for viewing the ordered relationships that exist among disciplines. The necessity of this approach is pointed out as it reflects the need for a highly disarticulated curriculum to address and find solutions to the complex probiems facing the world community. A justification of this view and the implementation of the premises it puts forth is presented as a desirable curriculum change in higher education. (JD)

Descriptors-*College Teachers, *Field Experience Programs, *Graduate Students, Higher Education, *Practicums, Program Descriptions, *Teacher Education, Teaching Methods, *Team Teaching

An education program designed to provide experiences for graduate students that would prepare them to teach at the college level is described. The practicum courses offered were developed to bring theoretical and practical aspects of undergraduate teacher education into a clear and interacting relationship and to help students in applying what they had learned theoretically to actual and simulated educational situations. Students were assigned to teaching teams responsible for two undergraduate college courses and had direct and regular contact with small groups of students for two semesters. Opportunities were provided for observing teaching in public school classrooms, leading group discussions with their peers, and giving short lectures. The students had close contacts with experienced faculty members who evaluated their work and served as role models. (JD)

Providing Instructional Feedback to Students in Education Classes.

Pub Date-77

Note-18p.

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Academic Achievement, *Audiotape Recordings, *Feedback, Individualized Instruction, Preservice Education, Student Attitudes, *Teacher Education, Teacher Educators, *Teaching Methods

The results of a study to determine the relative effectiveness of written and audiotaped feedback to students are examined. Subjects of this study were education students in a university. One group of subjects received audio feedback on cassette tape on assignments; the other received written feedback. No statistical difference was found between written and tape-recorded feedback in improving student performance. It was found, however, that teachers found audiotape response less time consuming than written, and that students had a more positive attitude toward tape-recorded feedback than written feedback. (JD)

Descriptors-Behavior Change, *Changing Attitudes, Females, *Sensitivity Training, *Sex Discrimination, *Sex Stereotypes, Social Attitudes, *Teacher Attitudes, Teacher Education

The effects of short-term consciousness-raising instruction on the sexist attitudes of preservice teachers toward women was examined. To test the ability of teacher education institutions to lessen the level of sexist attitudes, 70 students were divided into three groups, a control group and two treatment groups. Each group was pretested and posttested for societal and educational sexist attitudes. A statistically significant difference in the posttest levels of educational sexist attitudes between the group receiving sensitivity instruction and the treatment groups was found. (Author/JD)

Descriptors-Effective Teaching, Improvement Programs, *Individual Differences, *Inservice Programs, Inservice Teacher Education, Interaction, *Program Effectiveness, *Self Concept, Teacher Attitudes, *Teacher Motivation, Teaching Styles

The purpose of this investigation was to learn if individual differences between teachers affect the degree to which they are receptive to inservice training. The specific objective was to determine if the conceptual systems teachers use to organize and act on elements in their own environments differentially affected their participation in and response to a training program in new methods of teaching. Results suggest that not only will teachers' conceptual systems influence what they learn from inservice efforts, but also how much they want to try to use what they have learned. (JD)

Descriptors-*Academic Achievement, Behavior Change, *Class Management, Classroom Environment, *Classroom Techniques, Elementary Education, Group Dynamics, *Performance Factors, Student Behavior, Student Teacher Relationship, *Teacher Behavior, Teaching Methods

The classroom management techniques of elementary school teachers were observed to determine their effectiveness in promoting desirable on-task behavior on the part of pupils. Seven approaches to class management were used as a framework for observation authoritarian, behavior modification, common sense, group process, instructional emphasis, permissive, and socioemotional relationship between teacher and student. Thirty-five elementary school teachers were observed for two full morning classroom sessions during the second semester of the school year. During each observation period, the observer recorded student on-task behavior and teacher managerial behaviors. Results indicate that the use of group processes and socioemotional climate managerial behaviors are positively related to student on-task behavior, while the use of authoritarian and permissive managerial behaviors are negatively related. A pluralistic approach using behavior modification, group process, and socioemotional climate approaches produced the most satisfactory on-task behaviors in students. (JD)

An Observational Study of Teachers' Expectancy Effects and Their Mediating Mechanisms.

Pub Date-79
Note-6p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Expectation, Feedback, *Interaction Process Analysis, Nonverbal Communication, Performance Factors, *Response Mode, *Student Behavior, *Teacher Behavior, Teacher Response

The theory that teachers treat students from whom they expect superior achievement differently than those from whom they expect inferior performance is examined. Five ways of reacting on the part of the teacher are identified for the purpose of this study teacher warmth, teacher feedback, teacher selection of materials, opportunity offered for student response, and frequency of touch. Physical education teachers were asked to rank their students as either high or low achievers and were then observed for a two-week period. The following behaviors were observed: (1) high achieving students were asked more questions and given more opportunity to respond; (2) teachers treated designated high achievers more warmly than designated low achievers; (3) there was little evidence that teachers provided more feedback to high achievers; (4) there was no significant evidence that teachers taught more new material to high achievers; and (5) teachers did not touch their designated high achievers more than designated low achievers. (JD)

Descriptors-*Emotional Adjustment, Emotional Problems, Longitudinal Studies, Marriage, *Role Conflict, Self Concept, *Stress Variables, Teacher Attitudes, Teacher Behavior, *Teacher Morale, *Teachers, Working Parents

The results of a four-year study of teachers' perceptions of their role at work and in private life are presented. Information about the teachers came from interviews, observations, and written statements of concerns of ten teachers during the first, third, and fourth year of teaching. Changes in the private segments of their personal lives such as marriage and parenthood changed their perceptions of priorities and satisfactions. Personal-professional role conflicts arose from concurrent demands for their time and allegiance. In the fourth year behaviors emerged designed to cope with tedium of the teaching job and growing role conflicts. Some abbreviated case histories are used for illustration. (JD)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*Academic Achievement, *Cognitive Style, Individual Characteristics, *Interaction Process Analysis, Preservice Education, Psychological Patterns, Student Attitudes, *Teacher Education, *Teaching Methods, *Teaching Styles

The interactive effects of a student's conceptual level and the structure of the teaching environment are examined. Concept level for the purposes of this study is identified as maturity in information processing and in interpersonal competence. Thirty-three preservice teachers were classified as being at a high, middle, or low conceptual level. Instruction techniques for these students were considered as high structure'' (criteria highly controlled by the instructor) and low structure'' (criteria minimally controlled by the instructor). Results indicate that low-concept-level learners benefit more from high-structure instructional environments than from low-structure environments, and, conversely, high-concept-level students profit most from low-structure environments and are less affected by the variation in structure. The Relationship of Human Values to Perceived Teaching Styles.
Pub Date-Aug 78
Note-16p.
Pub Type- Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors Behavior Patterns, *Educational Strategies, Personality Studies, *Personal Values, *Social Values, *Teacher Attitudes, Teacher Behavior, *Teaching Styles, Teaching Techniques

The relationship between a teacher's human values orientation and individual teaching style is explored. Undergraduate education majors were asked to complete the Teaching Style Q-Sort instrument containing 16 statements about teacher behavior, identifying each as most like or unlike their own style. The subjects were also asked to respond to the Rokeach Value Survey identifying those social and personal values they held in most and least esteem. An analysis of the results of this study indicated a tentative relationship between teaching styles and individual values. A number of specific values showed significant differences in ranking across teaching styles. (JD)

Descriptors-Classroom Observation Techniques, *Interaction Process Analysis, Physical Education, *Teacher Behavior, *Teacher Response, Teaching Styles

The purpose of this study was to observe and describe the teaching behavior and interaction patterns of four elementary school physical education teachers longitudinally. Each teacher was observed twice a day (AM and PM) for a period of 20 consecutive days, resulting in 40 observations per subject. The following conclusions were reached: (1) teaching behavior and interaction patterns vary minimally over 20 days; (2) traditional, nonhumanistic teaching styles prevailed in the movement classes observed; (3) variable of time of day, grade level, and day of the week have a negligible influence on teaching behavior and interaction in physical education classes; (4) significant differences exist in teaching behavior between male and female teachers; and (5) content of the lesson was found to be an influential factor on interaction and teaching behavior in the gymnasium. (JD)

Descriptors-*Affective Behavior, Behavior Change, *Class Management, Emotional Response, Group Dynamics, *Interaction Process Analysis, Interpersonal Relationship, Reactive Behavior, *Student Behavior, Student Characteristics, *Teacher Behavior, Teacher Response

The study reported in this paper focuses on teacher perceptions of students' affective or noncognitive behavior in the classroom. Elementary school teachers were asked to describe in writing five events or situations involving students that they judged to be fairly typical and that had occurred in their classrooms. The emphasis was upon events rather than individuals, so a broad perspective might be obtained on the teachers' perceptions of student behavior. Results suggest that students' adjustment to the classroom and other students is of greater concern to teachers than individual students' personal adjustment. It was also concluded that teachers' perceptions of classroom behavior is based more upon the group than upon individuals. (JD)

Descriptors-*Academic Achievement, Class Management, Elementary Education, Homework, *Interval Pacing, *Learning Processes, Planning, Programed Instruction, *Teaching Techniques, *Time Factors (Learning)

In examining three dimensions of instructional time (teacher preparation time, student homework time, direct in-class instructional time), the objectives of this study were to determine which dimensions or combination of dimensions correlate with achievement, and whether the dimensions differentially affect achievement based on grade and ability level. Elementary students were given instruction in a nutrition curriculum over a three-month period. Time data were analyzed by activity, with a posttest nutrition achievement test as the dependent variable and the three time dimensions, grade, and ability levels as independent variables in a series of stepwise multiple regressions. Direct instruction consistently predicted posttest achievement. (Authors/JD)

Available from-Motor Development Center, Kent State University School, Kent State University, Kent, Ohio 44242 ($5.75)
Pub Type- Reports - Research (143) - Dissertations/Theses (040)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*Kindergarten Children, Observation, *Perceptual Motor Coordination, Performance Factors, *Psychomotor Skills, Visual Learning, *Visual Perception

The purpose of this study was to determine if five-year-old children displaying high or low ability to process visual information exhibited the same high-low ability in proficiency of motor tasks which were dependent upon visual information for successful completion. The subjects were 40 five-year-old children who were required to pass a visual acuity screening test. The children were assigned to a high or low group for each of six factors: (1) vision; (2) stationary striking of a ball; (3) moving striking; (4) aerial catching; (5) bounce catching from five feet; and (6) bounce catching from ten feet. It was concluded that no significant relationship existed between visual processes and motor tasks requiring vision for successful completion. A significant difference was found between high-low bounce catch from ten feet on the various visual tasks. The high group performed significantly better on the vision tasks than the low group. It is concluded that this is because this task required a perceptual sophistication not required by the others. (JD)

Identifiers-Annehurst Curriculum Classification System, Florida

Three responsibilities of educators with regard to metric instruction are outlined providing metric awareness, providing inservice education, and providing materials for metric instruction and a description is provided of a system for classifying instructional materials in a school library so they become more readily available to teachers. The Annehurst Curriculum Classification System, designed for classifying, organizing, storing, and retrieving curriculum materials, is presented in detail. The system involves making 16 decisions about each piece of curriculum material and labeling each item according to those 16 decisions. (DS)

The failure of educational research to fully allow for limitations in methodology when drawing conclusions is faulted. In addition to this, a failure on the part of the media educational and other to fully publicize these limitations is also criticized. Methodological shortcomings of the 1977-78 American Institutes of Research (AIR) study of Title VII bilingual education are used as an example of faulty research methodology and subsequent distortion of the results of that research by media. Guidelines for evaluating the worth of educational research in reference to six possible limitations are presented. (MJB)

The Congruency of Lesson Plans and Teaching.

Pub Date- 79
Note-7p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Lesson Plans, Planning, Preservice Education, *Student Teaching, *Teaching Procedures
Identifiers-*Lesson Delivery

The lesson plans of 30 elementary and secondary level student teachers and audiotapes of lessons delivered from these plans are compared to determine the congruence between prelesson planning and actual delivery. An analysis of the audiotapes in comparison to written plans is given with reference to: (1) planning for each of three phases (introduction, development, culmination); (2) time spent on each of the phases; (3) planning of lesson objectives and their communication to students; and (4) planning and delivery activities. Two primary conclusions are drawn: first, student teachers actually attend to more phases and activities than indicated in the written plans, and second, elementary level student teachers seem to be more inclined to present lessons as planned. Several implications for teacher education are noted. First, student teachers may be able to conceptualize the instructional process more easily than they can communicate it in writing. Second, methods instructors may need to give greater attention to the problems involved in the instructional planning process. Finally, in neither the lesson plans nor in the lessons themselves was there any significant evidence that student teachers attended to the more sophisticated aspects of instructional planning such as pacing, evaluation, or individualization. Action-oriented learning activities are focused on in this book which attempts to outline an approach for stimulating and motivating children to learn through movement. The book is divided into five parts, each dealing with an aspect of the elementary school curriculum. Part one is concerned with the language arts and is divided into three chapters relating how listening and speaking, reading and writing, and nonverbal communication can be taught through physical activities. Part two presents the concepts of mathematics, and the lessons that have been developed are the whole numbers and the metric system; mathematical sentences, sets, and field properties; and quantitative ideas, measuring and graphing, and geometry. Part three discusses the teaching of science and covers stability, levers, Newton's laws of motion, factors affecting the human body and its movement, sound, and biological and earth sciences. Social studies concepts including living and working together, our home the earth, our country's heritage, and regional studies are presented in part four. Part five concerns the related arts concepts, and covers activities designed to teach the concepts of music, with activities exploring dynamic, tempo, pitch, mood, shape, phrasing, and rhythmic structure, and concepts of art and movement including line, form, shape, space, color, and design and composition. Illustrations and diagrams are included, and a lesson plan is set forth for each curricular area. (Author/DS)

Power Relationships in the Student Teaching Triad.

Pub Date-10 Apr 79

Note-31p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*College Supervisors, *Cooperating Teachers, Field Experience Programs, *Interpersonal Relationship, *Power Structure, *Student Evaluation, *Student Teachers, Student Teaching, Teacher Education

The power relationship between the student teacher, cooperating teacher, and the university supervisor is analyzed. This triadic relationship is commonly hierarchical with a superior cooperating teacher, an inferior student teacher, and a university supervisor playing only a tangential role that is frequently reduced to corroborating the opinions of the cooperating teacher. Four case studies are presented and discussed as they typify this traditional relationship. Revisions are suggested in the role of the supervisor and cooperating teacher as critics of the student teacher. (JD)

A Survey of Microteaching in Secondary Teacher Education Programs of NCATE Accredited Colleges and Universities.

Pub Date-Apr 79
Note-20p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Academic Achievement, Audiovisual Aids, *Microteaching, *Program Evaluation, Teacher Behavior, *Teacher Education, Training Techniques

Secondary teacher education programs were surveyed in order to determine: (1) How widespread is the use of microteaching? (2) Where is microteaching found within the programs? (3) How are selected operational features of microteaching used? (4) With what frequency are selected operational features used? It was found that the number of secondary education programs using microteaching has increased. Microteaching is used most often in general methods courses and subject methods courses. The majority of the institutions use videotape recordings in microlessons and the three most frequently used teaching skills are "fluency in asking questions," "providing reinforcement," and "using praise." Teachers' Changing Perceptions of Self and Others Throughout the Teaching Career: Some Perspectives from an Interview Study of Fifty Retired Secondary School Teachers.

Pub Date-Apr 79
Note-54p.; Paper presented at the Annual Meeting of the American Education Research Association (San Francisco, California, April 8-12, 1979)
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*Changing Attitudes, Emotional Adjustment, *Job Satisfaction, Older Adults, *Psychological Needs, *Self Concept, *Teacher Attitudes, Teacher Morale, Teacher Retirement

Fifty retired teachers were interviewed in an effort to acquire information about how their attitudes and outlooks changed throughout the course of careers in secondary schools spanning an average period of 38 years each. Of particular interest in the study was the emergence of changes in personal attitudes and changes in attitudes toward others. Four areas of personal change were reported by the retired teachers as they recalled their careers: (1) changes in level of commitment to teaching; (2) changes in level of job morale; (3) changes associated with the physical processes of aging; and (4) changes in levels of tolerance. Changes were noted in the perceptions of students, parents, colleagues, school community, and administrators. Results indicated that teacher attitudes and outlooks change in fairly predicatable sequences that are in turn related to changes associated with the processes of adult development. A copy of the questionnaire used in the study is appended. (JD)

An Analysis, and Cataloging of Multicultural Teacher Education Curricula in Colleges and Universities Approved by the American Association of Colleges for Teacher Education.

Pub Date-79
Note-38p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-College Curriculum, Cultural Pluralism, *Multicultural Education, *Program Development, *Program Evaluation, Teacher Education, *Teacher Education Curriculum, Teacher Programs, *Trend Analysis

The status of multicultural teacher education curricula in selected colleges and universities is surveyed and appraised in this study. The study was designed to (1) identify the number and kinds of multicultural curricular experiences and programs; (2) reveal the variety of these programs; (3) ascertain the quality of the programs; (4) determine the rationale, purposes, principles, and concepts contained in the programs; and (5) identify current policies and practices in developing, organizing, and implementing multicultural experiences. Information was obtained from a study of previous research findings, personal interviews with students, and data secured from a letter of inquiry to deans of colleges of education. Findings are stated under theoretical headings that note significant aspects of multicultural education. Trends revealed by the study are analyzed. (JD)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Class Management, Class Organization, *Classroom Observation Techniques, Feedback, *Peer Evaluation, Student Attitudes, Student Teacher Relationship, *Teacher Attitudes, *Teacher Behavior, *Teacher Improvement, Teaching Methods

The value of constructive classroom observation in improving teachers' behavior and classroom management is pointed out, and a method of providing this observation is suggested. It is recommended that teachers working as a group observe each other's classrooms. Teachers who differ in experience and expertise can, by this means, make contributions and assistance by providing feedback to each other. The following principles are offered for use in observation: feedback should (1) involve specific, concrete behaviors or characteristics; (2) be credible and presented with good intentions and in understandable terms; (3) include specific guidelines for change; and (4) lead to a commitment to initiate specific changes. Descriptors-*Academic Achievement, Basic Skills, Behavior Patterns, *Class Management, Class Organization, *Educational Research, *Effective Teaching, Elementary Secondary Education, Group Instruction, *Teacher Behavior, *Teaching Methods

Following a review of research findings on the relationship between teacher behavior and student achievement, current activities in teacher effectiveness research are discussed. Two major trends emerge in recent research studies. Existing correlational findings on the topic are being integrated and applied to contexts beyond basic skills instruction in the elementary grades. Clusters of correlational findings are being assessed for degree of implementation by teachers in their daily instructional methods. Recent findings indicate that direct instruction in small groups coupled with formal classroom organization and management are as effective in producing satisfactory learning results at the secondary level as they are in teaching basic skills at the elementary level. Perspective on Intelligence Testing.

Pub Date-30 Mar 78
Note-9p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (Toronto, Ontario, Canada, March, 1978)
Journal Cit-NCME Measurement in Education; v9 n2 Spr 1978
Pub Type- Speeches/Meeting Papers (150) - Journal Articles (080) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Culture Free Tests, Elementary Secondary Education, Intelligence Factors, *Intelligence Tests, Labeling (of Persons), *Opinions, Teacher Attitudes, *Test Bias, *Testing Problems, *Test Interpretation, Test Reliability

We should seek an updated perspective on intelligence testing because it is useful to reevaluate any practice that has long become institutionalized, especially one that is subject to severe criticism. Cultural bias is the most prominent criticism. Testing proponents contend that intelligence tests reflect skills and knowledge emphasized in school (although these may be culturally influenced), and that test makers are using sophisticated techniques to detect biased items. Some object to intelligence tests because they measure a narrow range of abilities; few test makers can identify other abilities which would increase predictive ability as efficiently. Test makers contend that teachers can and should develop and review expectations of individual pupil progress, based on intelligence test results; furthermore, the vast majority of teachers and adults feel that the tests do not measure inborn intelligence alone. Some critics discount results because they fluctuate over time; but a study with 2,000 students retested on the Otis-Lennon Mental Ability Test, after three and six years, challenged this view. Human concerns center around labeling and quantification of individuals' ability. In conclusion, the original need to group students still prevails; intelligence tests have improved; and their discontinuation would harm both disadvantaged and mainstream groups. (CP)

A Follow-up Study of Rhode Island Title I Participants.

Pub Date-May 77

Note-11p.; Paper presented at the Annual Meeting of the New England Educational Research Organization (Manchester, New Hampshire, May, 1977)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Achievement Gains, *Compensatory Education Programs, Elementary Education, *Followup Studies, *Program Evaluation, *Reading Achievement, *Remedial Reading Programs

Identifiers-*Elementary Secondary Education Act Title I, Rhode Island

Highlights of a followup study involving 1,179 remedial reading students in Rhode Island, grades 2 and 4, were examined. Since the study focused on determining the effect of Title I programs beyond one school year, the sample included students who did and did not continue to receive Title I services. It was not possible to determine whether each student had received these services prior to the study. Findings were based on the assumption that without Title I intervention, standard scores on the California Achievement Tests would remain at the same percentile from one testing period to the next. After the first year, students who left the program scored significantly higher than their counterparts; both groups exceeded scores expected without Title I intervention, using pretest scores as a basis of comparison. After the second year, using first year posttest scores for comparison, students were either at or below the level expected without treatment. Use of the original pretest score as the comparison criterion may be the most reasonable approach, since it is unlikely that disadvantaged students can maintain rapid rate of achievement gained during intensive remedial instruction. (CP)

Goal-Free Formative Evaluation An Example.
Pub Date-Mar 78
Note-15p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978); Best copy available
Pub Type- Speeches/Meeting Papers (150) - Reports - Evaluative (142)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Check Lists, *Evaluation Criteria, *Evaluation Methods, Evaluators, *Formative Evaluation, Negative Attitudes, Program Evaluation, *Publications, Summative Evaluation, *Textbook Evaluation
Identifiers-*Goal Free Evaluation

A formative goal-free evaluation was conducted to assess products (documents) developed after the first year of a federally funded project. Fifteen packets of sixty-six documents were rated by an external panel of five judges, using a checklist developed for the evaluation. An intermediary between the panel and the goal-free evaluator interviewed key project staff to clarify questions about the documents and to obtain perceptions of the goal-free process. The bulk of the written evaluation report was a summary of judges' comments and ratings for each packet. Several problems surfaced: project staff seemed anxious and mistrusting about the goal-free method, and there was a major discrepancy between proposed project goals and the external evaluator's perception of the project. In summary, goal-free evaluation seems most appropriate when product development is a major task. Personal observation during evaluation seriously jeopardizes the disclosure of goals. The approach is best used as an adjunct to other evaluation methods, although it needs refining. (The checklist is appended). (CP)

Asymmetric Finger Temperature Response to Test Anxiety Imagery.
Pub Date- Mar 78
Note-16p.; Paper presented at the Annual Meeting of the Southeastern Psychological Association (24th, Atlanta, Georgia, March 15-18, 1978)
Available from-Department of Psychology, University of Michigan, Ann Arbor, Michigan 48109
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Anxiety, Females, Higher Education, *Individual Characteristics, *Lateral Dominance, *Response Style (Tests), *Stress Variables, *Temperature, Visualization
Identifiers-Bilateral Differences, Hemispheric Lateralization, *Test Anxiety

Finger temperature was recorded bilaterally from 29 right handed test anxious females while they listened to a tape describing test taking situations. Subjects also completed the A-State and A-Trait anxiety inventories, the Test Anxiety Inventory, the Irrational Beliefs Test, and the Differential Personality Questionnaire. A significant temperature decrease in response to the test anxiety tape was observed on the left but not the right hand. A difference score reflecting greater decrease in left than right hand temperature was significantly correlated with five trait variables, indicating a relatively greater left hand decrease in subjects with higher trait anxiety, more irrational beliefs, a poorer feeling of well being, being more reactive to stress and less assertive in social situation. These results support a greater role of the right hemisphere in autonomic response to stressful situations. (Author/RD)

Q. How Many Options Should a Multiple-Choice Question Have? (a) 2. (b) 3. (c) 4. At-a-glance Research Report.
New South Wales Dept. of Education, Sydney (Australia).
Pub Date- 78
Note-11p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Answer Sheets, Complexity Level, Foreign Countries, Higher Education, *Multiple Choice Tests, Reaction Time, Response Mode, *Test Construction, *Test Items, *Test Reliability
Identifiers-Australia, *Distractors (Tests), *Test Length

The reliability of multiple choice tests containing different numbers of response options was investigated for 260 students enrolled in technical college economics courses. Four test forms, constructed from previously used four-option items, were administered, consisting of (1) 60 two-option items two distractors randomly discarded; (2) 40 three-option items one distractor randomly discarded; (3) 40 three-option items the least appropriate distractor discarded; and (4) 30 of the original four-option items. Data from students who didn't complete the test or who omitted many items were disregarded. Results indicated that three-option items were as reliable as four-option items (reliabilities were .6 to .7 and .7, respectively); that higher scores were obtained on tests with fewer options per item; and that tests consisting of four-option item required more time for both test construction and administration. A comparison of tests (2) and (3), both containing three-option items, indicated that test (2) was more reliable, less difficult, and took longer to complete. (GDC)

Descriptors-*Cloze Procedure, Context Clues, Elementary Education, *Reading Ability, Reading Comprehension, Response Style (Tests), Semantics, Student Testing, *Test Construction, Test Items, *Verbal Tests, *Vocabulary
Identifiers-*Item Format (Tests), Metropolitan Achievement Tests, *Synonyms

Three paradigms for assessing children's vocabulary knowledge were evaluated in this study: synonym, synonym in context, and cloze. The vocabulary tests, a paper-and-pencil adaptation of the on-line tests used in two previous studies, were administered to 830 second through seventh grade students. Subjects performed similarly on the three formats across the six grades tested. No one test format was better than either of the others within or across grades. But there were significant mean differences in scores obtained under the three formats overall. These differences ranked synonym, synonym in context, and cloze in order of difficulty from easiest to most difficult. When subjects were stratified by reading comprehension ability, scores on any one format were not significantly higher overall, than scores on either of the other two formats. Some differences did appear for the stratified groups. Low comprehenders scored higher on synonym than on synonym in context, and intermediate comprehenders scored somewhat higher on cloze than on synonym in context. It is possible that further differences in vocabulary performance might appear if children are grouped into finer categories of comprehension level. (Author/RD)

Descriptors-Academic Ability, *Cognitive Processes, Cognitive Tests, *Diagnostic Tests, *Intelligence, *Intelligence Tests, *Memory, *Screening Tests, Student Placement, Verbal Learning

Identifiers-*Short Term Memory

Currently, the reliance on intelligence tests as the primary criterion for the placement of children in school programs has been challenged. Much of the controversy focuses on the insensitivity of these instruments to individual cognitive styles for different subgroups of children. While the issue of whether intelligence tests measure skill deficits or content deficiencies has not yet been resolved, it is clear that these instruments fail to delineate the specific mental processes involved in verbal and nonverbal performance. It is argued that a diagnostic procedure which attempts to determine how efficiently a child processes different kinds of information could provide a more meaningful assessment of the child's capabilities for learning new verbal material. This assessment would minimize cultural and racial bias, because it emphasizes a person's information-processing strategies without regard to norm-referenced criteria. This paper reviews the role of short-term memory (STM) in academic achievement and performance, and describes a sense of alternative diagnostic procedures which evaluate the child's capacity for acquiring and storing different types of verbal information in STM. Three areas are reviewed: (1) STM capacity; (2) decay and interference effects in STM; and (3) retrieval from STM. (Author/RD)

Descriptors-Classroom Research, *Course Objectives, Educational Objectives, Higher Education, *Incidental Learning, *Intentional Learning, *Learning, *Learning Experience, Post Testing, Pretesting, Reading Materials, Recall (Psychological)

In two identical experiments, undergraduate students were randomly assigned to study course-appropriate prose learning materials under one of four experimental conditions (two levels of experience with objectives by two levels of possession of objectives). Achievement on objectives-relevant test items was significantly higher for possessors regardless of experience. No significant difference due to experience was found for incidental learning scores. This lack of support for previously-reported findings showing decreased incidental learning for experienced possessors of objectives is attributed to differences in the relevance of the learning materials and the nature of the task conditions. Descriptors-Black Dialects, Black Students, Caucasian Students, Culture Free Tests, *Disadvantaged Youth, *Intelligence Tests, *Middle Class Culture, Primary Education, *Racial Differences, *Response Style (Tests), Verbal Ability, *Vocabulary Development

Identifiers-*Peabody Picture Vocabulary Test

Ninety children were administered the Peabody Picture Vocabulary Test (PPVT) with the standardized administration, as well as an elicited word response task of the PPVT Stimulus Plates. The subjects were inner city black (BIC), inner city white (WIC), and middle class white (WMC) children. The data were analyzed to determine consistency of item errors in standard administration, consistency of naming, and correlations between item errors and naming response. Intra-, inter-, and total group analyses were run. Up through the age of six, the three groups were the same; differentiation emerged after that age, with BIC achieving lowest scores on the PPVT, and WMC achieving highest scores. No significant consistency in item errors was found, though a trend towards difference was seen in the BIC population. No significant difference among groups was found in naming, or in correlation between item error and naming response. The BIC population as well as WMC and WIC had appropriate words and/or concepts for the plates which had been missed on standard PPVT administration, suggesting a lexical/experiential as opposed to a semantic/phonemic difference. The history and use of intelligence testing are reviewed, with emphasis on the validity of intelligence tests for black populations. Different definitions of intelligence are summarized, followed by an historical review of intelligence testing. The work of Alfred Binet is discussed, as well as the validity and reliability of his scales. A discussion of the philosophy of Sir Francis Galton, which was continued by the early eugenics movement in America, is followed by remarks about contemporary research by Jensen, Herrnstein, and Shockley. Terman's revisions of Binet's scales, the Wechsler Adult Intelligence Scale, and group tests such as the Army Alpha and Beta Scales, are described. Three models of socialization and black culture in America are presented: (1) deficit model which suggests that black children are raised in a disadvantaged environment and are lacking in the skills and abilities considered to be indicators of success for the white middle class; (2) difference model which recognizes racial and cultural differences, especially with respect to language; and (3) bicultural model which argues that Afro-Americans are exposed to two different cultures. Problems associated with each of these models are outlined. A 17-page bibliography is appended. (GDC)

Descriptors-*Abstract Reasoning, Age Differences, *Conservation (Concept), Higher Education, *Intelligence Tests, *Logical Thinking, Sex Differences, Standardized Tests, Test Construction

Identifiers-*Piagetian Tests

University students were administered three Piagetian tasks and a spatial relations test, the Revised Minnesota Paper Form Board. Students' American College Test (ACT) mathematics scores were also recorded. A measure of conservation of weight, administered individually, was the first Piagetian task. Two paper and pencil tests of progressively higher Piagetian functioning, the Concrete-Operational Reasoning Test and the Logical Reasoning Test were also administered. A path analysis was performed on the five measured variables, using a set of recursive models and with the following ordering: (1) Conservation of weight; (2) Concrete- Operational Reasoning Test; (3) Logical Reasoning Test; (4) Spatial relations; and (5) ACT mathematics. Two paths were dropped as being too small to be of explanatory value: the path from conservation of weight to ACT mathematics, and the path from conservation of weight to Concrete - Operational Reasoning Test. The data was also analyzed in a two way analysis of variance by age and sex on all variables but the ACT mathematics. Males scored significantly higher on the Logical Reasoning Test. Although non-significant, the females scored somewhat higher on spatial relations than did the males; this outcome is in direct opposition to most published findings. (Author/RD)

Descriptors-Classroom Games, *Educational Games, *Evaluation, Graduate Students, *Individual Characteristics, *Individual Differences, *Simulation, *Student Reaction

Identifiers-*Myers Briggs Type Indicator

Seven simulation games were played and evaluated by twenty-six graduate students as part of a course in simulation/gaming. Each student also completed the Myers-Briggs Type Indicator, a personality type inventory which assigns each person to one of 16 types based on their placement on each of four dichotomous dimensions. The students' evaluation of the games was then related to their personality type. Differences in game evaluation were found to be related to only the Thinking-Feeling dimension. Thinking types preferred to make decisions based on data and logic while Feeling types tended to trust their emotions. In general, Feeling types rated their personal reactions to the games more positively than did the Thinking types, with the differences significant on three games and in the same direction on the remaining four. In addition, a high percentage of Feeling types indicated they would like to play all games again. There were no consistent differences in the two groups' perceptions of the group functioning in the games or in whether the students would use the game in a class they might teach. (The results were discussed in terms of the distribution of Thinking-Feeling types in certain professions. Evaluation questions are appended). (Author/RD)

Descriptors-*Context Clues, Educational Research, Ethnography, Experiments, Models, Psychological Studies, *Research Design, *Research Methodology, Research Problems, *Scientific Methodology, *Social Science Research

The scientific method is described as intending to be the guarantor of objectivity, neutrality, and diligent application of its rigorous procedures and to produce a body of cumulative knowledge that is systematic and general. The central argument of this essay addresses the discovery that research findings appear to be context-dependent; methods of the traditional model of science are inappropriate to the study of context-dependent phenomena. Models that may provide a better fit between research methods and phenomena of interest, namely the context-dependence of human meaning and action, are described as available and deserving of attention. A number of these alternative approaches and methods that may be more appropriate are described. These methods are drawn from ecological psychology, phenomenological research, sociolinguistics, and ethnomethodology. It is concluded that these methods vary among themselves, and each has its own problems, but they do provide a range of possibilities for rethinking ways of conducting scientific research. Identifiers-*Project Follow Through

The Abt Associates' final report on the Follow-Through Planned Variation Experiment is defended against the critique published by a blue ribbon panel funded by the Ford Foundation. In contrast to the conclusions drawn by House, Glass, McLean, and Walker that Follow Through showed no ``winners'' or ``losers'', the National Evaluation significance data show clearly that direct instruction outperformed other approaches on nearly all measures. Furthermore, a simple examination of normative data for the direct instruction model in comparison to eight other major models, shows that the children in the direct instruction model are at or near national norms on all Metropolitan Achievement Test (MAT) measures at the end of third grade. The conclusions drawn from these analyses are also supported by a reanalysis by Bereiter and Kurland. (Author/MH)

Identifiers-*Ordering Theory, Otis Lennon Mental Ability Test

This study investigated the feasibility of using the ordering theoretic procedure with multiple choice items, and its usefulness as an interpretive aid for intelligence test data. Data from two components of a group-administered multiple choice intelligence test (Otis-Lennon Mental Ability Tests) were analyzed using ordering theory procedure for locating prerequisite relations among items. The results supported the applicability of the procedure to multiple choice items. Specifically, the method produced results for the verbal omnibus subtest which were replicated in large part with a second, quite different, sample. The Figural Series Completion subtest was analyzed for only one sample. In both subtests, the shapes of the hierarchies reflected the relative homogeneity or heterogeneity of the two scales and the relationships appeared to be logically valid. However, particularly in the case of the verbal subtest, results were highly item specific and of limited generalizability unless used in conjunction with theories of cognition. Nevertheless, the ordering theoretic analysis produced information and insights which would not have emerged with more conventional analyses. (Author/RD)

Descriptors-Educational Assessment, Elementary Secondary Education, Evaluation Criteria, *Evaluation Methods, Handicapped Children, Models, Objectives, Personality Tests, Preschool Education, *Program Evaluation, Research Methodology, *School Social Workers, Self Concept Tests, *Social Work

A model for evaluating effectiveness in preschool and school social work programs is proposed. The paradigm has two major dimensions: criteria for evaluating success, and modalities for assessing whether the criteria have been met. Three criteria are suggested including improved views of significant others, and seven modalities including test scores, observational data, and self-reports. The conditions under which each criterion and modality is optimal are discussed and examples offered of instruments which can be used for each modality. The difference between effort and effectiveness evaluation is highlighted along with the procedures which can be followed in conducting each type of evaluation. Among the other issues explored are the use of the interrupted time series design, unanticipated consequences, the need for both short-term and long-term objectives, and the advantages of contrast groups over control groups. Suggestions are offered to individual social workers for modifying this model to assess the effectiveness of their own practice. Appendices include criteria for judging program effectiveness, tests of parent attitudes, the manual for the Toy Sorting Task, a bibliography of self concept tests, and tests involving locus of control, interpersonal perception, and teacher behavior. Descriptors-*Behavior Rating Scales, *Classroom Environment, Elementary Education, Learning, *Student Behavior, *Test Construction, Test Items, Test Reliability, *Test Validity
Identifiers-*Classroom Behavior Rating Scale

The Classroom Behavior Rating Scale (CBRS) was developed to provide school psychologists and educators with a measure of learning-related classroom behaviors of elementary school students. The initial item pool consisted of 100 behavioral statements reflecting learning-related behaviors such as attention and persistence. These behaviors were delineated within various educational environments (e.g. large group instruction, seat work, etc.). On the basis of teacher evaluations with respect to each item's clarity, relevance to classroom learning, and ability to be accurately rated, a 72-item scale was developed. After field testing and item analysis, a 40-item scale remained with an internal consistency reliability of .98. The 40-item CBRS was then given to 158 students, with similar reliability estimates. The CBRS also demonstrated substantial validity as shown by correlations with academic achievement tests, intelligence quotient scores, and classroom behavior problems. (Author/RD)

Descriptors-*Analysis of Covariance, Educational Research, *Research Design, Sampling, Statistical Analysis

Identifiers-*Aptitude Treatment Interaction

Analysis of covariance is examined for its usefulness in attribute-by-treatment interaction (ATI) research, where subjects are randomly assigned to treatments but not to levels of the attribute factor. Contrary to what might be expected, the use of a covariate does not confound the interpretation of the interaction between attribute and treatment, because the expected value of the interaction effect is independent of the particular covariate chosen. Independence occurs regardless of whether the attribute variable is discrete or continuous, and regardless of whether the covariate is measured with perfect or less than perfect reliability. The primary implication of these results is that analysis of covariance provides a much needed means for researchers to achieve powerful designs in assessing attribute-by-treatment interactions. Descriptors-Hypothesis Testing, Mathematical Models, *Nonparametric Statistics, Research Design, Simulation, *Statistical Analysis, *Tests of Significance
Identifiers-*Omnibus Tests, *Repeated Measures Designs

When examining a repeated measures design with independent groups for a significant group by trial interaction, classical analysis of variance or multivariate procedures can be used if the assumptions underlying the tests are met. Neither procedure may be justified for designs with small sample sizes and dichotomous dependent variables. An omnibus nonparametric test statistic for interactions in such designs, based on the alignment procedures of Hodges and Lehmann, is presented and examined. The results indicate that this statistic should be preferred to the F test when sample sizes are small and the probabilities are near 0.0 or 0.1. (Author/GDC)

Identifiers-Sweden

Ninety Swedish teenagers and adults with varying levels of formal education were interviewed about their own learning experiences and techniques. Subjects were then asked what they actually meant by learning. The concept was variously defined as: (1) an increase in knowledge (merely a synonym for the word learning); (2) memorizing; (3) an acquisition of facts or principles, which can be retained and used in practice; (4) an abstraction of meaning; and (5) an interpretive process aimed at understanding reality. The variation in subjective conceptions of learning resembles the distinction made in research between surface-level and deep-level processing. As surface-level processes, concepts 2 and 3 depict knowledge as external and ready-made and learning as passive. Concepts 4 and 5, as deep-level processes, depict knowledge as raw material it is the task of the learner to actively select and condense ideas. Self-reported conceptions of learning can be characterized on a shallow/deep continuum, but this relationship is symbolic, not causal. Thus, one's learning conception explains the level of processing chosen, but this level is not applied in every learning situation. (CP)

Identifiers-Sweden

Interview data on the learning experiences and techniques of 90 Swedish teenagers and adults were further analyzed to explore changes in views on learning reported by the subjects themselves, and differences between subjects with respect to age (range 15-73) and formal education (range 6-17 years). Some subjects equated knowledge with discrete units of information, and learning with transfer of facts into the head. Others introduced various distinctions as they described their conceptions of learning, as well as their methods of study; the phenomenon of learning became an object of reflection (thematized). This group could distinguish between learning for life versus learning in school, and between rote learning versus understanding; furthermore, they were also aware of the influence of the context of learning. Since this was not a longitudinal study, it was difficult to draw conclusions about developmental changes. It was hypothesized that extensive experience leads to thematization, and that thematization improves learning performance. (CP)

Identifiers-Sweden

Structural reading difficulty of argumentative prose (text with an underlying message or superordinate principle), is related to the reader's approach to reading and learning. Ninety Swedish teenagers and adults with varying levels of formal education, were divided into three groups, based on their own descriptions of reading and learning: deep approach, surface approach, or neither. Subjects read a 3,700-word argumentative passage and were given a 28-item retention test. Although the deep group performed significantly better than the surface group, the latter performed considerably higher on factual questions alone, as opposed to conceptually more difficult questions. Another experiment focused on readers' ability to realize that an excerpt was only an example, introduced in the text to illustrate qualitative differences in the outcome of learning. The surface group did not know why the example was included; that is, they saw the principle and example as two different topics with solely a serial relation. The reading difficulty examined in both experiments was not a function of content (words used, sentence length, etc.), but was not totally unrelated to content. In conclusion, reading difficulty should be viewed in relation to structure, content, and the reader's description of his/her approach to learning. (CP)

Descriptors-Abstraction Levels, Adults, *Cognitive Style, *Complexity Level, Conceptual Schemes, Foreign Countries, *Learning, *Learning Characteristics, Learning Experience, *Learning Processes, Learning Theories, *Perception, Postsecondary Education, Secondary Education, Student Opinion
Identifiers-Sweden

After reading a passage from a text which explained the deep and surface approaches to learning, ninety Swedish teenagers and adults with varying levels of formal education were asked to discuss their own learning in terms of this distinction. Surprisingly, sixty-one subjects considered both approaches applicable to their own learning. After further questioning, only thirty-three were able to demonstrate that they understood the meaning of both terms. These subjects perceived their approach to learning as being situation-dependent. They were likely to use the deep approach if they were interested in the learning material itself. Surface approaches were typical when studying for tests, participating in an experiment, or in school. The finding that people perceive their strategy to vary over situations is difficult to reconcile with the traditional starting point for research on learning approaches; namely, that learning approaches can be understood in terms of individual psychological characteristics. Descriptors-Achievement Tests, Adults, Aptitude Tests, Attitude Tests, Bilingual Education, *Bilingual Students, Diagnostic Tests, Elementary Secondary Education, *English, *Languages, *Language Tests, Personality Tests, Postsecondary Education, Reading Tests, *Spanish, Speech Skills, Student Testing, Tests

This catalog describes 342 tests appropriate for identifying the needs of bilingual students, for diagnosing their ability, and for assessing programs. The tests are appropriate for ages kindergarten through adult, and are written in the following languages: English, Spanish, Arabic, Cambodian, Cantonese, Chinese, Cherokee, Chamorro, Crow, Choctaw, Cheyenne, Dutch, French, German, Hebrew, Ilocano, Italian, Japanese, Korean, Mandarin, Mohawk, Navaho, Nukuran, Native Alaskan, Portugese, Pilipino, Polish, Ponapean, Pueblo, Russian, Tagalog, Ulithian, Vietnamese, Yapese, Woleina, Yiddish, and Yupik. The majority are written in English or Spanish or in both languages. The tests cover the following catagories: (1) language proficiency; (2) language dominance; (3) self concept and personality; (4) sociocultural and attitudes; (5) reading and reading readiness; (6) academic achievement; (7) aptitude and interests; and (8) miscellaneous including school readiness, psychomotor performance, learning problems, and individual development. Descriptions of each test provide, whenever possible: test name; developer (commercial vs. local publisher); source of availability; copyright date; language; purpose and content; age level; administration; written vs. oral response; scoring; types of available scores; cost, and a sample item. The Evaluator as Artist: A Discussion of Premises and Problems with Examples from Two Aesthetically Based Evaluations.

Pub Date-Apr 79
Note-31p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979); Best copy available
Pub Type- Speeches/Meeting Papers (150) - Reports - Evaluative (142)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Administrator Attitudes, Aesthetic Education, Artists, *Curriculum Evaluation, Elementary Education, *Evaluation Methods, *Evaluators, *Humanistic Education, *Literary Criticism, Metaphors, Models, Observation, Program Evaluation, Teacher Response
Identifiers-*Artistic Evaluation

Artistic evaluation is a subjective process which focuses on the aesthetic qualities of an educational experience, rather than the more traditionally focus on the measurement of the outcomes of preestablished goals. It uses literary symbols, such as metaphor, voice, plot, and theme, to describe classroom settings, and to portray the personal qualities of, and interactions between teachers and students. These symbols were illustrated during the evaluation of an activities-oriented curriculum (City Building Program) by two professional evaluators. Seven teachers and administrators associated with the elementary classrooms which had implemented the curriculum discussed the evaluators' findings. Their opinions, ranging from enthusiasm to skepticism, focused on these concerns, some of which were unique to artistic evaluation: observation time; personal description; metaphor; plot; distance; release of results; and theoretician-practitioner gap. In conclusion, there is a need for feedback and interaction between evaluator and clients during the project, and before the release of findings. (CP)

Non-Linear Transformation of the Criterion.

Pub Date-Apr 79
Note-10p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Data Analysis, Geometric Concepts, *Multiple Regression Analysis, Predictor Variables, *Transformations (Mathematics)

The utility of a non-linear transformation of the criterion is established. The Pythagorean Theorem is used as the example to demonstrate the point. The functional relationships may be such (as in the Pythagorean Theorem) that an R-squared of 1.00 cannot be found without making a non-linear transformation of the criterion. The goal of predictability (R-squared 1.00) thus may not be reached without making a non-linear transformation of the criterion. (Author/JKS)

Descriptors-Adult Students, Age Differences, College Faculty, College Majors, *Course Evaluation, Credit Courses, *Evaluation Criteria, Graduate Students, Higher Education, Institutional Research, *Off Campus Facilities, Sex Differences, *Student Characteristics, *Student Reaction, Undergraduate Students, *University Extension

A comparative study of on-campus and off-campus credit courses at Northern Illinois University during 1975, based on the perceptions of selected faculty members who taught the same course on- and off-campus and students enrolled in the courses, is described. The study attempted to determine if differences in perception were related to age, university status, academic discipline, or sex of students. Results showed that: (1) on campus courses were perceived by students as being of higher quality than off campus courses; (2) students over 51 years old felt their needs had been met more successfully than did all other student age groups; (3) the College of Professional Studies met perceived needs better than any other college; (4) male students perceived on- and off-campus courses as lower in quality than did female students; and (5) those students pursuing an academic or vocational goal were less satisfied with on- and off-campus courses than students whose main goal in attending college was social. Two appendices are included: one listing evaluation instruments used in the extension programs of sixteen representative college and universities and an annotated bibliography of fifty-five Educational Resources Information Center (ERIC) citations from 1966 through 1974. Ethnomethodological Approaches to Research and Evaluation in the Professions.

Pub Date-Apr 79
Note-20p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Educational Research, *Ethnography, *Evaluation Methods, *Field Experience Programs, Field Studies, Job Skills, *Observation, *Police, Postsecondary Education, Program Evaluation, *Research Methodology
Identifiers-*Ethnomethodological Research

Ethnomethodological research involves participation in the field, with some degree of social interaction, with the subjects of the study; direct observation of relevant events; some formal and a great deal of informal interviewing; systematic counting; collection of documents and artifacts; and flexibility in the direction the study takes. This paper begins with criteria for the reliability, validity, and quantification of ethnomethodological research in professional education. The field training of rookie police was observed and analyzed by means of ethnomethodological research. After 16 months of observing field training instructors, it was reported that a particular body of knowledge was shared and expressed in the work of all competent members of the profession. This knowledge, composed of attitudes and skills, was demonstrated by the officers who acted as teachers and models to the probationary officers assigned to them during field training. These attitudes and skills were communicated both verbally and nonverbally. Field training officers evaluated the rookies by means of a checklist of practical job skills. (Author/BH)

Identifiers-Levels of Use Interview, *Levels of Use of the Innovation, Teaching Reading in Content Areas

High school teachers of reading, mathematics, social science, and science participated in a faculty development program, Teaching Reading in Content Areas (TRICA). A focused interview system, Levels of Use of Innovation (LOU) measured the extent to which teachers used TRICA in their classrooms. There are eight levels of use: non-use, orientation, preparation, mechanical, routine, refinement, integration, and renewal. Each level is operationally defined by seven categories: knowledge, acquiring information, sharing, assessing, planning, status reporting, and performing. Interview data collected from 27 teachers indicated that 25 were using TRICA, mostly at the mechanical level. Teachers were most confident using the TRICA strategies labeled structured overview, vocabulary development, and grouping. Teachers focused on events related to the immediate use of TRICA, rather than on long-term effects, and were more concerned about facilitating instructional methodology than with meeting individual student needs. Results favored the use of TRICA and were consistent with previous research. (CP)

Descriptors-*Decision Making Skills, *Educational Assessment, *Equated Scores, *Graduate Medical Students, Inductive Methods, Item Sampling, Medical Research, *Multiple Choice Tests, Physical Examinations, Physician Patient Relationship, Test Construction, *Videotape Recordings
Identifiers-*Rasch Model

In an examination designed by a medical specialty board, six tests were administered to groups of candidates for certification to investigate the feasibility of using videotapes of doctor-patient interactions to assess candidates' ability to note signs of potential physical disorders during a patient's physical examination and history taking, and their ability to draw reasonable conclusions and make appropriate decisions based on the available evidence. Common-item links, derived from the questions associated with selected interactions, were used to collect the data needed to equate the tests, and the Rasch model was the basis for scoring the tests and analyzing the equating data. Two indices were derived to help identify triads and links that lacked coherence. Investigation of the distributions of these indices is suggested so that firm guidelines for identifying triads and links that lack coherence can be established. Studies also should explore the relationship between coherent and incoherent triads and links, with the aim of clarifying the relationship and explaining the apparent contradiction detected in these data in which apparently coherent triads contained one or more seemingly incoherent links. (Author/MH)

Descriptors-Access to Education, Achievement Tests, Admission Criteria, *Black Students, College Admission, *College Entrance Examinations, *Competitive Selection, *Educational Discrimination, Educational Policy, *Enrollment Trends, Higher Education, Low Income Groups, Racial Differences, Senior High Schools, Socioeconomic Influences, *Test Bias, Test Validity

Student distribution among institutions of higher education corresponds more to the socioeconomic status of institutions than to the test-predicted performance levels. Aggregate data shows that the more costly institutions recruit wealthier students with higher test scores. Traditionally black institutions rely far less on test results, preferring to depend overwhelmingly on grades. Non-black institutions tend to judge and counsel black students, as much or more than other students, on the basis of test results. The setting of admission standards in higher education is treated as the private right of institutions, and the exercise of that right essentially corresponds to the characteristics, particularly the socioeconomic status, of the institutions. Descriptors-*Discriminant Analysis, Evaluation Methods, Group Membership, *Groups, Higher Education, Prediction, *Predictor Variables, Research Design, Sampling

Methods for ordering and selecting variables for discriminant analysis in multiple group comparison or group prediction studies include: univariate Fs, stepwise analysis, learning discriminant function (LDF) variable correlations, communalities, LDF standardized coefficients, and weighted standardized coefficients. Five indices based on distance, association, and classification accuracy, evaluate the sense of discriminatory power in which a subset of a given size determined by one method, would be better than a subset of the same size determined by another method. To illustrate the use of the methods and indexes, thirteen variables for assigning 153 college freshmen to one of three French courses were rank ordered according to all six methods. The five indexes were computed for subsets of each of ten sizes determined by each method. The relative effectiveness of the variable selection methods for yielding good subsets depended on the index used. The methods agreed closely for the distance and association indexes for all subset sizes (concordance coefficient .91); but they were inconsistent for the classification index (concordance coefficient .17). The combination of variable selection method and purpose of discriminant analysis research, and the relationship between selection method and structure of data need further study. (CP)

Document Not Available from EDRS.

Descriptors-Achievement Tests, *Criterion Referenced Tests, *Cutting Scores, Educational Problems, *Mastery Tests, Multiple Choice Tests, Program Evaluation, Student Evaluation, Test Construction, Testing Problems, *Test Items

Identifiers-Sample Size, *Test Length

Two aspects of criterion referenced testing are discussed: cutting

scores and test length. Several practices in determining passing scores are enumerated: (1) setting passing scores so that a predetermined percent of students pass; (2) inspecting each test item to determine how important it is that it be answered correctly; (3) determining the educational consequences of setting the cutting score too high or too low; (4) examining the psychological and financial costs of a high or low passing score; and (5) adjusting the score to allow for measurement error. Test length is based on determining the size of a sample of problems needed to acquire an estimate having a specified level of accuracy. Approaches to determining test length are classical test theory, the binomial model, and sequential models. Two functions of testing programs are to assess the competency of a student in regard to specified instructional objectives and to evaluate program effectiveness. Procedures and tables are given to help determine how many test items are needed to assess individual achievement and how many students should be tested for program evaluation. (MH)

Descriptors-Academic Achievement, *Behavioral Objectives, Comparative Analysis, *Criterion Referenced Tests, Educational Objectives, Educational Testing, *Measurement Goals, Scoring, *Test Construction, *Testing Problems, Test Items, Time Factors (Learning)
Identifiers-*Domain Referenced Testing, Test Specifications

Problems in constructing criterion referenced tests related to inadequate technical criteria, and guidelines for their solution are discussed. The need to select a well-defined domain of behaviors is emphasized as the key to test construction and to understanding students' test performance. Considerations must also be given to the most effective test magnitude; that is, how much each test should cover and how many tests should be created to measure achievement in each domain. The dichotomy between the purpose of criterion referenced testing and the use of comparative data to assess student performance must also be resolved. Four guidelines to help overcome some of these limitations are: (1) the magnitude of behavior assessed should be as broad as possible without sacrificing the test's descriptive clarity; (2) test specifications should be detailed and unambiguous if there are relatively few but important behaviors being measured, even if this results in a large set of specifications; (3) estimates of required instructional time should be used to help establish a homogeneous grouping of behaviors to be measured; and (4) stimulus and response attributes of test items should be examined and their essential dimensions specified by very detailed delimiting statements. (MH)

Descriptors-*Age Differences, Black Students, Caucasian Students, Cognitive Ability, Cognitive Processes, Culture Free Tests, Elementary Education, Intelligence, *Intelligence Differences, *Intelligence Factors, Intelligence Tests, *Longitudinal Studies, *Racial Differences, *Test Validity
Identifiers-*Wechsler Intelligence Scale for Children

Longitudinal data on the auditory forward and backward digit span (FDS and BDS) subtests of the Wechsler Intelligence Scale for Children (WISC) were obtained at five age levels (between 6 and 13), in samples of white and black children. Factor analysis and analysis of variance of the data were conducted to test 5 hypotheses, related to Jensen's Level I - Level II theory: (1) FDS and BDS involve different components of cognitive ability; the former reflects rote learning and memory, the latter reflects complex cognitive processes; (2) BDS is more highly loaded on g, the general intelligence factor, than is FDS; (3) whites and blacks show a larger average difference in BDS than in FDS; (4) the difference between FDS and BDS decreases with increasing age (or mental maturity); and (5) whites and blacks of the same WISC mental age perform the same on both subtests. All of these hypotheses were supported, although results were not always consistent at every age level. (Author/CP)

Identifiers-Canada, Content Validity, *Ontario

A survey was conducted of achievement testing practices in the intermediate and senior divisions of French-language Ontario schools. Grades 7-8 and grades 9-10 were discussed separately. Department heads, administrators, and board of education members were interviewed concerning the availability and curricular validity of the French-language standardized achievement tests used in the subject areas of French, mathematics, English as a second language, and others (including the sciences, history, and geography). Twenty-seven commercially available standardized tests, none norm-referenced, were identified for testing mathematics or French as a native language; only two were published in Ontario. No French-language tests were available for other subjects. Although a large number of English as a second-language tests were examined, none were considered worthy of analysis. Analysis with respect to the secondary school curriculum in Ontario indicated that no test covered more than 20% of the curricular objectives. Very few norm-referenced tests were available; objective tests developed by a single teacher were used by 75% of the departments surveyed. The Test d'Acquisitions Scolaires is cited as a model for French-language test development. (GDC)

Descriptors-Higher Education, Item Analysis, *Mathematical Formulas, *Test Reliability
Identifiers-*Kuder Richardson Reliability Formulas

The purpose of this study was to present an empirical correction of the KR21 (Kuder-Richardson test reliability) formula that not only yields a closer approximation to the numerical value of the KR20 without overestimation but also simplifies computation. This correction was accomplished by introducing several correction factors to the numerator of the KR21 to reduce the inflation of the error-variance estimate. The reliability coefficients resulting from this analysis were compared under varying levels of student sample size, number of items in the test, examination mean difficulty, and examination mean discrimination. Test data were taken from a representative sample of 101 university-level classroom achievement tests. The hypothesis of no difference between the mean KR20 and KR21 coefficients was rejected, while the same hypothesis for the empirically adjusted KR21 and the KR20 was retained. The mean underestimate of the KR20 by the KR21 was 16.1 percent, while the corrected formula 21 underestimated by only 4.2 percent. The .8 correction factor was superior to all other factors and to the original KR21, as estimates of the KR20. The representativeness of the sample of tests used in this study suggested that these findings are generalizable. (Author/CP)

Identifiers-*Larry P v Riles

Several major issues were raised against intelligence testing by the plaintiffs in Larry P. versus Wilson Riles. It was argued that since California used intelligence tests to ascertain who should be placed in programs for the educable mentally retarded (EMR), and since blacks performed less well on the tests than whites, it was the tests which caused too many blacks to be assigned to EMR classes. Blacks' poor performance on intelligence tests particularly the Wechsler Intelligence Scale for Children and the Stanford-Binet Intelligence Scale was claimed to be due to test bias. The criteria for test bias included the following: items were drawn from the white middle class culture; whites had much more prior experience playing with toys; the language of black children may not have been compatible with that of the test; the race of the examiner may have motivation and affected performance; and the test's standardization sample was basically white. The final objection to the continued use of intelligence tests was that such tests keep the schools from educating black children. (An overview of the evidence presented by the defense is provided). Identifiers-Domain Referenced Tests

It appears that those who develop tests are not meeting the needs of classroom teachers. The types of tests which have traditionally been used in the classroom are inconsistent with, and in many cases, irrelevant to, the realities of teaching. When tests are designed to be relatively immune to the variations in experience and response that characterize pupils during the instructional experience, teachers tend to not use, trust, or particularly like these tests. Tests should be considered only as one part of the assessment procedure thus encouraging the development of other ways of helping teachers document, in a better calibrated manner, the many observations which they make in the classroom. (Comparisons between practitioners in medicine and teaching in terms of how, why, and with what degree of trust they utilize tests are made throughout the article). (BH)

Descriptors-*Clinical Experience, *Cognitive Style, Cultural Awareness, Educational Problems, *Effective Teaching, Evaluation Methods, Individual Differences, Medical Education, Multiple Choice Tests, *Nursing, *Performance Based Education, Program Evaluation, Student Evaluation, Teaching Techniques, *Test Construction

The first paper presented at this conference on the evaluation and effective teaching of nursing students discusses the theoretical perspective on evaluation that is, steps in writing and validating tests. A worksheet on multiple choice item types, with examples appropriate for nursing education, is included. The second paper discusses the clincial perspective on evaluation and offers a model for relating curriculum objectives to behavioral and communication skills observed in clinical settings. It emphasized that clinical evaluation is a highly value-laden entity requiring careful planning, systematic ongoing evaluation, and a commitment to specific beliefs about performance evaluation. A third paper defines cognitive style mapping and discusses the impact of training nursing educators in this technique. A fourth paper describes replicable teaching strategies which conference participants had successfully used to involve students in their own learning. Implications of cultural diversity for teaching and learning is explored in another paper. Finally, a remedial program which provided counseling and developmental courses in reading, science, and mathematics is described. The program, designed for culturally diverse students, has specified cognitive and affective skills necessary for beginning nursing students. Two textbook readability measures, the Fry Readability Scale and the Cloze Procedure Test, are briefly described. (CP)

This is the third in a series of reports concerning data collection activities on the National Longitudinal Study of the High School Class of 1972. Data collection activities included: (1) mailing a newsletter and address verification or correction postcard, followed by questionnaire packets, including a $3.00 incentive payment, and followup mailings; (2) telephone tracing of sample members whose newsletters were returned as undeliverable; and (3) conducting field interviews of nonrespondents to the mail survey. Data processing of the information included receipt control, pre-machine editing and coding, data reduction, error resolution, and microfilming. Changes in procedures for the fourth follow-up are recommended and the questionnaires and follow-up materials are appended. (MH)

Reading Resource Items for Minimal Competency Testing. A Collection of Reading Items for State and Local Education Agencies to Draw Upon in Custom-Building Their Own Minimal Competency Instruments.

Education Commission of the States, Denver, Colo. National Assessment of Educational Progress.
Spons Agency-National Center for Education Statistics (DHEW), Washington, D.C.
Pub Date-Dec 77
Contract-OEC-0-74-0506
Note-53p.; For mathematics items, see TM 009 393
Pub Type- Tests/Questionnaires (160)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors-Adults, Complexity Level, Content Reading, Critical Reading, Elementary Secondary Education, Factual Reading, *Functional Reading, *Item Banks, *Minimum Competency Testing, *National Norms, Reading Achievement, *Reading Comprehension, Reading Skills, *Reading Tests, Test Construction

A collection of 33 reading items are presented for state and local education agencies to draw upon in designing their own minimal competency tests. These items, developed by the National Assessment of Educational Progress, have been reviewed in terms of their appropriateness for testing competencies required for high school graduation. The items are arranged according to content areas: (1) graphic materials; (2) following written directions; (3) reference materials; (4) gleaning significant facts from passages; (5) main ideas and organization; (6) drawing inferences; and (7) critical reading. Twenty-nine items are presented in a multiple-choice format; four items are open-ended and require hand scoring. The correct response is also given for all items. The age group or groups designated by the reviewers (9-year olds, 13-year olds, 17-year olds, or adults 26-35 years old), and the percentage of students in the nation who responded correctly are indicated for each item. (BH)

Identifiers-*College Outcome Measures Project, Test Batteries

The College Outcome Measures Project (COMP) was organized to design, develop, validate, and disseminate assessment instruments and procedures to measure and evaluate the knowledge and skills that undergraduate students are expected to acquire as a result of general or liberal education programs, as well as those important to effective functioning in adult society. Six interrelated content and process skills were identified: (1) functioning within social institutions; (2) using science and technology; (3) using the arts; (4) communicating; (5) solving problems; and (6) clarifying social values. Major research projects were conducted on the three COMP instruments (the open-ended Measurement Battery, the Objective Test, and the Activity Inventory) with college freshmen, college seniors, postsecondary vocational-technical students, and mature adults. An advisory panel report evaluated the results of these projects, concluding that the COMP instruments have achieved reasonable validity, reliability, and cost effectiveness. Furthermore, these field tests indicated that the six skills are affected by college education, and do correlate significantly with effectively functioning adults. (GDC/CP)

Noeth, Richard J.

A Ten-Year Study of Test Scores for College-Bound Students in the State of Washington.

Washington Pre-College Testing Program, Seattle.
Pub Date-Mar 79
Note-27p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Academic Achievement, Achievement Tests, *College Bound Students, *College Entrance Examinations, Credits, *Educational Trends, Grade Point Average, Longitudinal Studies, Senior High Schools, Sex Differences, State Programs, Testing Programs, *Test Results
Identifiers-*Test Score Decline, Washington, *Washington Precollege Testing Program

Test results (1968-1977) on the English and mathematics achievement subtests of the Washington Precollege Test (WPC), administered annually to the vast majority of college bound students in the state of Washington, were examined for evidence of test score decline. The following information from 300,000 students was analyzed by both sex and total group for each year of the ten-year period: the nine WPC English and mathematics subtests; high school grades, and high school credits earned. Early trends (1968-1972) paralleled national declines, since scores decreased on all but two of the mathematics subtests. Between 1973 and 1977, only the vocabulary and English usage subtests continued to decline, at an annual rate of two to three percent of a standard deviation. The applied mathematics subtest showed an increase, while the other English and mathematics subtests remained constant. Females scored higher than males on the English subtests, while males scored higher than females on the mathematics, spatial ability, and mechanical reasoning areas. Grades continually increased over the ten year period, as did the amount of credits taken. Largest increases were in the elective and miscellaneous courses; traditional academic areas showed slight increases. Overall grade point average was between a C plus and B in 1968, and over a B in 1977. (CP)

A Program Evaluation Using Client Records and Census Data.

Pub Date-Aug 78
Note-23p.; Paper presented at the Annual Meeting of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Adults, *Case Records, *Census Figures, Data Analysis, Demography, *Evaluation Methods, Mental Health Clinics, *Mental Health Programs, *Needs Assessment, *Program Evaluation, Research Methodology

Use of client records and census data as a research methodology can provide mental health planners with information on community needs as well as the adequacy of existing programs. Three ways of analyzing client records in conjunction with census data are: (1) tract by tract, comparing client geographic distribution with census characteristics; (2) client by tract, comparing demographic characteristics of clients with those of the general population in census tracts and the catchment area; and (3) client by client, comparing characteristics of client subpopulations. Examples based on three years of client records for a community mental health center demonstrated the uses of these analyses by showing that census areas characterized by high proportions of disenfranchised groups (e.g., divorced, low status, Spanish heritage) were high service utilizers; higher proportions of divorced, high school educated, and unemployed residents utilized services more than expected by population estimates; and dropouts from therapy could be indicated by demographic differences in marital status, income level, employment status, educational level, ethnicity, and previous mental health treatment. (Author/MH)

A Longitudinal Solution to the Problem of Differential Linear Growth Patterns in Quasi-Experiments.

Pub Date- Apr 79
Note-22p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Achievement Gains, Compensatory Education Programs, *Control Groups, Educational Research, *Experimental Groups, Predictive Measurement, Research Design, *Research Methodology, *Scoring Formulas
Identifiers-*Quasi Experimental Design

Differential achievement growth patterns between comparison groups is a problem associated with data analysis in compensatory education programs. Children in greatest need of additional assistance, are usually assigned to the program rather than to an alternative treatment so that the comparison groups may vary in several ways, in addition to the effect of the treatment each group receives. A gain score procedure is recommended as a solution, using an approach that is based on the regression of achievement on time and requires the availability of pretreatment achievement data from two points in time prior to the beginning of the program. It is shown that the effect estimated is unbiased for any linear model of academic growth, including the fan spread hypothesis. Finally, the precision of the effect estimated compares favorably with competing analytic strategies. (Author/CP)

Item Pool Construction for Use With Latent Trait Models.

Pub Date-Apr 79

Note-22p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Achievement Tests, *Item Banks, *Mathematical Models, *Sampling, Senior High Schools, *Test Construction, Testing Problems

Identifiers-*Latent Trait Models, One Parameter Model, Sample Size, Test Length, *Test Linking, Three Parameter Model

Because latent trait models require that large numbers of items be calibrated or that testing of the same large group be repeated, item parameter estimates are often obtained by administering separate tests to different groups and ''linking'' the results to construct an adequate item pool. Four issues were studied, based upon the analysis of a realistic application of several linking procedures: (1) required sample size; (2) number of items overlapping between linked tests to allow accurate translation of scale; (3) effect of linking on quality of existing item parameter estimates; and (4) best linking procedure for the two latent trait models studied (one-parameter and three-parameter logistic models). The linking techniques used were the major axis method; least squares; least squares with outliers deleted; and maximum likelihood. Three different calibration programs were used. Data were achievement test scores for 4,000 high school students on the 357-item Iowa Tests of Educational Development (ITED). Results of the analyses indicated that no method was clearly superior. The more simple one-parameter logistic model was found to be more advantageous as far as required sample size. (GDC)

Perspectives on Evaluation, Linkage and Program Improvement.

Pub Date-12 Apr 79
Note-35p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Change Agents, *Educational Trends, Elementary Secondary Education, *Evaluators, *Federal Programs, *Information Dissemination, Information Utilization, Interprofessional Relationship, Needs Assessment, Program Development, Program Evaluation, Program Planning, Research and Development Centers, Research Utilization, *Role Perception, School Districts, Surveys
Identifiers-*Linking Agents

Actual and potential relationships between evaluators and linkers curriculum or management specialists who disseminate the products of evaluation to school districts were explored. Evaluation and linkage evolved as distinct educational occupations, stimulated by federal involvement in research, development, and school improvement since the early 1960's. Early evaluation models were dominated by mainstream causally-oriented approaches, and dissemination focused on marketing and installing replicable products. Current models extend evaluators' role to needs assessment, and assistance with program planning and implementation; the linkers' role extends to continuing assessment of program outcomes. Role perception surveys were conducted with 21 linkers from three federal programs (National Diffusion Network, Research and Development Utilization, and Capacity Building) and with 263 school district evaluation units. Linkers saw themselves as primarily involved with dissemination through needs assessment, program planning, and implementation; evaluators were primarily involved with program assessment, mainly testing. Both groups reported an uncertain relationship with school administrators, little feedback on the results of their work, and minimal contact with each other. Both may remain as strangers, or they may be occasional task-specific consultants for another; eventually, linkers could be taught evaluation skills. (CP)

Identifiers-*Judgment

Objectives, with sample test items and explanations of answers are presented for instruction in judgment and logic in analyzing fallacies and weaknesses in arguments. This type of material is not usually taught in pre-college curricula, but has been geared for the secondary grades. Each fallacy is explained after the stated objective, and answers are followed by comments. Categories of logical thinking are: (1) fallacies of relevance; (2) fallacies of insufficient evidence; (3) fallacies of ambiguity; (4) context mixing, metaphors, and analogies; and (5) valid and sound arguments. Test items covering each category, examples of pretests, posttests, and a comprehensive test are given, along with correct answers. (MH)

This collection is comprised of 63 objectives and corresponding sample test items for evaluation of students in grades K-8. Correct answers or criteria for judging the adequacy of student responses are provided. Major categories in the collection are: (1) preparing to use the metric system decimal and fractional notation; (2) measurement length, capacity, weight, and temperature; (3) geometry perimeter, area, and volume; and (4) using the metric system computations and word problems. High School Competency Graduation Requirements: Do They Result in Better Graduates? Publication Number 78.76.
Pub Date-Apr 79
Note-12p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Academic Achievement, *Basic Skills, Educational Trends, *Graduation Requirements, High School Students, Low Achievement Factors, *Minimum Competency Testing, *Program Effectiveness, Reading Achievement, Remedial Mathematics, *Remedial Programs, Remedial Reading, Secondary School Mathematics, *Senior High Schools, Testing Programs
Identifiers-*Austin Independent School District TX, Test Score Decline, Texas (Austin)

Mathematics achievement test scores of high school students in the Austin Independent School District who graduated before implementation of minimum competency testing were compared to the scores of students who were more recently enrolled in mathematics tutorial classes in order to meet minimum competency requirements. The percentages of graduating seniors who met minimum competency standards in reading was greater when there were high school graduation requirements. It was tentatively concluded that implementation of minimum competency standards and establishment of remedial courses are likely to raise the scores of low achievers on district-wide achievement test results. Hints for Planning and Conducting a Survey and a Bibliography of Survey Methods. Aid Western Michigan Univ., Kalamazoo. School of Education.

Pub Date-Apr 79

Note-107p.

Available from-The Evaluation Center, College of Education, Western Michigan University, Kalamazoo, Michigan 49008 ($3.00)

Pub Type- Guides - Classroom - Learner (051) - Reference Materials - Bibliographies (131)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors-*Attitude Tests, *Data Analysis, Ethics, *Public Opinion, *Questionnaires, *Research Design, Research Methodology, Social Science Research, *Surveys, Test Construction

Identifiers-*Mail Surveys

Methods of planning and administering mail surveys, developing questionnaires, and analyzing data are reviewed. Each review section is followed by an annotated list of selected readings. Topics discussed in planning a survey include decision making; survey designs; sampling plans; and ethical considerations. Developments of instruments and tupes of attitude measures are discussed in the section on survey instruments. Survey management is concerned with the mechanics of distributing and collecting the questionnaires, coding, and checking for errors. Data analysis focuses on nonresponse analysis, computer usage, and the choice of statistical methods. A 365-item bibliography and a subject index geared to the bibliography are appended. (MH)

The Relationship of Cognitive Style Variables to Optimal Test Performance in Hearing-Impaired Children.

Pub Date- Apr 79

Note-22p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Aurally Handicapped, *Cognitive Measurement, *Cognitive Style, Conceptual Tempo, Elementary Education, Feedback, Locus of Control, *Performance Factors, Response Style (Tests), Standardized Tests, *Testing, Test Validity

Identifiers-Matching Familiar Figures Test (Kagan), Nowicki Strickland Locus of Control Scale, Piagetian Tests, Raven Progressive Matrices

The relationship of cognitive style variables and conditions of test administration was investigated in cognitive assessments of hearing-impaired children, aged six through eleven. One hundred-twenty children were given the Raven Coloured Progressive Matrices (CPM) and a Piagetian battery under one of six conditions of testing: (1) standard; (2) simple feedback; (3) verbalization after problem solution; (4) verbalization during and after solution; (5) differential feedback; and (6) conditions 4 and 5 combined. Kagan's Matching Familiar Figures Test (MFFT) and the Nowicki-Strickland Locus of Control Scale were also administered. Performance under conditions 5 and 6 was greater than performance under conditions 3 and 4, which in turn exceeded performance under conditions 1 or 2. Criterion-related validity was significantly enhanced under all - elaborative conditions. MFFT latency, MFFT errors, and locus of control scores were differentially related to performance in the different testing conditions. The overall prediction equation explained CPM and Piagetian test performance under conditions 2, 4, and 5. All analyses indicated consistency of findings across both dependent measures. (Author/MH)

The Assessment of Rhetorical Proficiency: The Role of Objective Tests and Writing Samples.

Pub Date- Apr 79

Note-19p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (San Francisco, California, April 9-11, 1979)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-College Freshmen, Composition Skills (Literary), Expository Writing, Higher Education, *Language Proficiency, *Objective Tests, *Performance Tests, Predictive Ability (Testing), Scores, *Test Validity, *Writing Skills

Identifiers-*American College Test English Usage Test, Scholastic Aptitude Test, Test of Standard Written English

An investigation of: (1) the relationship between the American College Test (ACT) English Usage Test scores and demonstrated writing proficiency, and (2) the relationships between and among other objective tests and writing proficiency was undertaken, using three samples of college freshmen. Although results indicated a moderately high relationship between objective measures and writing samples, the skills measured by the two types of instruments were somewhat different. Collectively, results suggested that some writing skills, particularly those represented by the holistic, language, and organization writing scores, appeared to have a moderately high relationship to the objective assessments. The audience writing score exhibited a much lower correlation to the objective assessments and a lower interrater reliability than other writing scores. It was suggested that further research be directed toward studying the influence of scribal errors on raters of writing assessment and the selection of specific writing strategies, processes, and features for objective assessment. (MH)

Kelley, H. Paul
Relation of Scores on the CLEP Subject Examination in Analysis and Interpretation of Literature to Performance in English 314K: Introduction to Literature I. Research Bulletin 73-11.
Texas Univ., Austin. Measurement and Evaluation Center.
Pub Date-Jul 73
Note-26p.

EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*College Credits, College Placement, Cutting Scores, *English Literature, *Equivalency Tests, Grades (Scholastic), Higher Education, *Literary Analysis, Scores, *Test Validity
Identifiers-*College Level Examination Program

The Subject Examination in Analysis and Interpretation of Literature from the College Level Examination Program (CLEP), was administered to 188 English literature students, to determine the appropriate score range for granting credit for their course. Scores ranged from 32 to 75 out of a possible range of 20 to 80, the average score was 51.52. The correlation coefficient of .47 between scores and preliminary course grades was judged adequate, considering the small number of A, D, and F grades reported. Cutting scores were computed at three intervals to illustrate the relationship between the frequencies of correct vs. high or low placement. Scores of credit-by-examination candidates averaged several points higher than did those who were actually taking the course. This is not surprising, because most candidates were above average in English skills, and all were required to complete an English composition course. The minimum CLEP scores recommended for awarding credit with grades of A and B were respectively: 59/60 and 51; no credit would be awarded for a score below 51. (CP)

Pub Type- Tests/Questionnaires (160)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*Achievement Tests, *Criterion Referenced Tests, Diagnostic Tests, *Educational Assessment, Elementary Education, *Elementary School Mathematics, Norms, Student Testing, Test Reliability, Test Validity
Identifiers-*Wisconsin Mathematics Test

Cross-referenced to instructional objectives defined in a previous publication, (Guidelines to Mathematics, K-6), the Wisconsin Mathematics Test can be used to measure achievement gains over a given year, or to detect student strengths and weaknesses, by correlating missed items with the objectives. It is also possible to compare results on a given objective within a district, school, or class, with those of a selected stratified sample of 1,000 Wisconsin students. For each grade level, mean discrimination indexes range between .34 and .46; reliability ranges between .79 and .94. A mathematics educator survey and independent studies have supported context validity. (The bulk of this document contains test booklets for each grade, answer keys, and directions for administration). (CP)

Descriptors-*Academic Achievement, *Basic Skills, *Educational Assessment, Educational Trends, Elementary Secondary Education, Grade 4, Grade 8, Grade 12, Language Proficiency, National Norms, Practical Mathematics, Reading Achievement, Sex Differences, State Programs, *State Surveys, Testing Programs, *Test Results
Identifiers-Comprehensive Tests of Basic Skills, Wisconsin, *Wisconsin Pupil Assessment Program

Nearly 15,000 Wisconsin public school students in grades 4, 8, and 12 were tested in Spring, 1977, as part of the Wisconsin Pupil Assessment Program. Objectives were: (1) to measure student progress in attaining specific mathematics objectives; (2) to determine how students compared nationally in reading, language, and mathematics; and (3) to determine changes in performance compared to 1976 test results. Both criterion referenced tests and national , standardized, norm referenced test were administered. An overview of the findings indicated students performed better in computation problems than in story problems; students scored above the national average in reading, language, and mathematics; twelfth graders performed better than eighth graders in the mathematics tests; the 1977 performance showed improvement when compared to the 1976 test results; females scored better than males in reading and language arts; and male and female test scores in mathematics were nearly the same. (The report is divided as follows: results of criterion referenced tests; results of the Comprehensive Tests of Basic Skills; comparison of eighth and twelfth graders on the mathematics criterion referenced test; comparison of 1976 and 1977 results; and comparison of male and female test results). Descriptors-Dropout Attitudes, *Dropout Characteristics, Enlisted Personnel, Graduation, *Military Training, *Persistence, Postsecondary Education, Predictor Variables, *Program Attitudes, *Sex Differences, *Student Attitudes, Student Motivation, Technical Education, Test Construction
Identifiers-*Air Force, Technical Training Student Survey

As part of a multiphase study on male and female student attitudes towards Air Force technical training and the relationship between those attitudes and student performance, the 121-item Technical Training Student Survey (TTSS) was administered to 12,666 technical training students. The attitudes of students from high attrition courses were compared to the attitudes of students from low attrition courses to identify those attitudes related to course attrition rate and to compare attitudes related to student performance at different levels of student attrition. Many similarities were found, but differences suggested the importance of motivational factors. Male and female attitudes towards the training experience were found to differ in several areas. While some differences referred to specific aspects of training, most appeared to be reflecting the differences in attitudes between a group with experience in a particular environment (men) versus those of a group entering a relatively new experience (women). The attitudes related to performance for men and women were found to be very similar with some indications that women were having greater difficulty with some aspects of the academic work. These findings and the application of this methodology to other subsets of the existing data base are discussed. The TTSS is appended. (Author/MH)

Descriptors-Elementary Secondary Education, *Information Dissemination, *News Media, Norm Referenced Tests, *Parents, Parent School Relationship, *Publicize, School Community Relationship, Scores, Statistical Data, Teacher Administrator Relationship, Technical Reports, *Testing Programs, Test Interpretation, *Test Results
Identifiers-Comprehensive Tests of Basic Skills

Several questions are frequently asked by parents and news media regarding the purpose, content, and interpretation of the Comprehensive Tests of Basic Skills (CTBS) the achievement battery currently used in South Carolina assessment programs. Proper interpretation of the CTBS, or any school district testing program, requires a sound understanding of its validity and reliability, and of the composition of the national sample relative to the students tested. It is easier to interpret test results by displaying percentile ranks, standard error of measurement, and frequency distributions in graphic form. As for releasing test data to parents and the news media, a formal report should be released at the district level, after first informing school district staff. The report should relate the purpose and results of the tests to school/district objectives, describe the students tested relative to the national sample, and compare results by year and by school. At the beginning of the school year, parents should be informed of the testing program, and results should be explained to individual parents in a parent-teacher conference. Followup meetings and press conferences are recommended for discussing programs to improve achievement. (CP)

A Monte Carlo Comparison of Learning Hierarchy Validation Techniques.

Pub Date-Apr 79
Note-12p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Associative Learning, Complexity Level, Mathematical Models, Organization, Probability, Research Methodology, Simulation, *Skill Development, Task Analysis, Taxonomy, *Transfer of Training, *Validity
Identifiers-*Learning Hierarchies, Maximum Likelihood Estimation, *Monte Carlo Methods

The development of a probabilistic model for validating Gange's learning hierarchies is described. Learning hierarchies are defined as paired networks of intellectual tasks arranged so that a substantial amount of positive transfer occurs from tasks in a lower position to connected ones in a higher position. This probabilistic validation technique is compared to two other selected validation techniques on 32 experimental populations representing valid and invalid hierarchies, various probabilities of measurement error, and several levels of skill difficulty. From each of the populations described, 1,000 random samples of four different sizes were generated by computer to obtain estimates of the probability of making an incorrect decision about the validity of the hierarchy for each technique. Results support the hypothesis that the developed technique is more accurate than the comparison techniques over all population-sample size combinations studied. (Author/CP)

Johnson, Craig W.

Effects of Imagery, Mnemonics and Level of Processing in Learning Definitions Upon Concept Comprehension.

Pub Date- Apr 79
Note-43p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Cognitive Processes, Complexity Level, *Comprehension, *Definitions, Higher Education, Learning Activities, Mediation Theory, *Mnemonics, *Retention, Verbal Learning, Visualization, *Vocabulary Development

Undergraduate students using an imagery mnemonic mediating technique involving "keywords" to learn definitions of thirty unfamiliar words performed better on a 1-week delayed comprehension test, on at least half of the definitions, than those who read and copied definitions. Mnemonic mediating strategies worked better than nonmediating strategies on both immediate and delayed occasions. The superiority of the mediating strategies was greater on the concrete than the abstract definitions. There were moderately large positive correlations between the degree to which participants in the mediating groups used the prescribed processing methods and comprehension test scores. (Author/GDC)

Response Length and Quality in the Grading of Essay Tests.

Pub Date-Apr 79
Note-16p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (San Francisco, California, April 9-11, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Essays, *Essay Tests, *Evaluation Criteria, *Response Style (Tests), *Scoring, Secondary School Teachers, Senior High Schools, Social Studies, Student Teachers, *Test Reliability, Test Results, Test Validity
Identifiers-*Test Length

The validity and reliability of essay scores were examined by comparing the mean scores assigned to good and poor quality essay responses of different lengths written by high school sophomores. In-service and pre-service social studies teachers graded essay responses to a test question requiring knowledge of the Constitutional provisions for police power and the relationship of police power to the 14th Amendment. A scoring key was used. Mean scores were analyzed using t-tests. Comparisons between responses of different qualities and different lengths indicated that the long response had a significantly higher mean score than short or moderate length responses; that good quality papers were graded significantly higher than poor quality responses; and that the mean for the poor quality long response was not significantly different from the mean responses for good quality short and moderate length responses. Results indicated that the length of the response rather than knowledge of the subject influenced scores, and that a scoring key alone was not sufficient to insure that quality of response was the main determinant of the grade assigned. (Author/MH)

School District Characteristics and Their Impact on Evaluation Offices.

Pub Date-Apr 79
Note-17p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Change Strategies, *Decision Making, Diffusion, Elementary Secondary Education, *Evaluation Needs, Formative Evaluation, Information Dissemination, *Information Utilization, *Program Evaluation, Research Utilization, *School Districts, School Organization

Evaluations by school district research and evaluation units have minimal impact, because they do not meet the realities of school district decision making. School districts are loosely coupled systems that do not respond to centralized planning or evaluations, particularly if findings are unfavorable. To maximize utilization of their findings, district evaluation units should put less emphasis on producing reports for district-wide consumption. Instead they should stress working with small units school buildings, teachers, and project directors to design, implement, and report evaluations, following Patton's active-reactive-adoptive model. Other ways to improve the use of evaluation reports include: (1) arranging a conference for evaluators, clients, and external funders; (2) conducting independent evaluations of each report in order to eliminate those which serve no useful purpose; and (3) routing funds from external projects directly to local managers, rather than to the district unit. In conclusion, district units, external funding agencies, school administrators, and those who train evaluators all share the responsibility for non-utilization. (CP)

Identifiers-Arizona (Tucson), *Tucson Unified School District AZ

The Research and Evaluation Department of the Tucson, Arizona Unified School District offers an array of customized services using machine-readable questionnaires, from instrument design to data tabulation. The bulk of this document contains examples of questionnaires for parents, students and staff. The examples measure attitudes toward: bilingual programs, parent involvement, high school in general, counseling services, sports programs, and quarter credit systems. Fifty surveys and questionnaires available from the Department are listed. The author suggests that by collecting and interpreting information for decision-makers, research and evaluation departments can expand their visibility. (CP)

Identifiers-Semantic Test of Intelligence

Four topics were emphasized during this conference on testing problems: (1) the selection of appropriate score scales for tests; (2) the experimental approach to the measurement of human motivation; (3) trends in public opinion polling since 1948 and their probable effects on predictions of the 1952 election; and (4) techniques for developing unbiased intelligence tests. Eric F. Gardner and Ledyard R. Ticker both discussed the importance of reference groups in scaling procedure; discussions by John C. Flanagan and E. F. Lindquist followed. David C. McClelland presented the address on the measurement of human motivation; a panel discussion followed. The luncheon symposium focused on the trends in public opinion polling since 1948, and the prediction of the 1952 elections. Sampling, interviewing, and data analysis were discussed by Frederick F. Stephan, Herbert Human, and Samuel Stouffer, respectively. The session on unbiased intelligence tests included papers by Irving Lorge, Phillip J. Rulon, and Ernest A. Haggard; Quinn McNemar and Ernest A. Haggard commented on the papers. (An example of Phillip Rulon's Semantic Test of Intelligence STI is included.) (GDC)

Descriptors-Course Content, *Decision Making, Educational Benefits, Educational Improvement, *Educational Testing, Elementary Secondary Education, Higher Education, Interviews, Measurement, Officer Personnel, Personality Assessment, *Profile Evaluation, Student Testing, *Testing Problems, *Test Results, *Test Scoring Machines

Seven major topics were included in the conference proceedings: (1) Improving Evaluation of Educational Outcomes at the College Level; (2) Individual versus Group Decision Making; (3) Problems and Procedures in Profile Analysis; (4) Making Test Results Meaningful; (5) The Teaching of Educational Measurement; (6) The Interview as an Evaluation Technique; and (7) Impact of Machines and Devices on Developments in Testing and Related Fields. Most sessions concluded with a summary of the discussion. The first topic emphasized the benefits of testing. Topic three dealt with Rorschach data on Marine Corps officer candidates and a geometric model for profile problems. Topic four was concerned with testing programs in local schools, locally produced tests, and the usefulness of the test manual. Topic five dealt with introducing measurement courses; extension courses for inservice training; and psychological research training. Section six included papers on evaluation of interviews for selection purposes; interpersonal aspects; and personality appraisal. Section seven was concerned with topics such as the IBM scoring machines, electronic computers, and new developments in test scoring machines. (MH)

This conference focused on the broad theme, improving the quality and scope of measurement. The first session centered on improving criteria for educational and psychological measurement, with papers on Criteria for Complex Mental Processes by Robert C. Wilson and on Criteria of Nonintellectual Aspects of Personality by Morris I. Stein. The second session considered the improvement of measurement through letter exercise writing, with papers on exercise writing in the field of the humanities (by Paul B. Diederich), in the natural sciences (by Leo Nedelsky), and in the social sciences (by Max D. Engelhart). The luncheon address on Prediction of Educational and Vocational Success Through Interest Measurement was given by Edward K. Strong, Jr. The final session concerned the application of test users' problems as guides to better measurement. Discussions included The School Administrator's Problems for Testers, by Paul T. Rankin; Discussion of the School Administrator's Problems, by Roger T. Lennon; The Guidance Director's Problems Suggestions for the Test Specialist, by Edward Landy; and The Consumer and the Producer, by Donald E. Super. (BH)

Descriptors-*Cognitive Measurement, *College Entrance Examinations, Computer Oriented Programs, Computer Science, Creativity, *Creativity Tests, Educational Testing, *Equated Scores, Higher Education, Information Systems, Personality Assessment, *Psychological Testing, Tables (Data), *Testing Problems, Thought Processes

The first topic of the conference was creativity. Papers delivered were Knowledge and Creativity by Theodore C. Denise and Hobert W. Burns; Potentiality for Creativity and Its Measurement, by J. P. Guilford; and Some Methodological Issues in the Study of Creativity by Robert L. Thorndike. In the second session, a paper on comparability of scores was entitled: Can Useful General-Purpose Equivalency Tables be Prepared for Different College Admissions Tests? by William H. Angoff. The third session dealt with processing educational data and consisted of two papers: Information Systems in the Educational Environment, by Charles R. De Carlo; and The Role of Machines in Education Decision Making, by Ralph W. Tyler. The luncheon address, entitled Approaches to the Measurement of Intellectual Disposition, was delivered by T. R. McConnell. (MH)

Descriptors-Academic Achievement, *Cognitive Ability, College Students, *Educational Testing, Equated Scores, Higher Education, Medical Education, Norm Referenced Tests, *Norms, Personality Assessment, *Predictive Measurement, Social Responsibility, Student Testing, Success Factors, *Testing Problems, *Test Reliability, Test Validity

Conference speakers reviewed and analyzed the current thinking underlying the basic concepts of test norms, reliability, and validity. Roger T. Lennon's paper called for more attention to the development of norming theory and summarized current norming practices and the establishment of a system which would permit comparable norms for tests which were standardized on different samples. Robert L. Thorndike commented on proposals, practices, and procedures for estimating reliability. Anne Anastasi reviewed recent approaches to the study of validity. During the session devoted to test use in medicine, John P. Hubbard described a method used to test the diagnostic competence of interns. E. Lowell Kelly reported on an extensive investigation of predictor and criterion variables of concern to medical schools. Jerome S. Bruner presented the luncheon address on human development. Warren G. Findley discussed current theory and applications in the appraisal of cognitive ability. Non-cognitive aspects of student performance were treated by Samuel Messick, who considered the portential contribution of personality assessment techniques to the prediction of college success. The final speaker was Robert L. Ebel, who spoke on the social consequences of educational testing. (BK)

Identifiers-China

This conference focuses upon various aspects of testing within a society, and upon technical advances in measurement. Philip H. DuBois's paper deals with China, a society dominated by tests, from 1115 BC 1905 AD. Donald W. Fiske discusses the effect of testing on the individual in modern America in his paper, The Subject Looks at Psychological Tests.'' Three psychometricians discuss several new mathematical approaches to the analysis of test data: Louis Guttman, The Structure of Interrelations Among Intelligence Tests;'' Henry F. Kaiser, Psychometric Approaches to Factor Analysis;'' and Ledyard R Tucker, Experiments in Multi-Mode Factor Analysis.'' Omar Khayyam Moore speaks on Technology and Behavior.'' The four final papers dealt with various issues related to the testing of the culturally different: Measurement Issues in the Counseling of the Culturally Disadvantaged,'' Martin Hamburger; Principles of Developing Tests for the Culturally Different,'' William E. Coffman; The Measurement of Environments,'' Richard Wolf; and Social Class and Cultural Group Differences in Diverse Mental Abilities,'' Gordon Fifer. (BH)

Identifiers-Elementary Secondary Education Act Title I, *Kindergarten Extended Day Program

Kindergarten pupils enrolled in Elementary and Secondary Education Act Title I schools were selected for the Kindergarten Extended Day (KED) Program if they showed marked underachievement on the Cooperative Preschool Inventory (CPI). KED students attended kindergarten for an additional half day. Since previous evaluations of KED may have had problems in their research design, this evaluation used and compared six of the Office of Education Title I evaluation models. The following comparisons were made, using transformed data from the CPI, Basic School Skills Inventory (BSSI), and the Comprehensive Tests of Basic Skills (CTBS) including Visual and Auditory Discrimination and Mathematics subtests: (1) Model A comparison of normal curve equivalent gains on BSSI for KED participants; (2) Model C, using CTBS subtests as criterion variables and CPI as the selection instrument; (3) modified Model B, using BSSI and CTBS posttest scores and CPI selection scores; (4) alternative Model B, using CPI selection scores as a covariate; (5) Model C evaluations using KED participants as in (3); and (6) Model A evaluation as in (3). Results indicated that substantially different results were produced from one model to another. Six recommendations were made regarding program evaluation models. (GDC)

Descriptors-Developmental Reading, Elementary Education, Inservice Teacher Education, Program Development, *Program Evaluation, Reading Achievement, *Reading Improvement, Reading Instruction, *Reading Programs, *Teacher Role

Identifiers-Illinois (Chicago), Intensive Reading Improvement Program

The Intensive Reading Improvement Program (IRIP) was implemented in Chicago, Illinois elementary schools after standardized test results, first published in 1969, indicated the need for improvement. IRIP had four goals: to increase motivation in both students and teachers; to extend teachers' understanding of a good developmental reading program; to emphasize specific techniques for teaching reading; and to increase parent and community participation. Reading resource teachers were relieved of their regular teaching assignments, in order to receive special training for IRIP teaching. Their training consisted of sixty hours in reading theory and instructional technique. The program grew to include 203 teachers in 186 schools, with a budget exceeding three million dollars. The program evaluation focused on the characteristics of selected teachers and schools; reading achievement gains; participant satisfaction regarding the teacher training; actual activities of IRIP teachers; and opinions of related staff. As a result of the evaluation findings, five recommendations were made: (1) revise and prioritize the guidelines for teachers' responsibilities; (2) revise the written training materials; (3) eliminate teachers' noninstructional duties; (4) monitor teacher activities; and (5) provide forums for teachers to meet and exchange ideas. (GDC)

Identifiers-Oregon (Portland), *Portland School District OR

A naturalistic inquiry approach was used for the collection and interpretation of information on the 138 schools in the Portland, Oregon school system. This approach was an in-person, field based, investigative method, and was nonobtrusive. Factors studied included: description of the school and its setting; the school building and facilities; school and community; school goals; administration; curriculum and instruction; support services; and student performance. There were 25 criteria for evaluating a school. These criteria covered instructional activities and grade placement; interpersonal relationships; academic achievement measures; standards for student behavior and administrative support; community, parent, and teacher participation; and adequate educational materials and physical facilities. Characteristics of the evaluators included professional experience in education; experience with teaching materials and resources; knowledge of evaluation technique; ability to function unobstrusively and to establish good rapport with staff and students; and ability to analyze data and report findings objectively. The program process involved school selection; on-site evaluation; report preparation; and report dissemination and application. (MH)

Descriptors-Content Analysis, Educational Trends, Effective Teaching, Elementary Secondary Education, *Evaluation Criteria, *Instructional Improvement, *Noninstructional Responsibility, *Rating Scales, Student Teacher Relationship, Teacher Characteristics, *Teacher Evaluation, Teacher Improvement, Teacher Responsibility, *Teacher Role, Teaching Techniques
Identifiers-New Mexico

Teacher evaluation procedures appear to focus on organizational maintenance aspects more heavily than on helping teachers improve their teaching performance. This conclusion was reached after a content analysis of teacher evaluation instruments used in New Mexico schools. Items focusing on the instructional role constituted only 28% of the items in the rating scale instruments. Other factors used in teacher evaluations included personal characteristics (30%); administrator/manager role (14%); social role (12%); professional role (7%); organizational membership role (7%); and student achievement (1%). The results also suggested that organizational conservatism and stability, rather than change, appear to be highly valued. From a supplementary analysis of teacher evaluation instruments dating from the turn of the centruy to the present, it was concluded that the secondary emphasis on instructional role has been a persistent characteristic of teacher evaluation over the years. Identifiers-*Education for All Handicapped Children Act, Malpractice (Education)

Recent legislation and court decisions have upheld the right of every child to a quality education. Public Law 94-142, The Education for All Handicapped Children Act, requires that all states provide an appropriate education for all handicapped children. Given that special education is a civil right, it is inevitable that educational malpractice and special education become entwined. Three noteworthy court cases are: (1) Frederick L. v. School District of Philadelphia involving screening tests for learning disabilities; (2) Daniel Hoffman v. New York City Schools regarding a four-year old with a minor speech impediment who was diagnosed as mentally handicapped and never retested; and (3) Doe v. Griles a class action suit on behalf of 113 exceptional children in the Fort Wayne, Indiana Community School District who were served by only four teachers. To implement P. L. 94-142, schools should provide evaluation services for collecting data on students, deliver full educational services (including regular class placement, appropriate programming, and safeguards), and encourage parental involvement. The special education evaluation unit should provide services related to student evaluation, program improvement, individualized curriculum planning, and recommended research studies. (GDC)

Descriptors-*Decision Making, Evaluation Criteria, *Evaluation Methods, *Evaluators, Program Administration, *Program Evaluation, *Reliability
Identifiers-Auditors, *Audits, Florida, *Interrater Reliability

The reliability of evaluators' judgments was investigated, using a discrepancy evaluation model within a program evaluation context. Two research problems were addressed: the degree of evaluator reliability in detecting and rating problems in federal educational project planning, management, and evaluation; and the relationship between inter-judge reliability and the types of items examined, the evaluators' expertise, and the type of project being evaluated. Of thirty-one evaluators studied, 77% had doctoral degrees, and all had previous training related to the Title IV-C audit system. Three types of reliability coefficients were calculated: (1) the consistency of a single rater over a set of ratings was .07 to .64; (2) the estimated single rater reliability over all situational protocols was .20 to .84, with most coefficients above .50; and (3) the average interrater reliability was .45 to .96, with over half of the coefficients above .80. Results raised two questions about the reliability of judgments made by educational evaluators; questionable replicability of evaluation methods and standards, and the amount of disagreement among evaluators on methods and procedures for evaluating programs. Descriptors-Academic Standards, *Complexity Level, *Cutting Scores, Higher Education, *Mastery Learning, *Mastery Tests, *Medical Schools, Medical Students, Multiple Choice Tests, *Performance Based Education, Test Construction, Test Items, Test Reliability, Test Validity
Identifiers-*Nedelsky Method

The Southern Illinois University School of Medicine applies mastery learning concepts to an objectives-based curriculum and uses the Nedelsky method to assess mastery of core objectives. Provisions are made for remediating deficiences. The Nedelsky technique is used for determining an acceptable level of performance in multiple choice examinations administered to medical students. Advantages of using the Nedelsky method are: (1) standards are based on content; (2) it helps faculty realize item and response option difficulties; (3) the technique is easily understood; and (4) data supporting the validity of the technique are already available. Shortcomings include: the likelihood of reduced rating reliability and validity when obtained from a single instructor; decreased emphasis on other important test characteristics; and the possibility of consistently underestimating an acceptable level of performance. It was concluded that the Nedelsky technique worked best in the following situations: several instructors who are familiar with

the test content are available; the test contains a relatively large number of items; and the acceptable level of performance is adjusted to more than procedural considerations. (MH)

Descriptors-Achievement Tests, College Instruction, Content Analysis, *Course Objectives, Higher Education, Item Analysis, *Learning Activities, Measurement, *Statistics, *Student Participation, Teamwork, *Test Construction, *Test Interpretation, Test Items

Undergraduate students in a large tests and measurements class were assigned a series of projects directly related to course content: (1) divide the textbook and instructional content into topical sub-sections; (2) identify learning outcomes for each sub-section; (3) list course objectives working in groups of 3-6 students; (4) revise objectives among entire class; (5) divide the task of item writing for the final list of objectives; (6) critique items and construct a quiz; (7) administer quiz and conduct item analyses; and (8) conduct an item-by-item critique among the entire class to determine which items need revision or deletion. This instructional strategy increased the students' involvement and cooperation, but required a considerable amount of class time. (Four behavioral objectives constructed by the students are presented, as well as a sample item card, the 27-item test, and a computer printout of quiz results.) (GDC)

This report evaluates the alcohol abuse prevention program's effectiveness in producing social change among Boys' Club participants. Concentrating on the program's second year, this paper presents summative evaluations for nine Boys' Club pilot sites. Each summation concentrates on the site's ability to implement model programs developed during the first year of the project and examines the impact the intervention effort had on participants in the program. Specific activities undertaken at each site to develop and/or implement the program are described. Sample data from surveys and interviews conducted by evaluators to assess the project's impact on participants are presented. Patterns among the project's participants and a control group are compared. The project's success in modifying the behavior and attitudes of participating youngsters are outlined and recommendations concerning the continuation and improvement of the program are listed. (EB)

Identifiers-*Project TEAM

This guide, the culmination of a three year Project TEAM effort by the Boys' Clubs of America, describes numerous strategies for developing an alcohol abuse prevention program. The core of this guide consists of program models developed by the Boys' Club project at seven pilot sites. The models presented cover the following areas: peer leadership, peer consulting, arts and crafts, cultural exploration, media strategy, values clarification, and community service. Specific objectives and activities for developing and implementing each of the models are outlined. Suggestions for starting a prevention program, developing project staff, getting teenagers involved, and working with the program models are presented. Suggestions are also made concerning program objectives and planning, evaluation concepts and techniques, program funding, and publicity. In addition, facts and myths about alcohol and alcohol abuse are discussed and a resource list is provided. (EB)

Descriptors-*Employment Programs, Job Placement, *Program Development, *Program Effectiveness, Program Evaluation, *Program Improvement, *Program Validation, Secondary Education, *Student Employment

This paper provides a brief review of the Lewiston program and evaluates the vocational education project on the basis of the objectives around which it was originally developed. Each of fourteen objectives listed is discussed in terms of how well and effectively the objective was met during the tenure of the project. Major factors considered include the project's growth and progression, its exposure to adult education students, the success of its job performance evaluations and follow-up, the program's role in helping drop-outs, and its involvement with employers, State and local agencies and apprenticeship programs. Learning packages and pre-employment evaluations developed by the program and strategies employed by the program to publish a placement guide, to determine employment trends and to establish an advisory committee are also evaluated. Commendations are presented and recommendations concerning the continuation and improvement of the program are made. (EB)

Identifiers-*Great Britain, Jamaica, West Indians

West Indian children in British schools tend to have lower scores than white children on conventional tests of achievement. However, when factors such as social class, length of exposure to the British educational system, and school quality are taken into account, the differences in test scores between blacks and whites narrow. A broader concept of cognitive functioning is needed for testing students by traditional psychometric tests, Piagetian tests, tests of cognitive style, measures of achievement, and tests of vocationally-oriented skills. In addition, educational authorities need to be aware of the language background (Creole) of black children in England. The most successful black children are those whose parents speak standard English, are well educated, and are critical of English institutions, including the educational system. (Author/MC)

Concept of Shame and the Mental Health of Pacific Asian Americans.

Pub Date-May 79
Note-12p.; Paper presented at the Annual Conference on Ethnic and Minority Studies (7th, La Crosse, Wisconsin, May 2-5, 1979); Not available in hard copy due to reproduction quality of the original document
Pub Type- Speeches/Meeting Papers (150)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Academic Achievement, *Asian Americans, *Japanese Americans, *Mental Health, Mental Illness, *Psychological Characteristics, *Psychological Patterns, Religion, Self Concept, *Subemployment

The concept of shame may be an important factor in the low utilization of mental health services, under-employment patterns, and religious orientation of Pacific and Asian Americans (PAAs). Pacific and Asian Americans generally have high academic achievement and a low rate of crime and delinquency. Because of this, the myth of the Pacific and Asian American as the model minority with no serious problems has become widespread. Fear of ``losing face'' often prevents the Pacific and Asian American from seeking counseling for psychological problems until the problems are advanced. Despite high educational levels, PAAs receive lower earnings than similarly educated white males. Fear of standing out and risking unemployment often keeps the PAAs from fighting for their rights in the workplace. Even within the Asian American Protestant ethnic church it is often difficult for the PAA to share personal or family problems because of the concept of shame. Greater understanding of the concept and impact of shame may provide more insight and appreciation of the social, psychological and cultural experience of the Pacific and Asian Americans. (RLV)

Identifiers-*Walberg Model

Extensive research into the effects of racial balancing within schools has yielded little evidence that minority or majority children benefit from such endeavors. A productivity model developed by Walberg illustrates the type of comprehensive design needed to schematize learning and raise the quality of education for students of all races. This model measures seven productivity factors: ability, motivation, social class, home factors and age. Researchers have shown how the Walberg model may be applied in specific situations. Their efforts point out subtle and complex factors that deserve consideration if learning trends are to be understood. In addition, their findings support the belief that when schools succeed, it is because of support from home and community. If it is true that forced busing weakens the natural and supportive bonds of home, school and community, then it is time to reaffirm educational strategies designed to promote the learning of minority children. The Walberg Model provides the framework for constructing the necessary research designs for improving desegregated schools. (Author/EB)

National Comparisons of Racial Attitudes of Segregated and Desegregated Students.

Pub Date-79
Note-25p.; Tables may be marginally legible due to the print quality of the original document
Pub Type- Reports - Research (143) - Information Analyses (070)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Blacks, Caucasians, Integration Effects, *National Surveys, *Race Relations, *Racial Attitudes, *Response Style (Tests), School Integration, *Social Influences, *Testing Problems
Identifiers-*National Assessment of Educational Progress

Racial attitude questions from national surveys such as the National Assessment of Educational Progress (NAEP) are being used to show that progress has been made toward interracial harmony in this country. However, there is reason to worry about conclusions from such measures, because they may indicate only progress on learning the socially desirable response rather than the true feelings of the respondents. In fact, a closer examination of racial attitude responses on the NAEP indicates that there is a significant residue of real mistrust between blacks and whites, particularly in the areas of neighborhood integration for whites and personal services for blacks. The cautions against using racial attitude questions also apply to investigations of effects of school desegregation. For example, by controlling for social desirability response bias, results from an examination of responses made by black and white students on the NAEP, show that school desegregation has a positive influence on black students' expression of acceptance for whites and a mixture of positive and negative effects on white students' expression of acceptance of blacks. Furthermore, when subgroups with the least tendency toward social desirability bias were isolated, findings show the most positive effect of desegregation on the acceptance by both blacks and whites of the opposite race. Nacoste, Rupert W. Scott, Richard R.
Social and Psychological Antecedents of Black Student Aspirations.
Pub Date-19 Mar 79
Note-30p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Academic Aspiration, *Black Students, College Students, Cultural Background, *Goal Orientation, Grade Point Average, Higher Education, *Psychological Patterns, *Social Background, *Social Influences, Socioeconomic Status

After a critical review of research which deals with various aspects of aspirations, expectations and educational attainment, this study attempts to determine the social psychological antecedents of black educational levels of aspiration. The study is based upon data colledted from black sophomore students at a large, predominantly white university in the southeast. Variables considered include sex of respondents, grade point average, socioeconomic status, contact with whites, and subjective ability comparisons. Measures of educational aspirations and expectations are assessed. Multiple regression techniques are used in analyzing these variables. Findings indicate that the aspirations of black students are closely related to their expectations and suggest that social background plays an important role in the formation of aspirations and expectations for post-baccalaureate schooling, but not for the formation of grade point average expectations. It is concluded that black students do not link grade point average to schooling as white students do because of values acquired in a distinctive subculture. Implications of these findings for educational policy are discussed. (Author/EB)

Descriptors-*Civil Liberties, Constitutional Law, *Curriculum Guides, *Instructional Materials, *Learning Activities, *Legal Education, Resource Materials, *Teaching Methods

This guide is designed to help teachers provide their students with a basic understanding of the American legal system. It concentrates on the foundation of law, criminal procedures, and the laws and court decisions which protect the rights of the accused and freedom of expression. Included are case studies, simulation activities, role play, field study and interning possibilities, as well as value strategies. The first chapter emphasizes the aims and methods of teaching law. The other chapters deal with different aspects of the unit and are topically arranged to include the following: (1) curriculum objectives; (2) teacher background information; (3) motivating strategies; (4) activities to develop knowledge; (5) student handouts; (6) vocabulary; (7) concluding activities; (8) author references and suggested readings; and (9) audio visual materials. An appendix lists resources available to teachers and includes such materials as a legal glossary, an outline of the judicial system, and excerpts from the constitution relevant to the topics covered. Descriptors-Adolescence, *Adolescents, *Alcoholism, Delinquents, *Drinking, Family Life, Family Problems, Parent Influence, *Runaways, *Stress Variables, *Youth Problems

The connection between parental alcohol abuse and adolescent life stress, adolescent alcohol abuse and adolescent running away is explored in this study of 907 adolescents ranging in age from 12-17. The purpose of this study is to determine whether or not alcohol abuse and running away can be viewed as a response to, or an escape from stress. It is reported that the majority of runaways say they left home because of family problems, including parental alcohol abuse. A population of two groups, runaway and non-runaway, was used in this study to test for a correlation between parental alcohol abuse and adolescent running away. A questionnaire was administered to the entire population of 907 adolescents and a Life Events Inventory (LEI) was administered to a sub-sample of these adolescents. Final analysis of the questionnaire data supported positive correlations between adolescent alcohol abuse, running away and parental alcohol abuse. The analysis also showed similarities in drinking patterns for runaways and non-runaways. The results indicated, however, that despite many similar characteristics between runaways and non-runaways, differences existed between these two groups. It was found that parental alcohol use/abuse is one of the most significant factors in adolescents's drinking. (RLV)

Identifiers-Career Intern Program, Cities in School Program, *National Institute of Education, Project EXCEL

This paper addresses problems in research on urban education and outlines several National Institute of Education (NIE) proposals for dealing with these problems. It is argued that research should not stray too far from the basic educational goals of inculcating literacy, that educational research must become more diverse and sophisticated in its methodologies, and that the topics for study should be realistic. Other problem areas discussed include the ``teacher drop-out'' syndrome, the diversity of present day classrooms, special education needs, and external demands such as accountability movements and legislative requirements. Four projects which relate to urban settings and reflect the philosophy of action-oriented research are described. These include Jesse Jackson's Project EXCEL, the Cities in School Project, the Career Intern Program, and the role of community colleges in improving adult literacy. (Author/EB)

Summary: Report to President's Commission on Mental Health from the Special Populations Subtask Panel; Mental Health of Hispanic Americans; Recommendations to the Commission.

Pub Date- 79
Note-7p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Cultural Differences, Delivery Systems, *Health Needs, Health Personnel, *Health Services, *Mental Health, *Mental Illness, *Spanish Speaking

The issue of the delivery of mental health services to Hispanic Americans is discussed in this report to the President's Commission on Mental Health. Hispanics, who will be the largest minority group in the United States within the next 25 years, do not make use of sufficient existing health services. They have a need for alternative services which are adapted to their cultural heritage. Urban Hispanics are a high risk population with respect to mental illness, alcoholism, and drug abuse. Rural Hispanics and migrant workers have problems stemming from their isolation, their mobility, and the reluctance of traditional agencies to provide them with services. In addition to being served inadequately as patients, Hispanics are also underrepresented as professional workers in the mental health field. This condition persists despite the affirmative action efforts of recent years. In order to develop the human resources necessary for the delivery of culturally relevant mental health services to Hispanic Americans, 24 recommendations are suggested. The increased participation of Hispanic peoples in the shaping of their own destiny should be the single most important element of any national policy designed to improve their physical and mental health status. Descriptors-Blacks, Delivery Systems, Females, Lunch Programs, *Mental Health, *Older Adults, *Psychological Characteristics, *Psychological Needs, *Psychological Services, Psychopathology, *Senior Citizens, Urban Population

This study reports the initial results from a study designed to assess the perceived needs for mental health services and other types of services in a group of elderly black women who participated in an urban, federally subsidized luncheon program. The two hypotheses tested were: (1) that the majority of elderly persons participating in this age-segregated program would not be satisfied with their current quality of life; and (2) that the majority of these elderly respondents would endorse as a high priority the need for neighborhood or community based mental health counseling services. Findings did not support either hypothesis. They did suggest that if a substantial number of elderly black women wish to have direct assistance type programs as a high priority, then perhaps government subsidized luncheon programs, as well as mental health clinics are useful services. The government should plan for and provide better delivery of these kinds of services, either directly or as auxillary projects. Satisfaction of specific needs could be the key to the primary prevention of psychopathology for elderly persons. (Author/EB)

Academic Achievement Versus Desegregation: A Definitive Verdict or is the Jury Still Out?

Pub Date- 79

Note-24p.

Pub Type- Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Academic Achievement, *Black Students, *Caucasian Students, Elementary Secondary Education, *Integration Effects, *Integration Studies, *School Integration

Identifiers-*Coleman Study

This paper reviews research related to desegregation and achievement in an attempt to determine the effects of desegregation on the academic achievement of black and white students. The review is organized into three sections: (1) the pre-Coleman era which includes discussions of desegregation and academic achievement prior to 1966; (2) a summary of the Coleman Study (1966); and (3) a discussion of studies on desegregation and academic achievement after 1966. Findings of the review support the positive effects of desegregation and academic achievement although it is pointed out that desegregation can have negative effects on other aspects of student life, particularly for black students. Magnet School Curricula: Distinctly Different? Summary Report.

Pub Date-12 Apr 79

Note-32p.; Paper prepared for the Annual Meeting of the American Educational Research Association (San Francisco, California, April 12, 1979)

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*Comparative Analysis, *Curriculum Design, Educational Policy, Elementary Secondary Education, Grouping (Instructional Purposes), *Magnet Schools, Parent Participation, *Racially Balanced Schools, School Integration, Student Participation, *Teaching Methods, *Traditional Schools

Identifiers-California (Los Angeles)

Ethnographic techniques are employed in this study in order to determine the extent to which curricula developed in magnet schools is distinctly different from curricula in conventional or nonmagnet schools. The variables examined and compared include: (1) subject matter offered; (2) instructional methods; (3) grouping procedures; (4) student and parent choicemaking; and (5) curricular policies. Preliminary findings reported indicate that although some variance exists between the two types of schools with regard to the variables examined, there is still too little data to judge the extent of the differences. Descriptors-*Access to Education, American Indians, Asian Americans, *Blacks, *Educational Research, Equal Education, Ethnocentrism, *Minority Groups, *Professional Personnel, Research and Development Centers
Identifiers-American Educational Research Association

This paper rejects the view that the need to modify the status and role of minorities in educational research and development is of high priority. The need to modify this status is viewed as symptomatic of the problem of differential treatment of persons of color by American educational institutions. The problem which the American Educational Research Association (AERA) must address is institutionalized ethnocentrism as it is manifested in the inability of American educational institutions to effect equal outcomes for all students. Minority group children consistently score below the median on standardized verbal tests. Hispanics and blacks are underrepresented among college bound students, and among those receiving doctorates. Thus it could be expected that blacks and Hispanics would also be underrepresented in the research and development enterprise. Eight guidelines for AERA behavior and four courses of action are suggested to help AERA reduce institutional ethnocentrism in its own organization. The reduction of institutional ethnocentrism must become a high priority for AERA, and that priority must be reflected in its budget. (RLV)

Descriptors-*Black Community, *Blacks, *Economic Disadvantagement,
Economic Factors, Health Personnel, *Health Services, Medical
Assistants, *Medical Care Evaluation, Paraprofessional Personnel,
*Political Issues, Primary Health Care, Quality of Life

In the past few years there has been an increase in the discussion of health care as a right. Although the statement that health care is a right sounds good and altruistic, it does not deal with the political or economic realities of health care, especially for blacks. The health care industry represents approximately 8% of the Gross National Product. However, the black family has not really benefited from increased government spending on health care. The health care needs of the black community must first be established. Improved environmental conditions must be developed. The numbers of minority health providers must be increased. To bring about these suggested changes, it is necessary to redistribute the federal health care dollar into the black and minority community. The only way that this can be done is through the political process. Blacks can contribute to their health by becoming involved in the political and economic life of the black community. (RLV)

Future Dimensions of Mental Health Services to Minority Communities.

Pub Date- 78
Note-14p.; Paper presented at the Annual Third World Counselors in Higher Education Conference
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Community Services, Cultural Factors, Futures (of Society), *Health Needs, *Health Personnel, *Mental Health, *Minority Groups, *Psychiatric Services, *Psychological Services, Resource Allocations

In the past, neither the minority individual nor a third world perspective was to be found in the conceptualization or administration of mental health services to minorities. Changes in the emphasis from the Anglo/European focus to a socio-eco-political understanding of people of color were gradual. The final breakthrough came during the 1960s when third world practitioners and scholars developed a theoretical framework applicable to the experience of the third world community. The present state of the mental health field shows an encouraging growth in the pool of available books, articles, research and training opportunities for third world people. However, the debate over the mental health problems of minorities has failed to address the fundamental question of the allocation of resources to combat the problems faced by this population. If any gains are to be made in the future, there should be more concern for the allocation of resources to minorities. In addition, a strong and healthy association of third world practitioners is needed to work for the goal of culturally based, culturally appropriate, non-class bound mental health services. Descriptors-Developing Nations, Employment Level, Employment Practices, *Employment Programs, Guaranteed Income, Inflation (Economics), *Job Development, *Labor Economics, *Manpower Utilization, *Public Policy, Public Service Occupations, *Unemployment

This paper examines various aspects of public employment programs designed to reduce unemployment in Western industrialized countries. The historical context in which these programs emerged and the forms such programs might take are discussed. Public employment is considered in terms of special public service jobs, public works, and training and sheltered employment. Possible types of wage subsidy schemes are also considered. The nature of existing schemes in the United States and Europe is outlined and discussed according to the types of programs pursued. The economics of such policies are analyzed according to the effects these measures have on inflation, the overall level of employment, the distribution of employment, the balance of payments and the efficiency of resource allocation. Existing literature on the macroeconomic and distributional effects of job creation programs is reviewed and indirect evidence regarding the probable success of job creation measures is discussed. Notes on evaluation research and suggestions for future evaluation studies are presented. Overall conclusions are also presented. (Author/EB)

Descriptors-*Economic Status, High School Graduates, *Income, *Males, *Marital Instability, *Marital Status, *Marriage, Salaries
Identifiers-Wisconsin

Income data for 413 male Wisconsin high school graduates whose first marriages ended in divorce or separation are used in this study to analyze the relationship of men's earnings to their probability of remarriage. A review of related literature is provided to illustrate the hypothesis that the higher a man's earnings are, the more likely he is to remarry. Results of the study indicate that absolute earnings, earnings instability, and earnings relative to peers have minimal effects on a man's probability of remarriage, but that long run permanent income positively affects remarriage. It is concluded that permanent income is more important for remarriage than other studies have shown it to be for marital disruption. (Author/EB)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Administrative Organization, Administrator Role, Prevention, School Community Relationship, School Environment, *School Integration, School Safety, *School Security, School Vandalism, *Security Personnel, *Student Needs

A well organized school security program is one solution to controlling the increase in school disruption. However, a long-range security program requires more than enforcing regulations. The role of school security is to influence the development of an educational climate where the classroom atmosphere is peaceful. The responsibilities of security officers should emphasize the importance of preventive security measures. For this purpose, a teamwork approach is necessary. Also, security officers should strengthen ties with students, administrators, school staff, and the community. In dealing with students, school security officers have to understand the students' point of view. In order for security measures to be effective, the security force and the administration need to agree on job descriptions and policy goals for the security program. Parents and community representatives must be convinced of the need for school security. In addition to daily actions for school security, a contingency plan for disruption is needed. This plan should include provisions for building safety and security; personal safety and security; administrative control of operations; emergency communications systems; and police involvement. Identifiers-*North Carolina (Chapel Hill)

After discussing the differences in the physical, social, and attitudinal environments of advantaged and disadvantaged children, this paper describes the educational settings and intervention practices that were designed as part of the Carolina Abecedarian Project to assist young disadvantaged children in attaining educational competence. An overview of the project's organization, conceptual framework and daily action plan is provided. Specific activities designed to help prepare children in the program for the social and behavioral demands of the public schools are described. The role of parents in the program is also described. Special emphasis is placed on the development of communication skills in preschool children. Strategies developed by the program to promote a particular kind and amount of verbal interaction between teacher and day care pupil are listed. Objectives of this language intervention approach and methods employed for achieving these objectives are outlined. Two examples of results from this program show that the program is accomplishing its goal of preventing retarded intellectual development and improving linguistic performance. Social policy implications for preschool intervention programs are considered. (Author/EB)

The Vanishing Dichotomy: The Public vs. the Private Family Service Agency: Implications for Black Families.
Pub Date-Nov 77
Note-13p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Blacks, Community Agencies (Public), *Delivery Systems, *Family (Sociological Unit), Program Effectiveness, *Social Services, *Voluntary Agencies, Welfare Agencies, *Welfare Problems, Welfare Services

Just as voluntary agencies cannot function adequately without help from the government, the public system has failed to function adequately without the assistance of voluntary agencies. Public and voluntary resources should be organized into a coordinated accountable system that would assist families with the wide range of services necessary for their physical, social, intellectual and emotional development. Black families, in particular, will need more social services than the government alone can offer in the next ten years. A comprehensive, interrelated system of public and voluntary agencies would provide these families with the social services they need to develop and maintain their strength, and their dignity. Descriptors-*Class Activities, *Cross Cultural Studies, *Cultural Differences, *Cultural Factors, Elementary Secondary Education, Multicultural Education, *Nonverbal Communication

This handbook presents selected theories, activities, and resources which can be utilized by educators in the area of non-verbal communication. Particular attention is given to the use of non-verbal communication in a cross-cultural context. Categories of non-verbal communication such as proxemics, haptics, kinesics, smiling, sound, clothing, and laughter/play are outlined. Ten sets of activities which are common to all cultures are listed and described. Included are the categories of interaction, association, subsistence, bisexuality, territoriality, temporality, learning, play, defense, and exploitation. Cultural considerations in non-verbal communication are illustrated by narrations written by individual members of various ethnic groups. The emphasis in these illustrations is on the different meanings similar gestures, behaviors, and reactions have in different cultures. Classroom activities which can be used to improve and/or clarify students' understanding of non-verbal communication are presented. A bibliography of materials dealing with non-verbal communication is provided. (EB)

Descriptors-Environmental Influences, Futures (of Society), Geographic Concepts, *Geographic Distribution, Individual Needs, *Migration Patterns, *Older Adults, *Population Distribution, *Population Trends, Quality of Life, *Social Welfare

After describing the growing concern for older people, the commonly held stereotypes about them and the ways in which researchers examine aging and older people, this paper examines different spatial aspects of aging. Prevailing paradigmatic and theoretical views of aging as they are relevant to geographical study are discussed. Specific spatial aspects of aging addressed include: (1) the spatial distribution of the United States' elderly population as it has evolved over time; (2) the spatial patterns of elderly migration and the processes responsible for this migration; (3) the nature of the relationships that exist between the older individual and the environment, the ways in which the individual experiences the environment, and how the environmental setting affects the life of the older person; and (4) the application of geographic research to the planning of delivery systems, housing, and other programs designed to assist older people. Also addressed are the changing characteristics of older people and their future conditions. (Author/EB)

Descriptors-*Blacks, Board of Education Policy, Elementary Secondary Education, Parent Attitudes, *Parent Participation, Parent Role, *Parents, *Parent School Relationship, Reactive Behavior, *School Integration, *School Involvement

This study is concerned with the lack of black parental involvement in a desegregated Dallas elementary school district. Data from questionnaires sent to a sampling of black parents in the school district suggest that blacks residing in desegregated neighborhoods generally maintain a low profile in the affairs of their local schools in order to guard their fragile position within the neighborhood. The information further suggests some specific fears that black parents might have about becoming involved in the affairs of recently desegregated schools. Among them are: (1) fear of white flight; (2) fear of reprisal from white school personnel or white community leaders; (3) fear of their children's misbehavior; (4) fear of embarrassment by their children's lack of academic success; and (5) fear of exposing their own academic weakness. However, a low return rate on the questionnaires and the high rate of neutral responses indicate that the validity of these assumptions are uncertain and that further research is necessary. The Evaluation of Peer Relations in a Desegregated Middle School.

Pub Date- 79
Note-8p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Academic Education, *Black Students, *Caucasian Students, Junior High Schools, Longitudinal Studies, *Middle Schools, Peer Relationship, School Environment, *School Integration, *Student Attitudes, *Student Opinion

This study traced the evolution of students' attitudes toward their desegregated school over a period of three years. A sample group of ten black and ten white children were interviewed at the beginning, middle and end of the three year period on three topics: (1) their reactions to and feelings about attending their new school; (2) their opinions on the academic life of the school; and (3) their judgments of peer relations within the school. Ratings of the school and its academic program were generally very positive, although they declined significantly over time. Answers to the peer relation question indicated that students perceived both a decrease in positive relations and a decrease in negative relations over time. (Author/EB)

Descriptors-Educational Finance, *Educational History, *Educational Improvement, Educational Opportunities, *Educational Policy, Educational Practice, *Elementary Secondary Education, *Equal Education, Political Influences, Public Opinion, School Role, Social Influences

Educational purpose, policy, and practice in America have changed in important ways since World War II. For example, there have been three time periods with different educational purposes during the last forty years. For each of these periods, there were implicit assumptions made about why we educate, how we educate and where we educate. The first period devoted to democracy in education,'' was replaced by equality of educational opportunity,'' and was followed by the goal of equity in education.'' Each of these assumptions has been influenced by changes in social goals, leaders, politics, scholarly research, and human and financial resources. Also, each has had its own policies and practices. If the current educational goal of equity in education,'' is to be achieved, society must express its commitment to this educational purpose. The place where such a purpose can be fulfilled is the school. (Author/EB)

Descriptors-*Compensatory Education Programs, Data Collection, Educationally Disadvantaged, Elementary Secondary Education, *Evaluation Methods, *Evaluation Needs, *National Surveys, *Program Effectiveness, *Program Evaluation, Program Improvement
Identifiers-*Elementary Secondary Education Act Title I

This report reviews the effectiveness of national evaluation activities undertaken by the United States Office of Education, Office of Evaluation and Dissemination (OED) with regard to Title I compensatory education programs. Three major evaluations undertaken by the OED and technical assistance activities developed by the OED are described and discussed. It is generally concluded that national evaluations do not generate meaningful data or recommendations for the improvement of program effectiveness at the local level and that technical assistance activities are expensive alternatives to State agency evaluation activities. Alternatives to national evaluation studies and technical assistance activities are suggested. Emphasis is placed on the need of State and local programs to identify and focus on effective compensatory education practices to more fully meet the needs of educationally deprived children. Attachments to the report include legislative requirements of Title I program evaluations, an outline of OED evaluation activities and a listing of OED technical assistance centers and project directors. Racial residential segregation has been a persistent feature of the American housing market. At least three distinct theories have been presented to explain this racial segregation. The class'' theory claims that, due to disproportionate overrepresentation of blacks in lower income classes, they will be overrepresented in lower quality housing markets. The discrimination'' theory posits that blacks are excluded from white neighborhoods by such practices as whites refusing to sell to blacks, mortgage discrimination, etc. The voluntary'' theory claims that both blacks and whites prefer to live amid neighbors of the same race and thus self-segregate'' themselves into racially homogeneous neighborhoods. In order to test the third theory, research was conducted in two mid-Western cities on segregation preferences. The findings support the hypothesis that blacks prefer racially balanced integrated areas, while whites prefer all white areas. (Author/RLV)

Descriptors-*Black Housing, Blacks, Economically Disadvantaged, *Ghettos, *Housing Discrimination, Housing Patterns, *Inner City, Neighborhood Integration, Racial Discrimination, *Racial Segregation

Racial discrimination and racial segregation resulting from discrimination have an effect upon life in central cities. In central cities the costs of retail business and of housing are often higher than elsewhere. Minority group populations, concentrated in ghettos of central cities, are subect to limited job opportunities. The results of racial discrimination toward minority groups in central cities include a weak tax base, poverty, and socio-psychological problems for the population. Since housing discrimination is at the root of most of the other factors which degrade life in central cities, it must be attacked first. (RLV)

Descriptors-*Academic Achievement, *Achievement Gains, *Black Students, *Caucasian Students, *Family Influence, Integration Effects, Mathematics, Racial Factors, Reading Achievement, *School Integration, School Responsibility, Secondary Education, Socioeconomic Influences, Student Characteristics, Teacher Influence, Voluntary Integration

This study investigates the family and school influences on reading and mathematics achievement for students in a voluntarily desegregated school district. General findings suggest that the best main-effects predictors of both reading and mathematics achievement are prior levels of achievement in each area. However, further analysis of the data indicate that the influence of such variables as prior achievement, student race teacher race and student achievement vary with other student characteristics. This analysis also suggests that high ability, low socioeconomic students and high ability black students derive the greatest relative benefit and that exposure to white teachers is most beneficial for low socioeconomic level students. Based on these findings, it would appear that the voluntary desegregation of this particular school had no adverse influence on the achievement of either black or non-black students. In fact, a descriptive analysis suggests that achievement gains for both black and non-black students compare favorably with a national norm group. (Author/EB)

Descriptors-*Black Community, *Blacks, *Community Action, *Community Health, Community Resources, Employment Opportunities, *Health Facilities, Health Needs, *Hospitals, Urban Areas

The following issues are addressed in this paper: (1) blacks are significantly dependent on public general hospitals for their medical care; (2) public hospitals represent an important community resource to the black community; (3) there are a number of forces at work on public general hospitals to either close or to significantly reduce the number and types of services provided by them; and (4) effective strategies must be developed if public general hospitals are to survive. Data are provided to show that blacks have higher proportions of health problems and less access to utilization of physician services than whites. Data are also presented to show that besides representing an important medical resource, public hospitals represent a major source of employment for blacks. In addition, it is argued that the thrust to control hospital costs puts public general hospitals in a vulnerable position and that the black community must take a more active part on all political levels to insure the viability of these institutions. The articles in this document describe various aspects of the Comprehensive Employment and Training Act (CETA) Program. Two articles compare the CETA program to the WPA Federal Arts Program of the 1930s and describe various job opportunities CETA has provided for out-of-work artists. A photographic essay project of older adults, undertaken by CETA workers, is described in terms of the subjects it involved and the book that was developed from it. Another photographic essay project funded by CETA which concentrated on urban workers is briefly described. A fifth article illustrates a CETA worker's success with an elementary school poetry program. Guidelines for obtaining money from CETA for employment and training activities that meet the needs of certain disadvantaged groups are provided in the final article. (EB)

The intent of this manual is to provide trainers with essential background information about alcohol abuse among Spanish-speaking Americans and with a practical, workable model for organizing and structuring a training program. The nature and extent of alcohol abuse among Spanish-speaking Americans and the particular patterns of drinking behavior observable among this sub-cultural group are discussed. A model program for training persons who will be working with Spanish-speaking alcoholics and alcohol abusers is outlined. A modular outline of a general alcohol education program for use in training alcohol abuse trainers is also presented. Included is an alcohol awareness test which can be used for pre-training assessment of the trainers' needs and post-training evaluation of the effectiveness of the program. An annotated bibliography of pertinent printed materials and a list of available films and audio-visual aids are provided. (Author/EB)

The Adams Mandate: A Blueprint for Realizing Equal Educational Opportunity and Attainment.

Pub Date-79
Note-22p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Black Colleges, *Blacks, *Court Cases, *Equal Education, *Federal Regulation, *Higher Education, Public Education, *School Integration, State Action, State Colleges, State Universities

The ``Adams'' case, which has resulted in a court-ordered mandate, marks the first attempt to utilize the principles established in the Brown decision for public higher education. The mandate, which calls for southern and border States to eliminate the vestiges of racial dualism by desegregating their systems of public higher education, dispells the notion that this nation's public colleges and universities were desegregated long ago or that black and white colleges have been received as full partners in the delivery of educational services within State systems of higher education. In addition, criteria prepared by the Department of Health, Education, and Welfare for implementing the mandate represent the most comprehensive attempt to date by the Federal Government to provide specific guidelines for desegregating institutions of higher education. Although weaknesses exist in the criteria and specific considerations must be dealt with by the States involved if the intended outcomes are to become realities, the ``Adams'' mandate, if implemented and supported, will go a long way toward promoting the elimination of inequities which have worked against the achievement of social justice for blacks and other minorities. Sato, Kazuo

The Asian American Employment Market: The Japanese Experience.

Pub Date- 79

Note-22p.

Pub Type- Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Acculturation, Asian Americans, *Employment Opportunities, *Equal Opportunities (Jobs), Historical Reviews, *Immigrants, *Japanese Americans, Migration, *Racial Discrimination, *Social Mobility, Social Status

The Japanese Americans are numerically the largest of all the Asian American ethnic groups. In contrast to the other Asian American groups in the United States, the Japanese Americans are predominantly native born. Although first and second generation Japanese Americans had been subject to intense employment discrimination before World War II and over 100,000 were interned in relocation centers during the War, they have since come to be viewed as the model minority. The important factors contributing to their success are their heavy emphasis on education as the key to success, their upward occupational mobility into professional and technical jobs, and their eastward migration after the War in pursuit of less discriminatory geographic areas and jobs. The present day geographic distribution of Japanese Americans is conditioned by socioeconomic factors. By a process of adaptation and accomodation, the first generation Japanese American paved the way for subsequent generations. The success of the second and third generations now raises the possibility of their total absorption into the 'melting pot' and their loss of identity as Japanese Americans. (RLV)

Identifiers-*Elementary Secondary Education Act Title I

This document examines the National Institute of Education's (NIE) Final Report on its study of compensatory education. Objectives of the NIE study and strategies used by NIE to accomplish these objectives are summarized. The five main chapters of the Final Report dealing respectively with demonstration studies, teacher training, the Instructional Dimensions follow-up, Title I parent advisory councils, and the local administration of Title I are reviewed. The Report is criticized for not acknowledging the National Advisory Council (NAC) role in the study and for its omission of information about nonpublic school participation in Title I programs. Criticism is also expressed over the lack of information in the NIE report concerning specific approaches for improving the effectiveness of compensatory education programs. This criticism is used as the basis for presenting the NAC's recommendations regarding Title I programs in the following areas: (1) future NIE studies; (2) educational research; (3) information utilization and dissemination; (4) program evaluations; (5) summer school programs; (6) secondary schools; (7) alternative schools; (8) nonpublic schools; (9) parent participation; and (10) program administration and funding. These recommendations include specific suggestions for making each of these areas more responsive to the needs of educationally disadvantaged children. (EB)

Descriptors-*Broadcast Industry, *Employment Level, *Employment Opportunities, Managerial Occupations, *Minority Groups, Occupational Mobility, Sex Discrimination, *Television, *Working Women
Identifiers-*Federal Communications Commission

Job title information from seven television stations is used in this paper to demonstrate that minorities and women continue to be underemployed in broadcasting industry positions that have power or policymaking authority. It is pointed out that although minorities and women constitute 42 percent of all reporters and anchors on the local news shows of these stations, they have made virtually no gains in administrative or managerial jobs since 1975. It is also pointed out that the specific job titles held by minorities and women show not only that they hold relatively few managerial positions at local stations, but also that they rarely hold executive or policymaking jobs. It is concluded that the Federal Communication Commission's (FCC's) equal employment opportunity effort must be enhanced. (Author/EB)

Although classrooms vary in design and populations, there are certain features that are common to virtually all classrooms. These include the crowding of pupils, the compulsion of school attendance, and the expectation that teachers will foster literacy. The manner in which these features are dealt with in a classroom constitutes the core problem of control in schooling. The most common solution to the problem of control is the standard classroom. Alternative classroom settings that appear to be associated with differences among children can best be understood as variations on the standard classroom. In some of these alternatives, higher support conditions and the positive cast of classroom activities seem to reduce the disorder and alienation found in classrooms, particularly with regard to disadvantaged and ethnic minority children. However, as a number of studies suggest, differences stemming from the students' and teachers' styles within a classroom are more prominent than differences between standard and alternative educational settings. These findings indicate that the most significant changes in classrooms would only be possible if the basic conditions of schooling were so altered that the standard classroom simply would not work. Descriptors-City Problems, *Civil Rights, Economic Opportunities, *Federal Legislation, *Federal Programs, *Minority Groups, Program Effectiveness, *Racial Discrimination, Social Discrimination, Social Opportunities, *Transportation, Urban Areas
Identifiers-*Civil Rights Act 1964 Title VI

Title VI was designed to put an end to Federal support of discrimination and to assure blacks the right of access to Federally assisted programs. However, the Federal government has not established sufficiently rigorous compliance and enforcement mechanisms to ensure that its programs do not contribute to racial discrimination. In order to enforce Title VI effectively, agencies must have not only acceptable monitoring and enforcement procedures but a commitment to remedying the effects of past racial discrimination and making sure no one is improperly excluded on the basis of race, color, or national origin. Within the context of urban mass transportation, the principles of Title VI are particularly applicable. Minorities in the cities have suffered the consequences of isolation, increased travel costs, and displacement brought on by the expenditure of billions of Federal dollars on highway construction. As a Federal agency, the Urban Mass Transportation Administration (UMTA) has an important role to play in dealing with the problems of minority groups in America's cities in meeting and going beyond the requirements of Title Vi. Descriptors-*Academic Achievement, *Black Students, Caucasian Students, Comparative Analysis, Elementary Secondary Education, *Females, Males, *Psychological Patterns, *Racial Differences, Self Esteem, *Sex Differences

This report focuses on the self-perception and academic achievement of fifth grade black girls as compared to black boys and white girls. Comparisons are made along different dimensions of self-esteem (general, school, peer, and home), and on self-concept of ability, achievement orientation, general anxiety, locus of control, importance of social abilities, and performance on standardized reading and math achievement tests. Findings indicate that black girls occupy a psychological and academic middle ground compared to the other groups. For example, white girls had higher reading and math test scores than black girls, but black girls had higher test scores than black boys. Black girls also had higher achievement orientation scores and a trend toward higher school self-esteem than black boys. Black boys scored higher on the non-academic dimensions of importance of social abilities and peer self-esteem. In addition, black girls were shown to share some sex-related characteristics with white girls, such as higher anxiety and greater independence than their male counterparts. It is concluded that the presence of sex differences among black children is in need of further study. (Author/EB)

Descriptors-*Academic Achievement, *College Preparation, *Educational Practice, *High School Curriculum, High School Students, Racial Differences, Secondary Education, Sex Differences, *Student Grouping, *Vocational Education

Research in status attainment has shown that whether or not a student is enrolled in a high school college preparation curriculum has important consequences for his educational attainment. Vocational education literature suggests that differences between non-college tracks can also result in differential educational attainments for high school students. In addition, a comparison of two educational attainment models (one which includes detailed measures of curriculum and one which employes the traditional college/non-college distinction) indicates: (1) there are substantial differences between non-college tracks, but (2) these differences do not add appreciably to the explanatory power of conventional attainment models. It can be concluded that a detailed knowledge of curriculum placement has some value in explaining race and sex differences in attainment, but that only research specifically concerned with high school effects on attainment need employ the more detailed measure of curriculum enrollment. Descriptors-Black Attitudes, *Blacks, *Black Stereotypes, Majority Attitudes, Minority Groups, *Public Television, *Sex Stereotypes, *Television Research

This paper reviews a number of studies of the portrayal of blacks and other minorities on television. Statistics and conclusions drawn from these studies are used to illustrate the argument that: (1) minorities are either excluded, presented as tokens on otherwise all white shows, or concentrated in large numbers on a relatively few shows; and (2) the portrayals of minorities on network television are stereotyped. Samples of these portrayals are provided and the impact of these portrayals on both blacks and whites, particularly children, is discussed. (Author/EB)

Identifiers-*Elementary Secondary Education Act Title I, Technical Assistance Centers

The major focus of this review is on the performance of the United States Office of Education's (USOE) 10 Technical Assistance Centers (TACs). Information concerning the Technical Assistance Program, the Title I Evaluation and Reporting System (TIERS) and the methodology used for the review is also provided. Topics addressed include the selection of TAC contractors, operational policies, TAC activities, types and forms of assistance provided, support activities, staff organization, management and development, national system activities and coordination, monitoring, and costs. Various perceptions of the program held by persons affected by it or who affected it in some way are presented, including different views concerning the purpose, structure, operation and impact of this and other technical assistance systems. Alternative systems for delivering technical assistance are considered, and recommendations are made regarding the continuation, staffing, funding, and management of the system. Appendices provide information on the interviews and interviewees used in the review, a listing of related documents, an estimated breakdown of TAC effort and cost, technical issues surrounding the TAC models, characteristics of cooperating State agencies, and a background discussion about alternative systems for the delivery of technical assistance. Identifiers-Belgium, United Kingdom

This paper is a compilation of summaries and comments made at this conference on disadvantaged young children. The discussions presented are centered around a number of educational issues. These include the importance and relevance of a child's environment on his academic success, attitudes concerning the proper way to educate children, the role of the family in a child's education and the importance of language in a child's development. Research projects dealing with compensatory programs in the United Kingdom and Belgium are described. The role of television as an educational aid is considered. Observations made by the conference members at on-site visits to various schools are recorded. Reports compiled by discussion groups at the conference dealing with parental involvement, intervention, and related topics are also recorded. Suggestions for improving the educational opportunities of ethnic minorities and other disadvantaged students are made and comments made by participants after the conference are presented. Lists of contact addresses, groups, and participating members are attached. (EB)

Descriptors-*American Culture, *Asian Americans, *Child Development, Chinese Americans, Chinese Culture, Cognitive Development, Cross Cultural Studies, *Cultural Differences, *Dyslexia, Japanese Americans, *Learning Disabilities, Parent Role

Identifiers-China, Japan, United States

Learning disability has become one of the most serious afflictions of childhood in the United States. Approximately 6 to 15 percent of American children have difficulty in learning how to read. In contrast, educators and other professionals in China and Japan report that dyslexia is rather rare in their countries except in cases where there is a clear neurological disorder. Differences in language structures are cited as one possible explanation. Another explanation offered is that parents in China and Japan provide their children with different preschool experiences from those provided by American parents. Some researchers have challenged these views. However, a number of studies, conducted in China and Japan and in the United States seem to indicate that differences in cognitive ability between Japanese, Chinese and American children do exist. These apparent differences present a question for comparative investigation, but, if the research is to be legitimate, equal respect must be given to the cultural heritages and experiences of the ethnic groups involved. Descriptors-Civil Rights, *Court Cases, *Due Process, *Equal Protection, *Hearings, *Supreme Court Litigation, Welfare, Welfare Agencies, *Welfare Recipients
Identifiers-Aid To Families With Dependent Children, *Wisconsin

In 1970 the United States Supreme Court held in Goldberg v. Kelly'' that recipients of Aid to Families with Dependent Children (AFDC) had a constitutional right to an evidentiary hearing before a local welfare agency could terminate benefits. In order to determine the effects that the Goldberg'' requirements have had on the outcomes of AFDC appeals, a sample of 2000 hearing requests filed with the Wisconsin Department of Health and Social Services between 1965 and 1976 was examined. The data gathered showed a decrease in client success and an increase in hearing non-shows following the change in procedures. It also indicated that the present haphazard manner of attorney representation has not been helpful. However, the data also indicate that AFDC clients can become more effective adversaries if they are provided with adequate support and information about their claims. It can be concluded that if the goals desired by the courts and commentators are ever to be realized fully, further additions and supplements to the current system must be implemented. These might include pre-hearing contacts, the provision of non-lawyer advocates and some form of selective screening. (Author/EB)

The performance of the Social Employment Program (a public undertaking to employ physically, socially, or culturally disadvantaged persons) in the Netherlands is discussed and evaluated in this paper. The management, organization, and financial structure of the program are described in detail, and the degree of efficiency attained by the program is analyzed in terms of social as well as economic costs and benefits. Lessons of the Dutch experience in providing income for disadvantaged persons are related to current discussions in the United States on that issue. Appendices provide calculations of training and increased productivity benefits, and costs of displaced private sector employment. A comment by Victor Halberstadt on the research presented in this paper is also included. (EB)

Descriptors-*Blacks, *Caucasians, *Economic Opportunities, Economic Status, *Employment Opportunities, Family (Sociological Unit), Females, *Income, Males, Marital Status, Racial Factors, Sex Differences, *Talent Utilization

Data from the Current Population Survey of 1971 are used in this paper to investigate the ways in which various population groups utilize their earnings capacity. The hypotheses tested in this paper are: (1) that groups are poor primarily because they fail to utilize their earnings potential effectively; and (2) that the high incidence of poverty among blacks is attributable to their failure to take advantage of earnings opportunities. Comparisons are made between earnings capacity and rates of capacity utilization for individuals and family units along the dimensions of marital status, sex and race. Findings indicate that the relationship between utilization and potential earnings is greater for nonmarried individuals than for married units, greater for married males than for married females, and that differences in utilization and potential earnings between blacks and whites along all dimensions is relatively small. It is concluded that low utilization of earnings potential plays a minor role in explaining the poverty problem and that racial differences in earnings cannot be attributed to racial differences in capacity utilization. Descriptors-*Black Attitudes, *Community Problems, Employment Opportunities, Housing Opportunities, *Immigrants, *Indochinese, *Land Settlement, Public Opinion, Race Relations, *Refugees

Identifiers-*Louisiana

New Orleans ranks as the city with the largest Vietnamese community in the nation. With their growing number, problems with the Plaquemines Parish community as well as with some black organizations have developed, particularly in the areas of employment and housing. Several individuals have argued that local businesses hired large numbers of Vietnamese for jobs that were previously held by blacks and that Vietnamese refugees were placed in Federally subsidized housing while New Orleanians were already on waiting lists for such housing. Despite numerous efforts by the mass media, several organization and various individuals to relieve the tension, the controversy over the Vietnamese refugees and their resettlement continues. Prospects for a solution to the problem look dim. Projections show that more Vietnamese will be coming to the United States and, because of various factors, Louisiana will attract a sizeable portion of these new immigrants. (Author/EB)
